

LIST OF TABLES AND FIGURES

Tables

1.1	Gross training costs for different sectors and training years in DM in 1991	42
1.2	Net costs of training in the industry/trade and craft sector according to training year in 1991	43
1.3	Variable net costs of training according to company employment size in 1991	43
1.4	Increase in weekly lessons at vocational schools in West Germany	51
1.5	Supply and demand for new apprenticeships (in thousands)	57
1.6a	Apprenticeships in different industry sectors and new contracts in West Germany since 1970 (in thousands)	57
1.6b	Apprenticeships in different industry sectors and new contracts in eastern Germany since 1991 (in thousands)	58
1.7a	Employment in western Germany according to sectors, unemployment rate, and short-term workers in mechanical engineering since 1991	60
1.7b	Employment in eastern Germany by sector, showing short-term workers and unemployment rate since 1991	61
1.8	Unemployment and people not in "regular" employment in 1996	62

List of Tables and Figures

1.9	Apprentice training ratio (apprentices to employees), number of training companies and proportion of companies training (by plant size) in western Germany in 1990 and 1995	64
1.10	Percentage of plants with apprentice training according to industry in western Germany	64
3.1	Distribution of shopfloor employment in the sample by type of production	128
3.2	Trends in the US pump industry (SIC 3561, 3594) (Base Year = 1987)	128
3.3	Output and performance of the German pump industry	129
3.4	Shares of world pump trade	130
3.5	Percentage of apprentices in relation to shopfloor workers	135
3.6	Highest qualifications of US shopfloor employees (percent)	136
3.7	Penetration of work teams (percentage of shopfloor employees covered)	139
3.8	Inception and incidence of teams	140
3.9	Responsibilities of teams (percentage of plants with some teams reporting)	144
3.10	Annual days of further work-based training (per worker)	147
4.1a	Men remaining in the initial class position (by occupational class): all cohorts	177
4.1b	Men remaining in the initial class position (by occupational class): 50-year-old men	177
4.2	Relative income chances and class positions	179
6.1	Overview of money spent on continuing training in 1994 (in billion DM)	249
6.2	Participation rates of employed people in formal initial and further occupational training in the 12 month period preceding the survey	250
6.3	Participation rates of employed people in further training in different countries in 1992	251

List of Tables and Figures

6.4	Further occupational training for employed people by selected demographic characteristics in 1994	252
6.5	Hours spent by participants in further occupational training in the old and the new German Länder in 1994	253
6.6	Hours of training per employees by selected demographic characteristics in the US, May-October 1995	255
7.1	Eastern German firms, employment ≥ 500	290
7.2	Eastern German firms, employment > 150 and < 500	294
7.3	Eastern German firms, employment ≤ 500	298
7.4	French firms, employment ≥ 500	301
7.5	French firms, employment > 150 and < 500	307
7.6	French firms, employment ≤ 150 , outside the Arve	309
7.7	French firms, employment ≤ 150 , Valley of the Arve	309

Figures

4.1	Stratification and standardization of educational and vocational training	172
4.2a	Rate of job changes and changes in class position: all cohorts	175
4.2b	Rate of job changes and changes in class position: 50-year-old men	175
4.3	Labor force participation, 1975	184
4.4	Labor force participation, 1995	185
5.1	Dual (VED) and school-based (SVE) vocational education systems compared	194
6.1	Development of different age groups in the German population in the future	232
6.2	The German population and the current workforce in 1994	234
