

Studies in the History of Medieval Religion

VOLUME XXIX

LATE MEDIEVAL MONASTERIES AND THEIR PATRONS

England and Wales, c.1300–1540

Lay patronage of religious houses remained of considerable importance during the late medieval period; but this is the first full-length study dedicated to the subject. Based on a wide range of medieval documentary sources, including wills, monastic registers, inquisitions post mortem, cartularies and episcopal registers, this book traces the descent of these later patrons and assesses their activities, in particular their bequests and benefactions, their involvement in the affairs of their houses, and their burials in the conventual churches; and it argues that the ties which bound the two parties together, whether amicable, indifferent or abusive, continued right up until the Dissolution brought monastic life in England and Wales to an end.
