

CONTENTS

About the Book	xxiii
Preface	xxv
About the DVD	xxvii
Prerequisites	xxix
Chapter 1: AutoCAD 2014 Basics	1
1.1 How To Start AutoCAD	1
1.2 AutoCAD 2014 Interface	3
1.2.1 Application Menu	3
1.2.2 Quick Access Toolbar	4
1.2.3 Ribbons	5
1.2.4 InfoCenter	9
1.2.5 Command Window	10
1.2.6 Graphical Area	10
1.2.7 Status Bar	10
1.3 AutoCAD Defaults	10
1.4 Drawing Units	12
1.5 Creating a New AutoCAD Drawing	13
1.6 Opening an Existing AutoCAD Drawing	14
1.6.1 File Tab	15
1.7 Closing Drawing File(s)	16
1.8 Undo and Redo Commands	17
1.8.1 Undo Command	17
1.8.2 Redo Command	17
Practice 1-1	18
Chapter Review	20
Chapter Review Answers	20

Chapter 2: Precise Drafting in AutoCAD 2014	21
2.1 Drafting Priorities	21
2.2 Drawing Lines Using the Line Command	22
2.3 What is Dynamic Input in AutoCAD?	23
2.3.1 Example for Showing Prompts	23
2.3.2 Example for Specifying Lengths and Angles	24
Practice 2-1	25
2.4 Exact Angles (Ortho vs. Polar Tracking)	25
2.4.1 Increment Angle	27
2.4.2 Additional Angles	27
2.4.3 Polar Angle Measurement	28
Practice 2-2	28
2.5 Precise Drafting Using OSNAP	29
2.5.1 Activating Running OSNAPs	30
2.5.2 OSNAP Override	31
Practice 2-3	31
2.6 Drawing Circles Using the Circle Command	32
2.7 Drawing Circular Arcs Using the Arc Command	33
2.8 OSNAPs related to Circle and Arc	34
2.9 Using OTRACK with OSNAP	35
Practice 2-4	36
2.10 Drawing Lines and Arcs Using the Polyline Command	39
2.11 Converting Polylines to Lines and Arcs and Vice-versa	40
2.11.1 Converting Polylines to Lines and Arcs	40
2.11.2 Joining Lines and Arcs to Form a Polyline	41
Practice 2-5	42
2.12 Using Snap and Grid to Specify Points Accurately	42
2.13 Using Polar Snap	44
Practice 2-6	45
Chapter Review	47
Chapter Review Answers	47
 Chapter 3: Modifying Commands Part I	 49
3.1 How To Select Objects in AutoCAD	49
3.1.1 Window Mode (W)	51
3.1.2 Crossing Mode (C)	51
3.1.3 Window Polygon Mode (WP)	51
3.1.4 Crossing Polygon Mode (CP)	52
3.1.5 Fence Mode (F)	52
3.1.6 Last (L), Previous (P), and All Modes	53
3.1.7 Other Methods to Select Objects	53
3.2 Selection Cycling	54

3.3	Erase Command	55
	Practice 3-1	56
3.4	Move Command	58
	3.4.1 Nudge Functionality	59
	Practice 3-2	59
3.5	Copy Command	60
	Practice 3-3	61
3.6	Rotate Command	62
	3.6.1 Reference Option	63
	Practice 3-4	63
3.7	Scale Command	64
	3.7.1 Reference Option	65
	Practice 3-5	66
3.8	Mirror Command	66
	Practice 3-6	67
3.9	Stretch Command	68
	Practice 3-7	69
	Practice 3-8	70
3.10	Lengthening Objects	71
3.11	Joining Objects	72
	Practice 3-9	73
3.12	Using Grips to Edit Objects	74
3.13	Grips and Dynamic Input	77
3.14	Grips and Perpendicular and Tangent OSNAPs	79
	Practice 3-10	80
	Chapter Review	83
	Chapter Review Answers	83
Chapter 4:	Modifying Commands Part II	85
4.1	Introduction	85
4.2	Offsetting Objects	86
	4.2.1 Offsetting Using the Offset Distance Option	86
	4.2.2 Offsetting Using the Through Option	87
	4.2.3 Using the Multiple Option	87
	Practice 4-1	88
	Practice 4-2	89
4.3	Filleting Objects	89
	Practice 4-3	91
4.4	Chamfering Objects	92
	4.4.1 Chamfering Using the Distance Option	92
	4.4.2 Chamfering Using Distance and Angle Options	93
	Practice 4-4	94

4.5	Trimming Objects	95
	Practice 4-5	96
4.6	Extending Objects	97
	Practice 4-6	98
4.7	Arraying Objects – Rectangular Array	99
	4.7.1 The First Step	99
	4.7.2 Using the Array Creation Context Tab	100
	4.7.3 Editing a Rectangular Array Using Grips	101
	4.7.4 Editing a Rectangular Array Using the Context Tab	103
	4.7.5 Editing Rectangular Array Using Quick Properties	103
	Practice 4-7	103
4.8	Arraying Objects – Path Array	105
	Practice 4-8	110
4.9	Arraying Objects – Polar Array	111
	Practice 4-9	114
4.10	Break Command	114
	Practice 4-10	116
	Chapter Review	119
	Chapter Review Answers	119
Chapter 5:	Layers and Inquiry Commands	121
5.1	Using Layers in AutoCAD	121
5.2	Creating and Setting Layer Properties	123
	5.2.1 How to Create a New Layer	123
	5.2.2 How to Set a Color for a Layer(s)	124
	5.2.3 How to Set the Linetype for a Layer(s)	125
	5.2.4 How to Set a Lineweight for a Layer(s)	126
	5.2.5 How to Set the Current Layer	126
	Practice 5-1	127
5.3	Layer Controls	128
	5.3.1 Controlling Layer Visibility, Locking, and Plotting	128
	5.3.2 Deleting and Renaming Layers	130
	5.3.3 How to Make an Object's Layer the Current Layer	131
	5.3.4 How to Undo Layers Actions Only	131
	5.3.5 Moving Objects from One Layer to Another	132
5.4	Using the Layer Properties Manager	133
	Practice 5-2	134
5.5	Changing an Object's Layer, Quick Properties, and Properties	135
	5.5.1 Reading Instant Information About an Object	135
	5.5.2 How to Move an Object From a Layer to Another Layer	136
	5.5.3 What is Quick Properties?	136
	5.5.4 What is Properties?	137
	Practice 5-3	138

5.6	Inquiry Commands – Introduction	139
5.7	Measuring Distance	139
5.8	Checking the Radius	140
5.9	Measuring Angle	141
5.10	Measuring Areas	142
5.10.1	How to Calculate a Simple Area	143
5.10.2	How to Calculate a Complex Area	144
	Practice 5-4	145
	Practice 5-5	145
	Chapter Review	147
	Chapter Review Answers	147
Chapter 6:	Blocks and Hatches	149
6.1	What Are Blocks?	149
6.2	How to Create a Block	149
6.3	How to Use (Insert) Blocks	152
6.3.1	Block Insertion Point OSNAP	153
	Practice 6-1	154
6.4	Exploding Blocks and Converting Them to Files	154
6.4.1	Exploding Blocks	154
6.4.2	Converting Blocks to Files	155
	Practice 6-2	156
6.5	Hatching in AutoCAD	156
6.6	Hatch Command: First Step	156
6.7	Controlling Hatch Properties	158
	Practice 6-3	159
6.8	Specifying Hatch Origin	161
6.9	Controlling Hatch Options	162
6.9.1	How to Use Associative Hatching	162
6.9.2	How to Make Your Hatch Annotative	162
6.9.3	Using Match Properties to Create Identical Hatches	163
6.9.4	Hatching an Open Area	163
6.9.5	Creating Separate Hatches in the Same Command	164
6.9.6	Island Detection	165
6.9.7	Set Hatch Draw Order	166
	Practice 6-4	166
6.10	Hatch Boundaries	167
6.11	Editing Hatches	169
	Practice 6-5	172
	Chapter Review	174
	Chapter Review Answers	174

Chapter 7: Writing Text	175
7.1 Inserting Single Line Text	175
Practice 7-1	176
7.2 Inserting Multiline Text	177
7.2.1 Style Panel	179
7.2.2 Formatting Panel	179
7.2.3 Paragraph Panel	180
7.2.4 Insert Panel	182
7.2.5 Spell Check Panel	184
7.2.6 Tools Panel	185
7.2.7 Options Panel	186
7.2.8 Close Panel	186
7.2.9 While You Are in the Text Editor	186
Practice 7-2	188
7.3 Text Editing	189
7.3.1 Double-Clicking Text	189
7.3.2 Quick Properties and Properties	190
7.3.3 Editing Using Grips	191
7.4 Spell Check and Find and Replace	192
Practice 7-3	193
Chapter Review	196
Chapter Review Answers	196
 Chapter 8: Dimensions	 197
8.1 What is Dimensioning?	197
8.2 Dimension Types	198
8.3 How to Insert a Linear Dimension	200
8.4 How to Insert an Aligned Dimension	201
8.5 How to Insert an Angular Dimension	202
Practice 8-1	203
8.6 How to Insert an Arc Length Dimension	204
8.7 How to Insert a Radius Dimension	206
8.8 How to Insert a Diameter Dimension	207
Practice 8-2	208
8.9 How to Insert a Jogged Dimension	208
8.10 How to Insert an Ordinate Dimension	209
Practice 8-3	211
8.11 Inserting a Series of Dimensions Using the Continue Command	211
8.12 Inserting a Series of Dimensions Using the Baseline Command	213
Practice 8-4	214
Practice 8-5	214
8.13 Using the Quick Dimension Command	215

8.14	Editing Dimension Block Using Grips	218
8.15	Editing Dimension Block Using the Right-click Menu	222
8.16	Editing a Dimension Block Using Quick Properties and Properties	223
	Practice 8-6	224
	Chapter Review	227
	Chapter Review Answers	227
Chapter 9:	Plotting	229
9.1	What Are Model Space and Paper Space?	229
9.2	Introduction to Layouts	229
9.3	Creating a New Layout from Scratch	230
9.4	Creating a New Layout Using a Template	234
9.5	Creating Layouts Using Copying	235
	Practice 9-1	238
9.6	Creating Viewports	238
9.6.1	Adding Single Rectangular Viewports	239
9.6.2	Adding Multiple Rectangular Viewports	240
9.6.3	Adding a Polygonal Viewport	241
9.6.4	Creating Viewports by Converting Existing Objects	242
9.6.5	Creating Viewports by Clipping Existing Viewports	243
9.6.6	Working with Viewports	244
9.7	Scaling and Maximizing Viewports	245
9.8	Freezing Layers in a Viewport	248
9.9	Layer Override in a Viewport	248
	Practice 9-2	249
9.10	Plot Command	250
	Chapter Review	253
	Chapter Review Answers	253
Chapter 10:	Projects	255
10.1	How to Prepare Your Drawing for a New Project	255
10.2	Architectural Project (Imperial)	257
10.3	Architectural Project (Metric)	264
10.4	Mechanical Project – I (Metric)	271
10.5	Mechanical Project I (Imperial)	274
10.6	Mechanical Project – II (Metric)	278
10.7	Mechanical Project – II (Imperial)	278
Chapter 11:	More on 2D Objects	281
11.1	Introduction	281
11.2	Drawing Lines and Arcs Using the Polyline Command	281

11.3	Converting Polylines to Lines and Arcs, and Vice-versa	283
11.3.1	Converting Polylines to Lines and Arcs	283
11.3.2	Joining Lines and Arcs to Form a Polyline	284
	Practice 11-1	285
11.4	Drawing Using the Rectangle Command	285
11.4.1	Chamfer Option	286
11.4.2	Elevation Option	286
11.4.3	Fillet Option	286
11.4.4	Thickness Option	286
11.4.5	Width Option	287
11.4.6	Area Option	287
11.4.7	Dimensions Option	287
11.4.8	Rotation Option	288
11.5	Drawing Using the Polygon Command	288
11.5.1	Using an Imaginary Circle	288
11.5.2	Using the Length and Angle of One of the Edges	289
	Practice 11-2	290
11.6	Drawing Using the Donut Command	290
11.7	Drawing Using the Revision Cloud Command	291
	Practice 11-3	292
11.8	Using the Edit Polyline Command	293
11.8.1	Open and Close Options	294
11.8.2	Join Option	294
11.8.3	Width Option	294
11.8.4	Edit Vertex Option	294
11.8.5	Fit, Spline, and Decurve Options	295
11.8.6	Ltype gen Option	296
11.8.7	Reverse Option	296
11.8.8	Multiple Option	297
	Practice 11-4	299
11.9	Using Construction Lines and Rays	300
11.9.1	Construction Lines Command	300
11.9.2	Rays Command	301
	Practice 11-5	302
11.10	Using the Point Style and Point Commands	303
11.10.1	Point Style Command	303
11.10.2	Point Command	304
11.11	Using the Divide and Measure Commands	305
11.11.1	Divide Command	305
11.11.2	Measure Command	305
11.11.3	Using the Divide and Measure Commands with the Block Option	306
	Practice 11-6	306

11.12	Using the Spline Command	307
11.12.1	Fit Points Method	308
11.12.2	Control Vertices Method	309
11.12.3	Editing a Spline	309
	Practice 11-7	311
11.13	Using the Ellipse Command	312
11.13.1	Drawing an Ellipse Using the Center Option	312
11.13.2	Drawing an Ellipse Using Axis Points	313
11.13.3	Drawing an Elliptical Arc	313
	Practice 11-8	314
11.14	Using the Boundary Command	315
	Practice 11-9	316
11.15	Using the Region Command	316
11.15.1	Performing Boolean Operation on Regions	317
	Practice 11-10	318
	Chapter Review	320
	Chapter Review Answers	320
Chapter 12:	Advanced Practices – Part 1	321
12.1	Offset Command – Advanced Options	321
12.1.1	Erase Source Option	322
12.1.2	Layer Option	322
12.1.3	System Variable: offsetgaptyp	322
12.2	Trim and Extend Edge Option	322
	Practice 12-1	323
12.3	Using Match Properties	324
12.4	Copying/Pasting Objects and Matching Properties Across Files	326
12.4.1	Copying Objects	327
12.4.2	Pasting Objects	327
12.4.3	Using the Drag-and-Drop Method	327
12.4.4	Matching Properties Across Files	328
	Practice 12-2	328
12.5	Sharing Excel and Word Content in AutoCAD	328
12.5.1	Sharing Data From Word	329
12.5.2	Sharing Data From Excel	331
12.5.3	Pasting a Linked Table From Excel	331
	Practice 12-3	335
12.6	Hyperlinking AutoCAD Objects	336
	Practice 12-4	337
12.7	Purging Items	337
	Practice 12-5	339

12.8	Using Views and Viewports	340
12.8.1	Creating Views	340
12.8.2	Using Views in Viewports	342
12.8.3	Creating a Named Viewport Arrangement	343
	Practice 12-6	345
	Chapter Review	348
	Chapter Review Answers	348
Chapter 13:	Advanced Practices – Part 2	349
13.1	Using Autodesk Content Explorer	349
	Practice 13-1	354
13.2	Using Quick Select	354
	Practice 13-2	357
13.3	Using Select Similar and Add Selected	357
13.3.1	Select Similar Command	357
13.3.2	Add Selected Command	358
13.4	What is Object Visibility in AutoCAD?	359
	Practice 13-3	360
13.5	Advanced Layer Commands	360
13.5.1	Using the Isolate and Unisolate Commands	361
13.5.2	Using the Freeze and Off Commands	361
13.5.3	Using Turn All Layers On and Thaw All Layers Commands	361
13.5.4	Using the Lock and Unlock Commands	362
13.5.5	Using the Change to Current Layer Command	362
13.5.6	Using the Copy Objects to New Layer Command	362
13.5.7	Using the Layer Walk Command	362
13.5.8	Using the Isolate to Current Viewport Command	363
13.5.9	Using the Merge Command	363
13.5.10	Using the Delete Command	364
13.6	Layer Transparency	364
	Practice 13-4	366
13.7	Using Fields in AutoCAD	366
	Practice 13-5	371
13.8	Using Partially Opened Files	371
13.8.1	How to Partially Open a File	372
13.8.2	Using Partial Load	373
	Practice 13-6	374
	Chapter Review	376
	Chapter Review Answers	376

Chapter 14: Using Block Tools and Block Editing	377
14.1 Automatic Scaling	377
14.2 Design Center	378
Practice 14-1	380
14.3 Tool Palettes	381
14.3.1 How to Create a Tool Palette from Scratch	383
14.3.2 How to Fill the New Palette with Content	383
14.3.3 How to Create a Palette from Design Center Blocks	384
14.3.4 How to Customize Tool Palette Properties	384
14.4 Hatches and Tool Palettes	386
Practice 14-2	387
14.5 Customizing Tool Palettes	388
14.5.1 Allow Docking	388
14.5.2 Transparency	388
14.5.3 View Options	389
14.5.4 Add Text and Add Separator	390
14.5.5 New/Delete/Rename Palette	391
14.5.6 Customize Palettes	392
Practice 14-3	393
14.6 Editing Blocks	394
Practice 14-4	395
Chapter Review	398
Chapter Review Answers	398
 Chapter 15: Creating Text & Table Styles and Formulas in Tables	 399
15.1 Creating Text and Tables	399
15.2 How to Create a Text Style	400
Practice 15-1	402
15.3 Creating a Table Style	404
15.3.1 General Tab	406
15.3.2 Text Tab	408
15.3.3 Borders Tab	409
15.4 Inserting a Table in a Drawing	409
15.4.1 Specify Insertion Point Option	410
15.4.2 Specify Window Option	411
Practice 15-2	412
15.5 Using Formulas in Table Cells	412
15.6 Using Table Cell Functions	414
15.6.1 Using the Rows Panel	414
15.6.2 Using the Columns Panel	414

15.6.3 Using the Merge Panel	415
15.6.4 Using the Cell Styles Panel	416
15.6.5 Using the Cell Format Panel	417
15.6.6 Using the Insert Panel	419
15.6.7 Using the Data Panel	420
Practice 15-3	421
Chapter Review	424
Chapter Review Answers	424
Chapter 16: Dimension & Multileader Styles	425
16.1 What is Dimensioning?	425
16.2 How to Create a New Dimension Style	426
16.3 Dimension Styles: Lines Tab	427
16.4 Dimension Styles: Symbols and Arrows Tab	430
16.5 Dimension Styles: Text Tab	432
16.6 Dimension Styles: Fit Tab	437
16.7 Dimension Styles: Primary Units Tab	438
16.8 Dimension Styles: Alternate Units Tab	440
16.9 Dimension Styles: Tolerances Tab	441
16.10 Creating a Dimension Sub-style	443
Practice 16-1	444
16.11 More Dimension Functions	445
16.11.1 Dimension Break	445
16.11.2 Dimension Adjust Space	446
16.11.3 Dimension Jog Line	448
16.11.4 Dimension Center Mark	448
16.11.5 Dimension Oblique	449
16.11.6 Dimension Text Angle	450
16.11.7 Dimension Justify	450
16.11.8 Dimension Override	451
Practice 16-2	452
16.12 How to Create a Multileader Style	453
16.12.1 Leader Format Tab	454
16.12.2 Leader Structure Tab	455
16.12.3 Content Tab	456
16.13 Inserting a Multileader Dimension	458
Practice 16-3	460
Chapter Review	463
Chapter Review Answers	463
Chapter 17: Plot Style, Annotative, and DWF Files	465
17.1 Plot Style Tables – First Look	465
17.2 Color-dependent Plot Style Tables	465

17.3	Named Plot Style Tables	470
	Practice 17-1	474
	Practice 17-2	475
17.4	What is the Annotative Feature?	476
	Practice 17-3	480
17.5	Design Web Format (DWF) Files	481
17.6	Exporting DWF, DWFX, and PDF Files	482
17.7	Using the Batch Plot Command	484
17.8	Viewing DWF and DWFX Files	487
	Practice 17-4	487
	Chapter Review	489
	Chapter Review Answers	489
 Chapter 18: How to Create a Template File and Interface Customization		 491
18.1	What is a Template File and How Do You Create One?	491
18.2	Editing a Template File	493
	Practice 18-1	494
18.3	Customizing the Interface – Introduction	494
18.4	How to Create a New Panel	496
18.5	How to Create a New Tab	500
18.6	How to Create a Quick Access Toolbar	500
18.7	How to Create a New Workspace	501
	Practice 18-2	502
18.8	How to Create Your Own Command	504
	Practice 18-3	506
	Chapter Review	508
	Chapter Review Answers	508
 Chapter 19: Parametric Constraints		 509
19.1	What Are Parametric Constraints?	509
19.2	Using Geometric Constraints	510
19.2.1	Using the Coincident Constraint	510
19.2.2	Using the Collinear Constraint	512
19.2.3	Using the Concentric Constraint	512
19.2.4	Using the Fix Constraint	513
19.2.5	Using the Parallel Constraint	514
19.2.6	Using the Perpendicular Constraint	514
19.2.7	Using the Horizontal Constraint	515
19.2.8	Using the Vertical Constraint	516
19.2.9	Using the Tangent Constraint	517
19.2.10	Using the Smooth Constraint	517

19.2.11	Using the Symmetric Constraint	518
19.2.12	Using the Equal Constraint	519
19.3	Geometric Constraints Settings	520
19.4	What is the Infer Constraint?	521
19.5	What is AutoConstrain?	522
19.6	Constraint Bar and Show & Hide	525
19.6.1	Constraint Bar	525
19.6.2	Show & Hide	526
19.7	Relaxing and Over-Constraining Objects	526
19.7.1	Relaxing Constraints	526
19.7.2	Over-Constraining an Object	527
	Practice 19-1	527
19.8	Using Dimensional Constraints	528
19.8.1	Using Linear, Horizontal, and Vertical Constraints	529
19.8.2	Using Aligned Constraints	530
19.8.3	Using Radial and Diameter Constraints	531
19.8.4	Using Angular Constraints	532
19.8.5	Using the Convert Command	533
19.9	Controlling Dimensional Constraints	534
19.9.1	Constraint Settings Dialog Box	534
19.9.2	Deleting Constraints	535
19.9.3	Showing and Hiding Dimensional Constraints	536
19.10	Using the Parameters Manager	536
19.11	What is Annotational Constraint Mode?	539
19.11.1	Annotational Constraint Mode	540
19.11.2	Converting Dimensional Constraints to Annotational	540
19.12	Using Dimensional Grips	541
	Practice 19-2	542
	Chapter Review	545
	Chapter Review Answers	545
Chapter 20:	Dynamic Blocks	547
20.1	Introduction to Dynamic Blocks	547
20.2	How to Create a Dynamic Block	548
20.2.1	Using the Block Definition Dialog Box	549
20.2.2	Double-Clicking an Existing Block	549
20.2.3	Block Editor Command	550
20.3	Inside Block Editor	550
20.4	What are Parameters and Actions?	551
20.5	Controlling Parameter Properties	556
20.6	Controlling the Visibility Parameter	558
20.7	Using the Lookup Parameter and Action	560

20.8	Final Steps	562
	Practice 20-1	563
	Practice 20-2	564
	Practice 20-3	565
20.9	Using Constraints for Dynamic Blocks	567
	20.9.1 Block Table Button	567
	20.9.2 Construction Button	572
	20.9.3 Constraint Status Button	572
	Practice 20-4	573
	Practice 20-5	573
	Chapter Review	576
	Chapter Review Answers	576
Chapter 21:	Block Attributes	577
21.1	What are Block Attributes?	577
21.2	How to Define Attributes	578
	21.2.1 Attribute Section	578
	21.2.2 Mode Section	579
	21.2.3 Text Settings Section	579
	21.2.4 Insertion Point Section	579
21.3	Inserting Blocks with Attributes	580
21.4	How to Control Attribute Visibility	580
	Practice 21-1	581
21.5	How to Edit Individual Attribute Values	582
21.6	How to Edit Attribute Values Globally	583
	Practice 21-2	585
21.7	How to Redefine and Sync Attribute Definitions	585
	Practice 21-3	588
21.8	How to Extract Attributes from File(s)	589
	Practice 21-4	597
	Chapter Review	599
	Chapter Review Answers	599
Chapter 22:	External Referencing (Xref)	601
22.1	Introduction to External Reference	601
22.2	Inserting External Reference File Formats	602
	22.2.1 Attach a DWG File	603
	22.2.2 Attach an Image File	604
	22.2.3 Attach a DWF File	605
	22.2.4 Attach a DGN File	605
	22.2.5 Attach a PDF File	606
22.3	External Reference Palette	607

22.4	Using the Attach Command	608
22.5	Reference Files and Layers	609
22.6	Controlling the Fading of a Reference File	610
	Practice 22-1	611
22.7	Editing External Reference DWG Files	612
	22.7.1 Using the Edit Reference Command	612
	22.7.2 Using the Open Command	614
22.8	External Reference File Related Functions	615
	22.8.1 Unload Command	615
	22.8.2 Reload Command	616
	22.8.3 Detach Command	616
	22.8.4 Bind Command	616
	22.8.5 Xref Type	617
	22.8.6 Path	617
	Practice 22-2	617
22.9	Clipping an External Reference File	618
22.10	Clicking and Right-Clicking a Reference File	620
	22.10.1 Clicking and Right-Clicking a DWG File	620
	22.10.2 Clicking and Right-Clicking an Image File	621
	22.10.3 Clicking and Right-Clicking a DWF File	621
	Practice 22-3	623
22.11	Using the eTransmit Command with External Reference Files	624
	Practice 22-4	627
	Chapter Review	629
	Chapter Review Answers	629

Chapter 23: Sheet Sets 631

23.1	Introduction to Sheet Sets	631
23.2	Working with the Sheet Set Manager Palette	632
	23.2.1 How to Open and Close an Existing Sheet Set	632
	23.2.2 How to Work with the Sheet Set Manager Palette	634
23.3	Sheet Set File Setup	637
	Practice 23-1	637
23.4	Creating a Sheet Set Using the Example Sheet Set	638
	23.4.1 Adding a Sheet in a Subset	642
	23.4.2 Sheet Control	643
	Practice 23-2	643
23.5	Adding and Scaling Model Views	644
	Practice 23-3	647
23.6	Creating a Sheet Set Using Existing Drawings	648
	Practice 23-4	653
23.7	Publishing Sheet Sets	653

23.8	Using the eTransmit and Archive Commands	655
23.8.1	Using the eTransmit Command	655
23.8.2	Using the Archive Command	656
	Practice 23-5	656
	Chapter Review	659
	Chapter Review Answers	659
Chapter 24:	CAD Standards and Advanced Layers	661
24.1	Why Do We Need CAD Standards?	661
24.2	How to Create a CAD Standards File	662
24.3	How to Link DWS Files to DWG Files and Check Them	663
24.3.1	Configuring (Linking) a DWS File to a DWG File	663
24.3.2	Checking the DWG File	666
	Practice 24-1	668
24.4	Using Layer Translator	669
	Practice 24-2	672
24.5	Working with the Layer Properties Manager	673
24.6	Creating a Property Filter	675
24.7	Creating a Group Filter	677
24.8	Things You Can Do with Filters	678
24.8.1	Property Filter Menu	678
24.8.2	Group Filter Menu	679
	Practice 24-3	679
24.9	Creating Layer States	680
	Practice 24-4	683
24.10	The Settings Dialog Box	683
24.10.1	New Layer Notification	685
24.10.2	Isolate Layer Settings	685
24.10.3	Dialog Settings	686
	Practice 24-5	687
	Chapter Review	689
	Chapter Review Answers	689
Chapter 25:	Drawing Review	691
25.1	Introduction to Drawing Review	691
25.2	First Step – Creating a DWF File	692
25.3	Second Step – Using Autodesk Design Review	692
25.4	Markup and Measure Tab	694
25.4.1	Clipboard Panel	694
25.4.2	Formatting Panel	695
25.4.3	Callouts Panel	696

25.4.4	Draw Panel	697
25.4.5	Measure Panel	697
25.4.6	Stamps and Symbols Panel	699
25.5	How to Edit Markup Objects	699
25.6	Controlling Markups	700
25.6.1	Markup Window	700
25.6.2	Markup Properties Window	700
	Practice 25-1	701
25.7	Using Markup Set Manager	701
	Practice 25-2	704
25.8	Comparing DWF Files	705
	Practice 25-3	707
	Chapter Review	709
	Chapter Review Answers	709
