

Contents

List of authors — VII

N. Allanazarov and B. Reyimov

Chapter 1

Use of digital systems in the design system of photovoltaic solar stations — 1

K. Saryyev

Chapter 2

Potential wind energy in Turkmenistan — 21

M. Orazberdiyeva

Chapter 3

Potential of using biogas technology in Turkmenistan — 31

A. Matyakubov

Chapter 4

Energy efficiency — 45

S. Nazarov

Chapter 5

Latent renewable energy in Turkmenistan — 57

Saliha Demirbüken and Vilda Purutçuoğlu

Chapter 6

Approximate stochastic simulation algorithms — 67

Aditya Singh

Chapter 7

The role of supply chain management in the construction industry — 95

Vilda Purutçuoğlu and Başak Bahçivancı

Chapter 8

Selection of threshold in binary graphs of biological networks — 121

Mehmet Ali Kaygusuz and Vilda Purutçuoğlu

Chapter 9

Model selection criteria with bootstrap algorithms: applications in biological networks — 133

Cinzia Bellone, Pietro Ranucci and Valina Geropanta

Chapter 10

Technocracy in Governance: new directions in city functioning and urban planning — 149

Ekin Can Erkuş and Vilda Purutçuoğlu

Chapter 11

Outlier detection in biomedical data: ECG-focused approaches — 161

Jabulani Monchwe, Elias Munapo and Martin Chanza

Chapter 12

Optimization of debt collection strategies for South African banks with machine learning models — 183

Khadija Rahal, Zied Driss and Mohamed Salah Abid

Chapter 13

Performance of six turbulence models in predicting two-phase flow on a hydraulic test bench — 209

Index — 231
