

Contents

1	Shape memory polymers — 1
1.1	Introduction — 1
1.2	Molecular mechanism of SME — 3
1.3	Hyperbranched SMPs — 5
1.4	Interpenetrating SMPs — 7
1.5	Blend SMPs — 10
1.5.1	Miscible blend SMPs — 10
1.5.2	Immiscible blend SMPs — 13
1.6	Biobased SMPs — 13
1.7	SMP nanocomposite — 19
1.7.1	Techniques for preparation of SMP nanocomposites — 20
1.7.2	Different SMP nanocomposites — 21
	References — 39
2	Classification of shape memory polymers — 47
2.1	Introduction — 47
2.2	Based on nature of structure — 47
2.2.1	Covalently cross-linked glassy SMP — 47
2.2.2	Covalently cross-linked semicrystalline SMP — 49
2.2.3	Physically cross-linked glassy SMP — 51
2.2.4	Physically cross-linked semicrystalline SMP — 54
2.3	Based on external stimulus — 55
2.3.1	Thermoresponsive SMP — 55
2.3.2	Light-responsive SMP — 56
2.3.3	pH-responsive SMP — 59
2.3.4	Solvent-responsive SMP — 60
2.3.5	Chemoresponsive SMP — 62
2.3.6	Electroresponsive SMP — 62
2.3.7	Magnetoresponsive SMP — 64
	References — 66
3	Characterization techniques for shape memory polymers — 70
3.1	Introduction — 70
3.2	Characterization techniques of SMP — 70
3.2.1	Nuclear magnetic resonance spectroscopy — 70
3.2.2	Fourier-transform infrared spectroscopy — 74
3.2.3	X-ray diffraction — 77
3.2.4	Scanning electron microscopy — 79
3.2.5	Transmission electron microscopy — 80

3.2.6	Atomic force microscopy —	82
3.2.7	Raman spectroscopy —	83
3.2.8	Differential scanning calorimetry —	85
3.2.9	Dynamic mechanical analysis —	86
3.3	Shape memory properties —	89
3.3.1	Shape fixity —	90
3.3.2	Shape recovery —	90
3.3.3	Shape recovery rate —	90
3.3.4	Shape memory cycle life —	91
3.4	Characterization of shape memory properties —	91
3.4.1	Stretching technique —	91
3.4.2	Bending technique —	91
3.4.3	Thermomechanical cyclic tensile technique —	92
3.5	Effect of thermomechanical cyclic conditions on SME —	94
3.5.1	Effect of programming conditions —	94
3.5.2	Effect of recovery conditions —	98
	References —	99
4	Shape memory polyurethanes: From materials to synthesis —	103
4.1	Introduction —	103
4.2	Materials —	103
4.2.1	Diisocyanate —	103
4.2.2	Macroglycol —	107
4.2.3	Chain extender —	110
4.2.4	Catalyst —	114
4.3	Synthesis of shape memory polyurethanes —	116
4.3.1	One-shot method —	116
4.3.2	Pre-polymerization method —	117
	References —	119
5	Applications of shape memory polymers —	121
5.1	Introduction —	121
5.2	Biomedical applications —	121
5.2.1	Clot removal device —	122
5.2.2	Vascular stent —	123
5.2.3	Orthodontic appliance —	124
5.2.4	Suture —	125
5.2.5	Dialysis needle —	126
5.3	Textile applications —	126
5.3.1	Finishing fabrics —	127
5.3.2	Breathable fabrics —	128

5.3.3	Damping fabrics —	129
5.3.4	Others —	129
5.4	Aerospace applications —	130
5.4.1	Solar arrays —	130
5.4.2	Truss —	130
5.4.3	Antennas —	132
5.4.4	Morphing structure —	132
5.5	Miscellaneous —	133
	References —	134
6	Future directions —	137
	Index —	139
