

CONTENTS

<i>About the Book</i>	<i>xxiii</i>
<i>Preface</i>	<i>xxv</i>
Chapter 1 AutoCAD 2017 Basics	1
1.1 Starting AutoCAD	1
1.2 AutoCAD 2017 Interface	3
1.2.1 Application Menu	4
1.2.2 Quick Access Toolbar	5
1.2.3 Ribbons	6
1.2.4 InfoCenter	9
1.2.5 Command Window	10
1.2.6 Graphical Area	10
1.2.7 Status Bar	10
1.2.8 Start Tab	11
1.3 AutoCAD Defaults	12
1.4 What is My Drawing Unit?	13
1.5 Create a New AutoCAD Drawing	14
1.6 Open an Existing AutoCAD Drawing	16
1.6.1 File Tab	17
1.7 Closing Drawing Files	18
1.8 Undo and Redo Commands	19
1.8.1 Undo Command	20
1.8.2 Redo Command	20
Practice 1-1 AutoCAD Basics	21
Chapter Review	23
Chapter Review Answers	24

Chapter 2	Precise Drafting in AutoCAD 2017	25
2.1	Drafting Priorities	25
2.2	Drawing Lines Using Line Command	26
2.3	What is Dynamic Input in AutoCAD?	27
2.3.1	Example for Showing Prompts	28
2.3.2	Example for Specifying Lengths and Angles	29
	Practice 2-1 Drawing Lines Using Dynamic Input	30
2.4	Exact Angles (Ortho vs. Polar Tracking)	30
2.4.1	Increment Angle	32
2.4.2	Additional Angles	32
2.4.3	Polar Angle Measurement	33
	Practice 2-2 Exact Angles	34
2.5	Precise Drafting Using Object Snap	34
2.5.1	Activating Running OSNAPS	36
2.5.2	OSNAP Override	37
	Practice 2-3 Object Snap (OSNAP)	38
2.6	Drawing Circles Using Circle Command	38
2.7	Drawing Circular Arcs Using Arc Command	40
2.8	Object Snaps Related to Circles and Arcs	41
2.9	Using Object Snap Tracking with OSNAP	42
	Practice 2-4a Drawing Using OSNAP and OTRACK	44
	Practice 2-4b Drawing Using OSNAP and OTRACK	47
2.10	Drawing Lines and Arcs Using Polyline Command	47
2.11	Converting Polylines to Lines and Arcs, and Vice-Versa	49
2.11.1	Converting Polylines to Lines and Arcs	49
2.11.2	Joining Lines and Arcs to Form a Polyline	50
	Practice 2-5 Drawing Polylines and Converting	51
2.12	Using Snap and Grid to Specify Points Accurately	51
2.13	Using Polar Snap	53
	Practice 2-6 Snap and Grid	54
	Practice 2-7 Small Project	55
	Chapter Review	57
	Chapter Review Answers	58
Chapter 3	Modifying Commands Part I	59
3.1	How to Select Objects in AutoCAD	59
3.1.1	Window Mode (W)	61
3.1.2	Crossing Mode (C)	61
3.1.3	Window Polygon Mode (WP)	61
3.1.4	Crossing Polygon Mode (CP):	62
3.1.5	Lasso Selection	62

3.1.6	Fence Mode (F)	63
3.1.7	Last (L), Previous (P), and All Modes	63
3.1.8	Other Methods to Select Objects	63
3.2	Selection Cycling	65
3.3	Erase Command	66
	Practice 3-1 Selecting Objects and Erase Command	67
3.4	Move Command	69
3.4.1	Nudge Functionality	70
	Practice 3-2 Moving Objects	71
3.5	Copy Command	71
	Practice 3-3 Copying Objects	73
3.6	Rotate Command	73
3.6.1	Reference Option	74
	Practice 3-4 Rotating Objects	76
3.7	Scale Command	76
3.7.1	Reference Option	77
	Practice 3-5 Scaling Objects	79
3.8	Mirror Command	80
	Practice 3-6 Mirroring Objects	81
3.9	Stretch Command	82
	Practice 3-7 Stretching Objects	83
	Practice 3-8 Stretching Objects	83
3.10	Lengthening Objects	84
3.11	Joining Objects	86
	Practice 3-9 Lengthening and Joining Objects	87
3.12	Using Grips to Edit Objects	87
3.13	Grips and Dynamic Input	91
3.14	Grips and Perpendicular and Tangent OSNAPs	93
	Practice 3-10 Using Grips to Edit Objects	94
	Chapter Review	98
	Chapter Review Answers	99
Chapter 4	Modifying Commands Part II	101
4.1	Introduction	101
4.2	Offsetting Objects	102
4.2.1	Offsetting Using the Offset Distance Option	102
4.2.2	Offsetting Using the Through Option	103
4.2.3	Using the Multiple Option	103
	Practice 4-1 Offsetting Objects	104
	Practice 4-2 Offsetting Objects	105
4.3	Filleting Objects	106
	Practice 4-3 Filleting Objects	108

4.4	Chamfering Objects	108
4.4.1	Chamfering Using the Distance Option	109
4.4.2	Chamfering Using Distance and Angle	109
	Practice 4-4 Chamfering Objects	111
4.5	Trimming Objects	112
	Practice 4-5 Trimming Objects	113
4.6	Extending Objects	114
	Practice 4-6 Extending Objects	116
4.7	Arraying Objects – Rectangular Array	116
4.7.1	The First Step	117
4.7.2	Using the Array Creation Context Tab	118
4.7.3	Editing a Rectangular Array Using Grips	119
4.7.4	Editing a Rectangular Array Using the Context Tab	121
4.7.5	Editing a Rectangular Array Using Quick Properties	121
	Practice 4-7 Arraying Objects Using Rectangular Array	122
4.8	Arraying Objects – Path Array	124
	Practice 4-8 Arraying Objects Using Path	130
4.9	Arraying Objects – Polar Array	131
	Practice 4-9 Arraying Objects Using Polar Array	134
4.10	Break Command	134
	Practice 4-10 Breaking Objects	136
	Chapter Review	139
	Chapter Review Answers	140
Chapter 5	Layers and Inquiry Commands	141
5.1	Layers Concept in AutoCAD	141
5.2	Creating and Setting Layer Properties	143
5.2.1	How to Create a New Layer	143
5.2.2	How to Set a Color for a Layer	144
5.2.3	How to Set the Linetype for Layers	145
5.2.4	How to Set a Lineweight for Layers	146
5.2.5	How to Set the Current Layer	147
	Practice 5-1 Creating and Setting Layer Properties	147
5.3	Layer Controls	148
5.3.1	Controlling Layer Visibility, Locking, and Plotting	148
5.3.2	Deleting and Renaming Layers	151
5.3.3	How to Make an Object's Layer the Current Layer	152
5.3.4	How to Undo Only Layer Actions	152
5.3.5	Moving Objects from One Layer to Another	153
5.4	While You Are at the Layer Properties Manager	154
	Practice 5-2 Layer Controls	155
5.5	Changing an Object's Layer, Quick Properties, and Properties	156
5.5.1	Reading Instantaneous Information About an Object	156

5.5.2	How to Move an Object from a Layer to Another Layer	157
5.5.3	What is Quick Properties?	157
5.5.4	What is Properties?	158
	Practice 5-3 Changing Object's Layer, Quick Properties, and Properties	160
5.6	Inquiry Commands – Introduction	160
5.7	Measuring Distance	161
5.8	Inquiring Radius	162
5.9	Measuring Angle	163
5.10	Measuring Area	164
5.10.1	How to Calculate Simple Area	164
5.10.2	How to Calculate Complex Area	165
	Practice 5-4 Inquiry Commands	166
	Practice 5-5 Inquiry Commands	167
	Chapter Review	169
	Chapter Review Answers	170
Chapter 6	Blocks & Hatch	171
6.1	Why Do We Need Blocks?	171
6.2	How to Create a Block	172
6.3	How to Use (Insert) Blocks	174
6.3.1	Block Insertion Point OSNAP	176
	Practice 6-1 Creating and Inserting Blocks	178
6.4	Exploding Blocks and Converting Them to Files	179
6.4.1	Exploding Blocks	179
6.4.2	Converting Blocks to Files	179
	Practice 6-2 Exploding, Converting	181
6.5	Hatching in AutoCAD	181
6.6	Hatch Command: First Step	181
6.7	Controlling Hatch Properties	182
	Practice 6-3 Inputting Hatch and Controlling Hatch Properties	185
6.8	Specifying Hatch Origin	186
6.9	Controlling Hatch Options	187
6.9.1	How to Create Associative Hatching	188
6.9.2	How to Make Your Hatch Annotative	188
6.9.3	Using Match Properties to Create Identical Hatches	188
6.9.4	Hatching an Open Area	189
6.9.5	Creating Separate Hatches in the Same Command	190
6.9.6	Island Detection	191
6.9.7	Set Hatch Draw Order	192
	Practice 6-4 Hatch Origin and Options	193

6.10	Hatch Boundary	194
6.11	Editing Hatch	196
	Practice 6-5 Hatch Boundary and Hatch Editing	198
	Chapter Review	201
	Chapter Review Answers	201
Chapter 7	Writing Text	203
7.1	Writing Text Using Single Line Text	203
	Practice 7-1 Creating Text Style and Single Line Text	204
7.2	Writing Text Using Multiline Text	206
7.2.1	Style Panel	208
7.2.2	Formatting Panel	208
7.2.3	Paragraph Panel	209
7.2.4	Insert Panel	211
7.2.5	Spell Check Panel	213
7.2.6	Tools Panel	214
7.2.7	Options Panel	215
7.2.8	Close Panel	215
7.2.9	While You Are in the Text Editor	216
	Practice 7-2 Writing Using Multiline Text	217
7.3	Text Editing	219
7.3.1	Double-Click Text	219
7.3.2	Quick Properties and Properties	220
7.3.3	Editing Using Grips	221
7.4	Spelling Check and Find and Replace	222
	Practice 7-3 Editing Text	224
	Chapter Review	226
	Chapter Review Answers	226
Chapter 8	Dimensions	227
8.1	What is Dimensioning in AutoCAD?	227
8.2	Dimension Types	228
8.3	How to Insert a Linear Dimension	231
8.4	How to Insert an Aligned Dimension	232
8.5	How to Insert an Angular Dimension	233
	Practice 8-1 Inserting Linear, Aligned, and Angular Dimensions	234
8.6	How to Insert an Arc-Length Dimension	235
8.7	How to Insert a Radius Dimension	237
8.8	How to Insert a Diameter Dimension	238
	Practice 8-2 Inserting Arc Length, Radius, and Diameter Dimension	239
8.9	How to Insert a Jogged Dimension	240

8.10	How to Insert an Ordinate Dimension	241
	Practice 8-3 Inserting Dimensions	242
8.11	Inserting a Series of Dimensions Using the Continue Command	243
8.12	Inserting a Series of Dimensions Using the Baseline Command	245
	Practice 8-4 Continue Command	246
	Practice 8-5 Baseline Command	246
8.13	Using the Quick Dimension Command	247
8.14	Using the Dimension Command	250
8.15	Dimension Special Layer	251
8.16	Editing a Dimension Block Using Grips	251
8.17	Editing a Dimension Block Using the Right-Click Menu	255
8.18	Editing a Dimension Block Using Quick Properties and Properties	256
	Practice 8-6 Quick Dimension and Editing	257
	Chapter Review	261
	Chapter Review Answers	262
Chapter 9	Plotting	263
9.1	What is Model Space and What is Paper Space?	263
9.2	Introduction to Layouts	264
9.3	Steps to Create a New Layout from Scratch	264
9.4	Steps to Create a New Layout Using a Template	268
9.5	Creating Layouts Using Copying	269
	Practice 9-1 Creating New Layouts	272
9.6	Creating Viewports	273
	9.6.1 Adding Single Rectangular Viewports	273
	9.6.2 Adding Multiple Rectangular Viewports	274
	9.6.3 Adding Polygonal Viewports	275
	9.6.4 Creating Viewports by Converting Existing Objects	276
	9.6.5 Creating Viewports by Clipping Existing Viewports	277
	9.6.6 Dealing with Viewports after Creation	278
9.7	Scaling and Maximizing Viewports	279
9.8	Freezing Layers in Viewports	282
9.9	Layer Override in Viewports	283
	Practice 9-2 Creating and Controlling Viewports	284
9.10	Plot Command	285
	Chapter Review	288
	Chapter Review Answers	288
Chapter 10	Projects	289
10.1	How to Prepare Your Drawing for a New Project	289
10.2	Architectural Project (Imperial)	292
10.3	Architectural Project (Metric)	300

10.4	Mechanical Project – I (Metric)	308
10.5	Mechanical Project – I (Imperial)	313
10.6	Mechanical Project – II (Metric)	317
10.7	Mechanical Project – II (Imperial)	318
Chapter 11	More on 2D Objects	321
11.1	Introduction	321
11.2	Drawing Lines and Arcs Using the Polyline Command – Revision	322
11.3	Converting Polylines to Lines and Arcs, and Vice Versa	323
11.3.1	Converting Polylines to Lines and Arcs	324
11.3.2	Joining Lines and Arcs to Form a Polyline	324
	Practice 11-1 Drawing Polylines and Converting	325
11.4	Drawing Using the Rectangle Command	326
11.4.1	Chamfer Option	326
11.4.2	Elevation Option	327
11.4.3	Fillet Option	327
11.4.4	Thickness Option	327
11.4.5	Width Option	327
11.4.6	Area Option	328
11.4.7	Dimensions Option	328
11.4.8	Rotation Option	328
11.5	Drawing Using the Polygon Command	329
11.5.1	Using an Imaginary Circle	329
11.5.2	Using the Length and Angle of One of the Edges	330
	Practice 11-2 Drawing Rectangles and Polygons	331
11.6	Drawing Using the Donut Command	332
11.7	Drawing Using the Revision Cloud Command	332
	Practice 11-3 Drawing a Donut and a Revision Cloud	337
11.8	Using the Edit Polyline Command	338
11.8.1	Open and Close Options	338
11.8.2	Join Option	338
11.8.3	Width Option	339
11.8.4	Edit Vertex Option	339
11.8.5	Fit, Spline, and Decurve Options	339
11.8.6	Ltype Gen Option	340
11.8.7	Reverse Option	341
11.8.8	Multiple Option	341
	Practice 11-4 Polyline Edit Command	343
11.9	Using Construction Lines and Rays	344
11.9.1	Using Construction Lines	345
11.9.2	Using Rays	346
	Practice 11-5 Using Construction Lines and Rays	347

11.10	Using Point Style and Point Command	348
11.10.1	Using Point Style Command	348
11.10.2	Using Point Command	349
11.11	Using Divide and Measure Commands	350
11.11.1	Using the Divide Command	350
11.11.2	Using the Measure Command	350
11.11.3	Using Divide and Measure Commands with Block Option	351
	Practice 11-6 Using Point Style, Point, Divide, and Measure	352
11.12	Using the Spline Command	353
11.12.1	Using the Fit Points Method	353
11.12.2	Using the Control Vertices Method	354
11.12.3	Editing a Spline	355
	Practice 11-7 Using the Spline Command	356
11.13	Using the Ellipse Command	358
11.13.1	Drawing an Ellipse Using the Center Option	358
11.13.2	Drawing an Ellipse Using Axis Points	359
11.13.3	Drawing an Elliptical Arc	360
	Practice 11-8 Using the Ellipse Command	360
11.14	Using the Boundary Command	361
	Practice 11-9 Using Boundary Command	362
11.15	Using the Region Command	363
11.15.1	Performing Boolean Operations on Regions	364
	Practice 11-10 Using Region Command	365
	Chapter Review	367
	Chapter Review Answers	368
Chapter 12	Advanced Practices - Part I	369
12.1	Offset Command – Advanced Options	369
12.1.1	Erase Source Option	370
12.1.2	Layer Option	370
12.1.3	System Variable: Offsetgaptype	370
12.2	Trim and Extend – Edge Option	371
	Practice 12-1 Using Advanced Options in Offset, Trim, and Extend	372
12.3	Using Match Properties	373
12.4	Copy/Paste Objects and Match Properties across Files	374
12.4.1	Copying Objects	375
12.4.2	Pasting Objects	375
12.4.3	Using the Drag-and-Drop Method	376
12.4.4	Match Properties Across Files	376
	Practice 12-2 Using Match Properties, Copy/Paste Across Files	376

12.5	Sharing Excel and Word Content in AutoCAD	377
12.5.1	Sharing Data Coming from MS Word	378
12.5.2	Sharing Data Coming from MS Excel	380
12.5.3	Pasting a Linked Table from Excel	380
	Practice 12-3 Sharing Excel and Word Content in AutoCAD	384
12.6	Hyperlinking AutoCAD Objects	385
	Practice 12-4 Hyperlinking AutoCAD Objects	386
12.7	Purging Items	386
	Practice 12-5 Purging Items	388
12.8	Using Views & Viewports	388
12.8.1	Creating Views	388
12.8.2	Using Views in Viewports	391
12.8.3	Creating a Named Viewport Arrangement – Method (I)	392
12.8.4	Creating a Named Viewport Arrangement – Method (II)	394
	Practice 12-6 Using Views and Viewports	396
	Chapter Review	399
	Chapter Review Answers	400
Chapter 13	Advanced Practices - Part II	401
13.1	Using Autodesk Content Explorer	401
	Practice 13-1 Using Autodesk Content Explorer	406
13.2	Using Quick Select	407
	Practice 13-2 Using Quick Select	409
13.3	Using Select Similar and Add Selected	409
13.3.1	Select Similar Command	410
13.3.2	Add Selected Command	411
13.4	What is Object Visibility in AutoCAD?	411
	Practice 13-3 Using Select Similar and Add Selected	412
13.5	Advanced Layer Commands	413
13.5.1	Using Isolate and Unisolate Commands	413
13.5.2	Using Freeze and Off Commands	414
13.5.3	Using the Turn All Layers On and Thaw All Layers Commands	414
13.5.4	Using the Lock and Unlock Commands	414
13.5.5	Using the Change to Current Layer Command	414
13.5.6	Using Copy Objects to New Layer Command	415
13.5.7	Using the Layer Walk Command	415
13.5.8	Using the isolate to Current Viewport Command	416
13.5.9	Using the Merge Command	416
13.5.10	Using the Delete Command	416
13.6	Layer's Transparency	416
	Practice 13-4 Using Advanced Layer Commands	418

13.7 Using Fields in AutoCAD	419
Practice 13-5 Using Fields in AutoCAD	423
13.8 Using Partially Opened Files	424
13.8.1 How to Open a File Partially	425
13.8.2 Using Partial Load	426
Practice 13-6 Using Partially Opened Files	427
Chapter Review	429
Chapter Review Answers	430
Chapter 14 Using Block Tools and Block Editing	431
14.1 Automatic Scaling Feature	431
14.2 Design Center	433
Practice 14-1 Using Design Center	436
14.3 Tool Palettes	437
14.3.1 How to Create a Tool Palette from Scratch	438
14.3.2 How to Fill the New Palette with Content	438
14.3.3 How to Create a Palette from Design Center Blocks	439
14.3.4 How to Customize Tools Properties	439
14.4 Hatch and Tool Palette	441
Practice 14-2 Using Tool Palettes	442
14.5 Customizing Tool Palettes	443
14.5.1 Allow Docking	443
14.5.2 Transparency	444
14.5.3 View Options	445
14.5.4 Add Text and Add Separators	446
14.5.5 New / Delete / Rename Palette	447
14.5.6 Customize Palettes	448
Practice 14-3 Customizing Tool Palettes	450
14.6 Editing Blocks	450
Practice 14-4 Editing Blocks	452
Chapter Review	454
Chapter Review Answers	454
Chapter 15 Creating Text & Table Styles and Formulas in Tables	455
15.1 Steps to Create Text and Tables	455
15.2 How to Create a Text Style	456
Practice 15-1 Creating Text Style and Single Line Text	459
15.3 Creating Table Style	460
15.3.1 General Tab	462
15.3.2 Text Tab	464
15.3.3 Borders Tab	465

15.4	Inserting a Table in the Drawing	465
15.4.1	Specify Insertion Point Option	466
15.4.2	Specify Window Option	467
	Practice 15-2 Creating Table Style and Inserting tables in the Current Drawing	468
15.5	Using Formulas in Table Cells	469
15.6	Using Table Cell Functions	470
15.6.1	Using the Rows Panel	470
15.6.2	Using the Columns Panel	471
15.6.3	Using the Merge Panel	471
15.6.4	Using the Cell Styles Panel	472
15.6.5	Using the Cell Format Panel	474
15.6.6	Using the Insert Panel	476
15.6.7	Using the Data Panel	476
	Practice 15-3 Formulas and Table Cell Functions	477
	Chapter Review	480
	Chapter Review Answers	480
Chapter 16	Dimension & Multileader Styles	481
16.1	What is Dimensioning in AutoCAD?	481
16.2	How to Create a New Dimension Style	482
16.3	Dimension Style: Lines Tab	484
16.4	Dimension Style: Symbols and Arrows Tab	487
16.5	Dimension Style: Text Tab	489
16.6	Dimension Style: Fit Tab	495
16.7	Dimension Style: Primary Units Tab	496
16.8	Dimension Style: Alternate Units Tab	498
16.9	Dimension Style: Tolerances Tab	499
16.10	Creating a Dimension Sub Style	502
	Practice 16-1 Creating Dimension Style	503
16.11	More Dimension Functions	505
16.11.1	Dimension Break	505
16.11.2	Dimension Adjust Space	506
16.11.3	Dimension Jog Line	508
16.11.4	Dimension Oblique	509
16.11.5	Dimension Text Angle	510
16.11.6	Dimension Justify	511
16.11.7	Dimension Override	511
	Practice 16-2 More Dimension Functions	512
16.12	Associative Centerlines and Center Marks	513
16.12.1	Center Mark	513
16.12.2	Centerline	514

16.12.3	Centerline and Center Mark Properties	515
	Practice 16-3 Centerlines and Center Marks	516
16.13	How to Create a Multileader Style	517
16.13.1	Leader Format Tab	519
16.13.2	Leader Structure Tab	520
16.13.3	Content Tab	521
16.14	Inserting a Multileader Dimension	523
	Practice 16-4 Creating Multileader Style and Inserting Multileaders	526
	Chapter Review	529
	Chapter Review Answers	529
Chapter 17	Plot Style, Annotative, and Exporting	531
17.1	Plot Style Tables – First Look	531
17.2	Color-Dependent Plot Style Table	531
17.3	Named Plot Style Table	536
	Practice 17-1 Color-Dependent Plot Style Table	540
	Practice 17-2 Named Plot Style Table	540
17.4	What is an Annotative Feature?	541
	Practice 17-3 Annotative Feature	545
17.5	Exporting DWG to DWF and PDF: An Introduction	547
17.6	Exporting to DWF and DWFx	547
17.7	Exporting to a PDF	550
17.8	Using the Batch Plot Command	552
17.9	Viewing DWF, DWFx, and PDF Files	554
	Practice 17-4 Creating and Viewing a DWF File	555
	Chapter Review	557
	Chapter Review Answers	557
Chapter 18	How to Create a Template File and Interface Customization	559
18.1	What is a Template File and How Can We Create It?	559
18.2	Editing a Template File	562
	Practice 18-1 Creating and Editing a Template File	562
18.3	Customizing the Interface – Introduction	563
18.4	How to Create a New Panel	564
18.5	How to Create a New Tab	569
18.6	How to Create a Quick Access Toolbar	569
18.7	How to Create a New Workspace	570
	Practice 18-2 Customizing an Interface	571
18.8	How to Create Your Own Command	573
	Practice 18-3 Creating New Commands	575
	Chapter Review	577
	Chapter Review Answers	578

Chapter 19 Parametric Constraints	579
19.1 What are Parametric Constraints?	579
19.2 Using Geometric Constraints	580
19.2.1 Using Coincident Constraints	580
19.2.2 Using Collinear Constraints	582
19.2.3 Using Concentric Constraints	583
19.2.4 Using Fix Constraints	583
19.2.5 Using Parallel Constraints	584
19.2.6 Using Perpendicular Constraints	585
19.2.7 Using Horizontal Constraints	585
19.2.8 Using Vertical Constraints	586
19.2.9 Using Tangent Constraints	587
19.2.10 Using Smooth Constraints	587
19.2.11 Using Symmetric Constraints	588
19.2.12 Using Equal Constraints	589
19.3 Geometric Constraints Settings	590
19.4 What is Infer Constraint?	590
19.5 What is Auto Constrain?	592
19.6 Constraint Bar & Showing and Hiding	594
19.6.1 Constraint Bar	594
19.6.2 Showing and Hiding	595
19.7 Relaxing and Over-Constraining Objects	596
19.7.1 Relaxing Constraints	596
19.7.2 Over-Constraining an Object	596
Practice 19-1 Applying Geometric Constraint	597
19.8 Using Dimensional Constraints	598
19.8.1 Using Linear, Horizontal, and Vertical Constraints	598
19.8.2 Using Aligned Constraints	599
19.8.3 Using Radial and Diameter Constraints	601
19.8.4 Using Angular Constraints	601
19.8.5 Using the Convert Command	602
19.9 Controlling Dimensional Constraint	603
19.9.1 Constraint Settings Dialog Box	603
19.9.2 Deleting Constraints	605
19.9.3 Showing and Hiding Dimensional Constraint	605
19.10 Using the Parameters Manager	606
19.11 What is Annotational Constraint Mode?	608
19.11.1 Annotational Constraint Mode	609
19.11.2 Converting Dimensional Constraints to Annotational	610
19.12 Using Dimensional Grips	610
Practice 19-2 Applying Dimensional Constraint	611
Chapter Review	614
Chapter Review Answers	614

Chapter 20	Dynamic Blocks	615
20.1	Introduction to Dynamic Blocks	615
20.2	Methods to Create a Dynamic Block	616
20.2.1	Using the Block Definition Dialog Box	616
20.2.2	Double-Clicking an Existing Block	617
20.2.3	Block Editor Command	617
20.3	Inside the Block Editor	618
20.4	What are Parameters and Actions?	619
20.5	Controlling Parameter Properties	623
20.6	Controlling the Visibility Parameter	625
20.7	Using Lookup Parameter and Action	627
20.8	Final Steps	629
	Practice 20-1 Dynamic Blocks – Creating a Chest of Drawers	630
	Practice 20-2 Dynamic Blocks – Door Control	631
	Practice 20-3 Dynamic Blocks – Wide Flange Beams	633
20.9	Using Constraints in Dynamic Blocks	634
20.9.1	Block Table Button	634
20.9.2	Construction Button	638
20.9.3	Constraint Status Button	638
	Practice 20-4 Dynamic Blocks Using Constraints – Wide Flange Beams	639
	Practice 20-5 Dynamic Blocks Using constraints – Creating Windows	639
	Chapter Review	642
	Chapter Review Answers	643
Chapter 21	Block Attributes	645
21.1	What are Block Attributes?	645
21.2	How to Define Attributes	646
21.2.1	Attribute Part	647
21.2.2	Mode Part	647
21.2.3	Text Settings Part	647
21.2.4	Insertion Point Part	648
21.3	Inserting Blocks with Attributes	648
21.4	How to Control Attribute Visibility	649
	Practice 21-1 Defining and Inserting Blocks with Attributes	649
21.5	How to Edit Individual Attribute Values	650
21.6	How to Edit Attribute Values Globally	652
	Practice 21-2 Editing Attribute Values Individually and Globally	654
21.7	How to Redefine and Sync Attribute Definitions	655
	Practice 21-3 Redefining Attribute Definitions	657

21.8	How to Extract Attributes from Files	658
	Practice 21-4 Extracting Attributes	667
	Chapter Review	669
	Chapter Review Answers	670
Chapter 22	External Referencing (XREF)	671
22.1	Introduction to External References	671
22.2	Inserting External References into Different File Formats	672
	22.2.1 Attaching a DWG File	673
	22.2.2 Attaching an Image File	675
	22.2.3 Attaching a DWF File	675
	22.2.4 Attaching a DGN File	676
	22.2.5 Attaching a PDF File	677
22.3	External Reference Palette Contents	678
22.4	Using the Attach Command	679
22.5	Reference Files and Layers	680
22.6	Controlling the Fading of a Reference File	681
	Practice 22-1 Attaching and Controlling Reference Files	682
22.7	Editing an External Reference DWG File	683
	22.7.1 Using the Edit Reference Command	684
	22.7.2 Using the Open Command	685
22.8	External Reference File-Related Functions	686
	22.8.1 Unload Command	687
	22.8.2 Reload Command	687
	22.8.3 Detach Command	687
	22.8.4 Bind Command	687
	22.8.5 Xref Type	688
	22.8.6 Path	688
	Practice 22-2 External Reference Editing	688
22.9	Clipping an External Reference File	689
22.10	Clicking and Right-Clicking a Reference File	691
	22.10.1 Clicking and Right-Clicking a DWG File	692
	22.10.2 Clicking and Right-Clicking an Image File	692
	22.10.3 Clicking and Right-Clicking a DWF File	693
	Practice 22-3 External Reference File Clipping and Controlling	694
22.11	Using the eTransmit Command with External Reference Files	695
	Practice 22-4 Using the eTransmit Command	699
	Chapter Review	701
	Chapter Review Answers	702

Chapter 23	Sheet Sets	703
23.1	Introduction to Sheet Sets	703
23.2	Dealing with the Sheet Set Manager Palette	704
23.2.1	How to Open and Close an Existing Sheet Set	704
23.2.2	How to Deal with the Sheet Set Manager Palette	706
23.3	Sheet Set File Setup	708
	Practice 23-1 Opening, Manipulating, and Closing Sheet Sets	709
23.4	Sheet Set Using an Example	710
23.4.1	Adding a Sheet into a Subset	714
23.4.2	Sheet Control	715
	Practice 23-2 Creating a Sheet Set Using a Sheet Set Example	716
23.5	Adding and Scaling Model Views	717
	Practice 23-3 Adding and Scaling Model Views	720
23.6	Sheet Set Using Existing Drawings	721
	Practice 23-4 Creating a Sheet Set Using Existing Drawings	726
23.7	Publishing Sheet Sets	727
23.8	Using eTransmit and Archive Commands	729
23.8.1	Using the eTransmit Command	729
23.8.2	Using the Archive Command	730
	Practice 23-5 Publishing and eTransmitting a Sheet Set	730
	Chapter Review	733
	Chapter Review Answers	733
Chapter 24:	CAD Standards & Advanced Layers	735
24.1	Why Do We Need CAD Standards?	735
24.2	How to Create a CAD Standard File	736
24.3	How to Link DWS to DWG and Then Make the Check	737
24.3.1	Configuring (Linking) DWS to DWG	737
24.3.2	Checking a DWG File	740
	Practice 24-1 Using CAD Standards Commands	742
24.4	Using the Layer Translator	743
	Practice 24-2 Using the Layer Translator	745
24.5	Dealing with the Layer Properties Manager	746
24.6	Creating a Property Filter	748
24.7	Creating a Group Filter	750
24.8	Things you Can Do with Filters	750
24.8.1	Property Filter Menu	750
24.8.2	Group Filter Menu	751
	Practice 24-3 Layer Advanced Features and Filters	752
24.9	Creating Layer States	752
	Practice 24-4 Using Layer States	755

24.10	Settings Dialog Box	756
24.10.1	New Layer Notification	757
24.10.2	Isolate Layer Settings	758
24.10.3	Dialog Settings	758
	Practice 24-5 Using Settings Dialog Box	759
	Chapter Review	762
	Chapter Review Answers	762
Chapter 25:	Importing PDF Files, and Design Views	763
25.1	Introduction	763
25.2	Importing a PDF File	763
25.2.1	Importing a PDF File	764
25.2.2	Importing from PDF Underlay	766
	Practice 25-1 Importing PDF File	767
25.3	Creating Design Views	769
	Practice 25-2 Creating Design Views	773
	Chapter Review	775
	Chapter Review Answers	775
Index		777
