Preface — V

Chapter 1

Types of gases — 1

- 1.1 Introduction — 1
- 1.2 Types and composition — 7
 - 1.2.1 Natural gas — 7
 - 1.2.1.1 Associated natural gas — 14
 - 1.2.1.2 Nonassociated natural gas — 14
 - 1.2.1.3 Gas in tight formations — 15
 - 1.2.1.4 Geopressurized gas — 16
 - 1.2.1.5 Gas hydrates — 17
 - 1.2.1.6 Gas condensate — 21
 - 1.2.1.7 Liquefied petroleum gas — 24
 - 1.2.1.8 Refinery gas — 27
 - 1.2.2 Other gases — 32
 - 1.2.2.1 Biogas — 32
 - 1.2.2.2 Coalbed methane — 35
 - 1.2.2.3 Coal gas — 37
 - 1.2.2.4 Flue gas — 44
 - 1.2.2.5 Landfill gas — 46
 - 1.2.3 Other definitions — 49
 - 1.2.3.1 Shale gas — 51
 - 1.2.3.2 Synthesis gas — 51
- 1.3 Uses — 53
- References — 57

Chapter 2

Constituents of gas streams — 61

- 2.1 Introduction — 61
- 2.2 Constituents of gas streams — 66
 - 2.2.1 Methane — 68
 - 2.2.2 Ethane — 69
 - 2.2.3 Propane — 70
 - 2.2.4 Butane — 70
 - 2.2.5 Olefins — 70
 - 2.2.6 Higher molecular weight hydrocarbons — 71
- 2.3 Other gas streams — 73
 - 2.3.1 Coal gas — 73
 - 2.3.2 Biogas — 76

2.3.3	Landfill gas —	78
2.3.4	Flue gas —	81
2.3.5	Refinery gas —	84
2.4	Chemical and physical properties —	84
2.4.1	Chemical properties —	85
2.4.2	Physical properties —	90
2.5	Types and formation of pollutants —	92
2.5.1	Primary pollutants —	93
2.5.2	Secondary pollutants —	93
2.5.3	The Greenhouse effect —	95
2.5.4	Global climate change —	96
	References —	98

Chapter 3

Properties of gases — 101

3.1	Introduction —	101
3.2	Properties —	102
3.2.1	Absorption —	102
3.2.2	Adsorption —	103
3.2.3	Combustion —	104
3.2.4	Compressibility —	105
3.2.5	Corrosivity —	108
3.2.6	Deviation factor —	109
3.2.7	Electrical conductivity and resistivity —	110
3.2.8	Flammability and explosive properties —	111
3.2.9	Formation volume factor —	115
3.2.10	Gas laws —	116
3.2.10.1	Avogadro's law —	118
3.2.10.2	Boyle's law —	119
3.2.10.3	Charles' law —	119
3.2.10.4	Dalton's law of partial pressure —	120
3.2.10.5	Gay-Lussac's law —	121
3.2.10.6	Graham's law of effusion —	121
3.2.10.7	Ideal gas law —	122
3.2.11	Heat of combustion —	122
3.2.12	Helium content —	123
3.2.13	Liquefied natural gas —	123
3.2.14	Mercury content —	124
3.2.15	Methane number —	124
3.2.16	Odorization —	125
3.2.17	Phase behavior —	125
3.2.17.1	Dry gas and wet gas phase behavior —	127

3.2.17.2	Associated gas-phase behavior —	128
3.2.18	Residue —	128
3.2.19	Specific heat —	128
3.2.20	Thermal conductivity —	129
3.2.21	Thermal diffusivity —	129
3.2.22	Volatility and vapor pressure —	130
3.2.23	Viscosity —	132
3.2.24	Water content —	133
3.2.25	Wobbe index —	133
3.3	Environmental effects —	135
3.3.1	Greenhouse gas emissions —	137
3.3.2	Air pollutants —	139
3.3.3	Emissions during exploration, production, and delivery —	140
3.3.4	Emissions during processing —	144
3.3.5	Emissions during combustion —	145
3.3.6	Smog and acid rain —	146
3.3.7	Emissions reduction —	148
	References —	151

Chapter 4

Analysis of gas streams — 153

4.1	Introduction —	153
4.2	Types of gases —	155
4.2.1	Natural gas —	156
4.2.2	Other gases —	160
4.3	Analytical equipment —	164
4.3.1	Gas chromatography —	168
4.3.2	Infrared absorption —	168
4.3.3	Ultraviolet absorption —	169
4.3.4	Chemiluminescence detector —	169
4.3.5	Paramagnetic method —	169
4.3.6	Dumbbell analyzer —	170
4.3.7	Differential pressure analyzer —	170
4.3.8	Thermal conductivity method —	171
4.3.9	Catalytic filament method —	171
4.3.10	Flame ionization detection —	171
4.3.11	Solid-state electrolyte method —	171
4.4	Properties of gases —	172
4.4.1	Chemical properties —	174
4.4.2	Physical properties —	183
4.4.2.1	Calorific value —	185
4.4.2.2	Composition —	187

4.4.2.3	Density and specific gravity —	192
4.4.2.4	Dew point —	196
4.4.2.5	Higher molecular weight hydrocarbons —	196
4.4.2.6	Mercury content —	197
4.4.2.7	Sulfur content —	197
4.4.2.8	Volatility and vapor pressure —	198
4.4.2.9	Water content —	200
	References —	200

Chapter 5

Gas condensate — 202

5.1	Introduction —	202
5.2	Types of condensate —	206
5.2.1	Gas condensate —	207
5.2.1.1	Lease condensate —	207
5.2.1.2	Plant condensate —	208
5.2.2	Low-boiling naphtha —	208
5.2.3	Natural gasoline —	209
5.3	Production —	209
5.4	Condensate stabilization and storage —	210
5.4.1	Stabilization —	211
5.4.1.1	Stabilization by flash vaporization —	211
5.4.1.2	Stabilization by fractionation —	212
5.4.2	Storage —	212
5.5	Properties —	213
5.5.1	Chemical composition —	215
5.5.2	Physical properties —	217
5.6	Test methods —	220
5.6.1	Aniline point and mixed aniline point —	225
5.6.2	Benzene and aromatic derivatives —	226
5.6.3	Composition —	227
5.6.4	Constant composition expansion test —	235
5.6.5	Constant volume depletion —	235
5.6.6	Correlative methods —	236
5.6.7	Density —	236
5.6.8	Dew point pressure —	238
5.6.9	Distillation —	238
5.6.10	Evaporation rate —	239
5.6.11	Flammability —	240
5.6.12	Flash point —	240
5.6.13	Formation volume factor —	241
5.6.14	Hydrocarbon analysis —	242

5.6.15	Kauri–butanol value —	243
5.6.16	Octane number —	243
5.6.17	Odor and color —	244
5.6.18	Olefin content —	245
5.6.19	Solubility —	245
5.6.20	Solvent power —	246
5.6.21	Sulfur content —	246
5.6.22	Surface tension —	246
5.6.23	Vapor pressure and volatility —	247
5.6.24	Viscosity —	250
5.6.25	Water solubility —	250
	References —	251

Chapter 6

Gas processing — 255

6.1	Introduction —	255
6.2	Gas streams —	259
6.3	Glycol-based processes —	265
6.4	Olamine-based processes —	268
6.4.1	Girdler process —	274
6.4.2	Flexsorb process —	277
6.4.3	Adip process —	278
6.4.4	Purisol process —	278
6.5	Physical solvent processes —	279
6.5.1	Selexol process —	279
6.5.2	Rectisol process —	280
6.5.3	Sulfinol process —	281
6.6	Metal oxide processes —	283
6.6.1	Iron sponge process —	284
6.6.2	Adsorption processes —	287
6.6.3	Other processes —	289
6.7	Methanol-based processes —	295
6.8	Alkali washing processes —	297
6.8.1	Caustic scrubbing —	297
6.8.2	Hot potassium carbonate process —	299
6.8.3	Other processes —	300
6.9	Membrane processes —	301
6.10	Molecular sieve processes —	304
6.11	Sulfur recovery processes —	305
6.11.1	Claus process —	306
6.11.2	Redox process —	309
6.11.3	Wet oxidation processes —	310

- 6.11.4 Tail gas treating processes — **311**
- 6.11.5 Hydrogenation and hydrolysis processes — **311**
- 6.12 Cleaning technologies for other gases — **313**
- 6.13 Process selection — **315**
- References — **316**

Chapter 7

Gas processing equipment — 321

- 7.1 Introduction — **321**
- 7.2 Process equipment — **324**
 - 7.2.1 Absorption units — **326**
 - 7.2.2 Adsorption units — **329**
 - 7.2.3 Cyclone collectors — **331**
 - 7.2.4 Electrostatic precipitators — **331**
 - 7.2.5 Filters — **332**
 - 7.2.6 Scrubbers — **333**
 - 7.2.6.1 Dry scrubbers — **333**
 - 7.2.6.2 Orifice scrubbers — **335**
 - 7.2.6.3 Packed bed scrubbers — **335**
 - 7.2.6.4 Venturi scrubbers — **336**
 - 7.2.6.5 Wet scrubbers — **337**
 - 7.2.7 Spray towers — **339**
 - 7.2.8 Materials of construction — **340**
- 7.3 Reactor types — **342**
 - 7.3.1 Batch reactor and semi-batch reactor — **343**
 - 7.3.2 Continuous reactor and plug flow reactor — **344**
 - 7.3.3 Flash reactor — **345**
 - 7.3.4 Fluidized bed reactor — **346**
 - 7.3.5 Packed bed reactor — **347**
 - 7.3.6 Slurry reactor — **349**
- 7.4 Examples of uses of process units — **350**
 - 7.4.1 Solids removal — **350**
 - 7.4.2 Water removal — **351**
 - 7.4.2.1 Absorption unit — **354**
 - 7.4.2.2 Adsorption unit — **356**
 - 7.4.2.3 Molecular sieve — **359**
 - 7.4.2.4 Membrane — **360**
 - 7.4.3 Liquids removal — **362**
 - 7.4.3.1 Gas-liquid separator — **362**
 - 7.4.3.2 Extractor — **363**
 - 7.4.3.3 Absorber — **363**
 - 7.4.3.4 Cryogenic processes — **364**

7.4.4	Fractionator —	366
7.4.5	Nitrogen removal —	370
7.4.6	Acid gas removal —	372
7.4.6.1	Olamine absorber —	373
7.4.6.2	Carbonate washer and water washer —	374
7.4.6.3	Metal oxide reactor —	376
7.4.6.4	Catalytic oxidizer —	377
7.4.6.5	Molecular sieve reactor —	378
7.4.7	Enrichment —	378
7.4.8	Other process reactors —	379
7.4.8.1	Helium removal —	379
7.4.8.2	Mercury removal —	380
7.4.8.3	Radioactive residue removal —	381
7.4.9	Hydrogen sulfide conversion —	382
7.4.9.1	Claus process —	382
7.4.9.2	SCOT process —	383
7.5	Corrosion of gas processing equipment —	384
7.5.1	Corrosion by hydrogen sulfide —	385
7.5.2	Corrosion by carbon dioxide —	389
7.5.3	Other forms of corrosion —	390
	References —	390

Chapter 8

Principal products of gas processing and uses — 394

8.1	Introduction —	394
8.2	Methane —	398
8.2.1	Chemical properties —	401
8.2.2	Physical properties —	405
8.3	Ethane —	407
8.3.1	Chemical properties —	409
8.3.1.1	Chemical reactions —	409
8.3.2	Physical properties —	411
8.4	Propane —	412
8.4.1	Chemical properties —	413
8.4.2	Physical Properties —	414
8.5	Butane —	416
8.5.1	Chemical properties —	418
8.5.2	Physical properties —	419
8.6	Olefins and di-olefins —	419
8.7	The petrochemical industry —	424
8.7.1	Composition and properties —	427
8.7.2	Natural gas liquids —	437

8.7.3	Gas condensate —	438
8.7.4	Gas hydrates —	439
8.7.5	Other types of gases —	442
8.8	Environmental aspects of gas streams and products —	443
8.8.1	Emissions —	443
8.8.2	Greenhouse gases —	444
8.8.3	Climate change —	445
	References —	445

Appendices

Appendix A ASTM standard test methods for natural gas and low-boiling liquids (gas condensates) — 451

Appendix B GPA standard test methods for natural gas — 459

Appendix C Conversion factors and constants — 461

Appendix D The gas constant — 471

Appendix E Key equations — 473

Glossary — 475

About the author — 535

Index — 537
