

Acknowledgments

I thank my late mother, Hoa Thi Tho, for the love and inspiration she gave to me. I thank my wife, Dong Thi Do, for having always stood by and having supported me in my many activities. It is her steadfast presence and support that have given me the time, confidence, and enthusiasm to do new things.

I thank many students, assistants, and associates who have made contributions to the work on 4D printing of composites. I thank Dr. Tsz Ho Kwok for giving a seminar in the summer of 2016 that brought to my attention to the term “4D printing.” I thank Dr. Daniel Rosca for having made many early structures. I thank many students, including Xiao Cai, Manpreet Singh, Bhargavi Reddy, Victor Raju, Marjan Abdali, Jasmin Anick, Mahmoud Fereidouni, Emad Fakhimi, and Dr. Hamid Hamidpour, who have worked on various aspects of the technology. I thank Heng Wang for having done most of the drawings.

I thank Concordia University, particularly the Department of Mechanical, Industrial, and Aerospace Engineering, for providing me with the freedom and opportunities to explore new frontiers and for offering the necessary facilities. I also thank the Natural Sciences and Engineering Research Council of Canada for providing funding support for more than 45 years.
