Preface — V

List of contributing authors — XI

F. Fischer, S. Kreling, D. Blass, R. Staehr, S. Bluemel, P. Jaeschke, K. Dilger

1 Laser material machining of CFRP – an option for damage-free and flexible CFRP processing? — 1

- 1.1 Introduction — 1
- 1.2 State of the art of machining of CFRP — 2
 - 1.2.1 Cutting CFRP — 2
 - 1.2.2 Surface pre-treatment of CFRP — 3
 - 1.2.3 Shape cutting of CFRP — 5
- 1.3 Laser material interaction — 7
- 1.4 Laser material machining of CFRP — 8
 - 1.4.1 Laser cutting of CFRP — 8
 - 1.4.2 Laser surface pre-treatment of CFRP — 18
 - 1.4.3 Laser ablation of CFRP — 21
- 1.5 Conclusion — 25

W. Cong, F. Ning

2 Rotary ultrasonic machining of CFRP composites — 31

- 2.1 Introduction — 31
 - 2.1.1 CFRP composites — 31
 - 2.1.2 Rotary ultrasonic machining — 33
 - 2.1.3 Purpose of this chapter — 33
- 2.2 Rotary ultrasonic machining system set-up — 34
 - 2.2.1 Ultrasonic power supply — 34
 - 2.2.2 Ultrasonic transducer — 34
 - 2.2.3 Ultrasonic amplitude transformer (horn) and tool holder — 36
 - 2.2.4 Cutting tool — 38
- 2.3 Input variables and output variables in RUM — 38
 - 2.3.1 Machining variables — 38
 - 2.3.2 Cutting tool variables and cooling variables — 38
 - 2.3.3 Workpiece properties — 39
 - 2.3.4 Output variables — 40
- 2.4 Effects of input variables on output variables — 40
 - 2.4.1 Effects on cutting force — 41
 - 2.4.2 Effects on torque — 50
 - 2.4.3 Effects on cutting temperature — 52

2.4.4	Effects on edge quality —	57
2.4.5	Effects on surface roughness —	59
2.4.6	Effects on burning of machined surface —	61
2.4.7	Effects on tool wear —	62
2.4.8	Effects on MRR —	65
2.4.9	Effects on power consumption —	66
2.4.10	Effects on feasible regions —	73
2.5	Summary —	77

M. Slamani, J.-F. Chatelain

3	High-speed robotic trimming of CFRP —	83
3.1	Introduction —	83
3.2	Machinability of CFRP —	85
3.2.1	Evaluation of the cutting force —	85
3.2.2	Assessment of the machinability of CFRP under high-speed robotic trimming —	87
3.2.3	Cutting forces for robotic trimming experiments —	90
3.2.4	Quality of robotic trimmed specimens —	93
3.2.5	Surface quality —	95
3.3	Conclusion —	99

H. Miguélez, N. Feito, C. Santiuste, J. Díaz-Álvarez, M. Rodríguez-Millán, X. Soldani

4	Numerical modeling of LFRP machining —	103
4.1	Introduction —	103
4.2	Orthogonal cutting —	105
4.2.1	2D modeling —	105
4.2.2	3D modeling —	110
4.2.3	Thermal effects —	117
4.3	Drilling —	121
4.3.1	Comparison between simplified and complete drilling models —	122
4.3.2	Thermal model of drilling —	126
4.4	Conclusions —	134

J. Babu, J. Philip, T. Zacharia, J. Paulo Davim

5	Delamination in composite materials: measurement, assessment and prediction —	139
5.1	Introduction —	139
5.2	Mechanisms of delamination —	140
5.2.1	Peel-up delamination —	140
5.2.2	Push-out delamination —	140

5.3	Measurement of delamination —	141
5.3.1	Visual methods —	141
5.3.2	Image processing —	141
5.3.3	Acoustic emission —	142
5.3.4	Scanning acoustic microscopy (SAM) —	143
5.3.5	Ultrasonic C-scan —	143
5.3.6	Radiography —	144
5.3.7	X-ray computerized tomography —	145
5.3.8	Shadow moiré interferometry —	145
5.4	Assessment of delamination —	147
5.4.1	Delamination factor/conventional delamination factor —	147
5.4.2	Delamination size —	149
5.4.3	Two-dimensional delamination factor (F_d) —	149
5.4.4	Damage ratio —	150
5.4.5	Delamination factor —	151
5.4.6	Adjusted delamination factor —	151
5.4.7	Equivalent delamination factor —	152
5.4.8	Refined delamination factor (F_{DR}) —	154
5.4.9	Shape circularity (f) —	154
5.4.10	Minimum delamination factor —	155
5.5	Delamination in milling —	156
5.6	Numerical prediction of delamination —	157
5.6.1	Regression analysis —	157
5.6.2	Artificial neural network (ANN) —	158
5.6.3	FE simulation methods —	159
5.7	Summary —	160

K. Palanikumar, T. Srinivasan, K. Rajagopal, J. Paulo Davim

6	Drilling of high impact polystyrene composites materials —	163
6.1	Introduction —	163
6.2	Materials and Manufacturing —	165
6.3	Experimental work —	167
6.4	Response surface methodology-based modeling of process parameters —	169
6.5	Results and Discussion —	171
6.6	Conclusions —	176

R. Pramod, S. Basavarajappa, J. Paulo Davim

7	A review on investigations in drilling of fiber reinforced plastics —	179
7.1	Introduction —	179
7.1.1	Delamination and delamination mechanism —	180
7.1.2	Fabrication of polymer matrix composites —	181

7.2	Drilling process —	181
7.2.1	Delamination assessment —	184
7.2.2	Effect of various machining parameters on delamination —	186
7.3	Role of digital image processing in delamination assessment —	190
7.4	Summary —	191

Index —	195
