

# Contents

## Acknowledgments — IX

### 1 Introduction — 1

- 1.1 The traditional diffusion model — 2
- 1.2 Fractional diffusion — 10

### 2 Fractional Derivatives — 21

- 2.1 The Grünwald formula — 21
- 2.2 More fractional derivatives — 30
- 2.3 The Caputo derivative — 35
- 2.4 Time-fractional diffusion — 43

### 3 Stable Limit Distributions — 51

- 3.1 Infinitely divisible laws — 51
- 3.2 Stable characteristic functions — 57
- 3.3 Semigroups — 62
- 3.4 Poisson approximation — 68
- 3.5 Shifted Poisson approximation — 71
- 3.6 Triangular arrays — 75
- 3.7 One-sided stable limits — 80
- 3.8 Two-sided stable limits — 84

### 4 Continuous Time Random Walks — 89

- 4.1 Regular variation — 89
- 4.2 Stable Central Limit Theorem — 95
- 4.3 Continuous time random walks — 101
- 4.4 Convergence in Skorokhod space — 105
- 4.5 CTRW governing equations — 108

### 5 Computations in R — 119

- 5.1 R codes for fractional diffusion — 119
- 5.2 Sample path simulations — 128

### 6 Vector Fractional Diffusion — 143

- 6.1 Vector random walks — 143
- 6.2 Vector random walks with heavy tails — 153
- 6.3 Triangular arrays of random vectors — 158
- 6.4 Stable random vectors — 165
- 6.5 Vector fractional diffusion equation — 170
