Foreword	p.	9
----------	----	---

## Section one

0. Introduction: From the Age of “Posts” to the Knowledge Society		
0.1 – Beyond the age of “posts”	p.	13
0.2 – Post-industrial and post-modern	”	15
0.3 – The knowledge economy and the knowledge society	”	19
0.3.1 – Vannevar Bush and his consequences	”	22
0.3.2 – A new metamorphosis of “capital”	”	26
0.4 – The “knowledge” of the society of knowledge	”	28
1. In the Beginnings there was Lisbon		
1.1 – Old Europe needs to wake up	p.	33
1.1.1 – The roots of the “Lisbon Strategy”	”	33
1.1.2 – The reasoning behind the worries	”	35
1.2 – The development of the Lisbon Strategy	”	37
1.2.1 – The close union of economics and research	”	37
1.2.2 – Human capital – beyond the economy	”	40
1.2.3 – The economic presuppositions of innovation	”	44
1.3 – Beyond GDP: the environmental turn	”	49
1.3.1 – The unheroic history of GDP	”	50
1.3.2 – Europe towards sustainable development	”	54
1.4 – Keep on trying once again, old Europe!	”	58
2. Society, Democracy and Trust in Science		
2.1 – Science, democracy and society in the history of modern culture	p.	63
2.2 – Public opinion and science	”	69
2.3 – Divulgence and communication of science	”	77
2.3.1 – The many faces of a relationship	”	78
2.3.2 – The “construction“ of the public	”	80
2.3.3 – The “construction” of the object	”	85
2.4 – The interaction between the public and science	”	87
2.4.1 – “Hybrid forums”	”	87

2.4.2 – “Civic epistemologies”	p.	89
2.5 – The value of democracy in science	”	91

## Section two

3. Historical, Philosophical and Sociological Models of the Interaction between Science and Society		
3.1 – The twentieth-century philosophical Received-View of science	”	97
3.2 – Philosophy and sociology of science I: a division of labour	”	103
3.3 – Philosophy and sociology of science II: the historicist turn	”	106
3.4 – Post-Mertonian sociology of science	”	109
3.5 – The emergence of “Science and Technological Studies”	”	113
3.6 – STS and science policy	”	117
4. From the Descriptive to the Normative: a Multidisciplinary Approach for Descriptively-Informed Science Policy		
4.1 – Multidisciplinary versus interdisciplinary integration of STS’s methodological variation	”	131
4.2 – Modelling techno-science complexity for science policy	”	136
4.3 – Beyond theory and observation: the Modeling Approach to Science (MAS)	”	140
4.4 – Towards a descriptively-informed science policy	”	147
4.5 – Further articulating MAS	”	149
4.5.1 – Levels of analysis of theory-formation	”	152
4.5.2 – MAS and “methodological tolerance”	”	158
4.6 – From descriptive to normative STS: heuristic appraisal	”	163
5. Implementing New Strategies: Towards the Recommendations		
5.1 – Frontier research: beyond economic growth	”	167
5.1.1 – The linear model of techno-scientific innovation and economic growth	”	168
5.1.2 – Alternative models of techno-scientific innovation and how they fail to meet general society needs	”	172
5.2 – Tacit knowledge and expertise	”	180
5.2.1 – The representation of tacit knowledge	”	181
5.2.2 – The possible explications of tacit knowledge	”	183

5.2.3 – Society, tacit knowledge and knowledge-based View	p.	187
5.2.4 – Models of expertise	”	190
5.2.5 – Expertise, tacit knowledge, complexity of knowledge	”	195
5.3 – The importance of creativity	”	199
5.3.1 – Creativity and the creative person	”	199
5.3.2 – Family and school	”	206
5.3.3 – Companies	”	210
5.3.4 – Widespread creativity	”	216
5.4 – The role of the university in the society of knowledge	”	219
5.4.1 – University potential and problems	”	220
5.4.2 – The European Paradox	”	223
5.4.3 – The contradictions of research	”	227
5.4.4 – A diverse view of contemporary research	”	229
5.4.5 – A comparison with the Humboldt model	”	231
5.4.6 – What is the mission of today’s universities?	”	235
5.5 – Not only specialisation: towards a more integrated vision of culture	”	237
5.5.1 – A more comprehensive vision of knowledge	”	237
5.5.2 – Overcoming hyper-specialization	”	240
5.5.3 – Towards superseding old dualisms	”	243
5.6 – Towards an industrial or a humanistic scenario?	”	247
6. Conclusion: The Recommendations to the European Commission	”	255
References	”	269
Acronyms and abbreviations	”	310
