Introduction . . . . .	1
<b>10 Tori in Hamiltonian and Melikian algebras . . . . .</b>	<b>3</b>
10.1 Determining absolute toral ranks of Hamiltonian algebras . . . . .	3
10.2 More on $H(2; (1, 2))^{(2)}_{[p]}$ . . . . .	13
10.3 2-dimensional tori in $H(2; \underline{1}; \Phi(\tau))^{(1)}$ . . . . .	39
10.4 Semisimple elements in $H(2; \underline{1}; \Phi(1))_{[p]}$ . . . . .	45
10.5 Melikian algebras . . . . .	70
10.6 Semisimple Lie algebras of absolute toral rank 1 and 2 . . . . .	106
10.7 Weights . . . . .	113
<b>11 1-sections . . . . .</b>	<b>121</b>
11.1 Lie algebras of absolute toral rank 1 . . . . .	121
11.2 1-sections . . . . .	127
11.3 Representations of dimension $< p^2$ . . . . .	131
11.4 More on $H(2; \underline{1})^{(2)}$ . . . . .	138
11.5 Low dimensional representations of $H(2; \underline{1})^{(2)}$ . . . . .	150
<b>12 Sandwich elements and rigid tori . . . . .</b>	<b>162</b>
12.1 Deriving identities . . . . .	162
12.2 Sandwich elements . . . . .	170
12.3 Rigid roots . . . . .	182
12.4 Rigid tori . . . . .	192
12.5 Trigonalizability . . . . .	210
<b>13 Towards graded algebras . . . . .</b>	<b>242</b>
13.1 The pentagon . . . . .	242
13.2 An upper bound . . . . .	247
13.3 Filtrations . . . . .	253
13.4 More on Hamiltonian roots . . . . .	278
13.5 Switching tori . . . . .	285

13.6	Good triples . . . . .	293
13.7	On the existence of good tori and good triples . . . . .	303
<b>14</b>	<b>The toral rank 2 case . . . . .</b>	<b>313</b>
14.1	No root is exceptional . . . . .	313
14.2	$S$ is not of Cartan type . . . . .	326
14.3	Graded counterexamples . . . . .	354
	Notation . . . . .	379
	Bibliography . . . . .	381
	Index . . . . .	383
