Preface — V

Part I: Convex analysis

- 1 Convex sets and their properties — 3
- 2 The convex hull of a set. The interior of convex sets — 7
- 3 The affine hull of sets. The relative interior of convex sets — 13
- 4 Separation theorems for convex sets — 21
- 5 Convex functions — 29
- 6 Closedness, boundedness, continuity, and Lipschitz property
of convex functions — 37
- 7 Conjugate functions — 45
- 8 Support functions — 51
- 9 Differentiability of convex functions and the subdifferential — 59
- 10 Convex cones — 69
- 11 A little more about convex cones in infinite-dimensional spaces — 75
- 12 A problem of linear programming — 79
- 13 More about convex sets and convex hulls — 83

Part II: Set-valued analysis

- 14 Introduction to the theory of topological and metric spaces — 91
- 15 The Hausdorff metric and the distance between sets — 95

16	Some fine properties of the Hausdorff metric — 103
16.1	Hausdorff distance between sets satisfying the Bolzano–Weierstrass condition — 103
16.2	Hausdorff distance between subsets of normed spaces — 105
17	Set-valued maps. Upper semicontinuous and lower semicontinuous set-valued maps — 109
18	A base of topology of the space $\mathcal{H}_c(X)$ — 121
19	Measurable set-valued maps. Measurable selections and measurable choice theorems — 123
20	The superposition set-valued operator — 129
21	The Michael theorem and continuous selections. Lipschitz selections. Single-valued approximations — 135
22	Special selections of set-valued maps — 141
23	Differential inclusions — 149
24	Fixed points and coincidences of maps in metric spaces — 155
24.1	The case of single-valued maps — 155
24.2	The case of set-valued maps — 160
25	Stability of coincidence points and properties of covering maps — 165
26	Topological degree and fixed points of set-valued maps in Banach spaces — 171
26.1	Topological degree of single-valued maps — 171
26.2	Topological degree of set-valued maps — 180
27	Existence results for differential inclusions via the fixed point method — 187
Notation — 191	
Bibliography — 195	
Index — 199
