

Contents

Acknowledgments — IX

Foreword to the First Edition — XI

Preface — XIII

Chapter 1

Introduction — 1

 The Rationale for Financial Disruption — 1

 Ethics and Technology — 2

 Digital Transformation and Development — 3

 Shifts in Customer Behavior — 6

 Changes in Engagement and Purchasing Behaviors — 7

 Structure of the Book — 8

 References — 10

Chapter 2

Fintech – Definition, History, and Global Landscape — 11

 Introduction — 11

 Definition and Concept of Fintech — 11

 Evolution of Fintech — 13

 Fintech 1.0 (1866–1987) — 14

 Fintech 2.0 (1987–2008) — 16

 Fintech 3.0 — 18

 Decentralized Finance (DeFi) — 19

 Global Landscape of Fintech — 20

 Fintech Investment — 20

 Fintech in Major Regions — 20

 Cryptocurrencies, Initial Coin Offerings (ICOs) and Securitized Token

Offerings (STOs) — 25

 Cryptoexchanges — 32

 e-Wallets — 33

 ICOs versus STOs — 37

 Fiqh View on Coins and Tokens — 39

 Stablecoins and Central Bank-Issued Digital Currencies — 41

 Critical Importance of CyberSecurity — 43

 References — 44

Chapter 3

Importance of Fintech and its Applications — 47

Introduction — 47

Financial Innovation within the Financial Services Industry Perspective — 48

Payments Industry — 48

Crowdfunding and P2P Lending — 50

Neo-Banking — 52

Asset under Management — 53

InsurTech — 53

Fintech Within the Technological Perspective — 54

Blockchain and Its Applications — 55

Cloud Computing — 56

Big Data Analysis — 57

Internet of Things — 57

Robo-Advisors — 59

Artificial Intelligence — 60

Machine Learning and Deep Learning — 61

Quantum Computing — 63

References — 64

Chapter 4

Emergence of Islamic Fintech and its Developments — 67

Introduction — 67

What Is Islamic Fintech? — 68

Alignment between Islamic Finance and Fintech — 68

Islam and Fintech in History — 70

Islamic Fintech Developments Around the Globe — 71

Global Islamic Fintech Landscape and Index — 72

Islamic Countries' Initiatives for Islamic Fintech — 75

Islamic Republic of Pakistan (Islamabad, Lahore) — 76

Kingdom of Bahrain (Manama) — 77

Kingdom of Saudi Arabia (Jeddah, Riyadh) — 80

People's Republic of Bangladesh — 81

Malaysia (Kuala Lumpur) — 82

Republic of Indonesia (Bandung, Jakarta, Surabaya, and Yogyakarta) — 87

Republic of Kazakhstan — 89

Republic of Turkey (Istanbul) — 90

Sultanate of Brunei (Brunei Darussalam) — 92

United Arab Emirates (Dubai) — 93

United Kingdom (London) — 95

Obstacles for Islamic Fintech — 96
Overcoming the Digital Divide in the Islamic Digital Economy — 97
Implications for Islamic Digital Economy — 98
Recommendations — 100
References — 104

Chapter 5

Blockchain and the Digital Economy — 108

Introduction — 108
Investments in Blockchain — 108
Trends of the Sharing Economy and the Internet of Things Era — 110
Open Platforms — 111
Web and Mobile (Internet of Things Devices) — 111
Cloud-Based (Internet of Things Infrastructure) — 112
Clearing Trades and Settlement Transactions — 112
Widespread Use of Artificial Intelligence — 113
Regulatory Controls — 114
Institutional Investment — 115
Diversity and Choices — 115
User Defined and User Experience — 116
Trust in the New Sharing Economy — 116
Trust and Reciprocity in the Economy — 118
Trust and Trustworthiness (Reciprocity) in Islam — 119
What is Blockchain? — 120
Blockchain as Currency and Payments — 121
Blockchains as Databases and Public Registries — 123
Blockchain as Smart Contracts — 124
Blockchain as Clearing and Settlement of Securities Transactions — 125
Reduction of Fraud — 125
Know Your Customer — 126
Blockchain Infrastructure — 128
Storage — 129
Processing — 130
Communications — 132
References — 133

Chapter 6

Expanded Use Cases of Blockchain — 134

Smart Contracts in Islamic Transactions — 134
How Does a Smart Contract Work? — 134
Automation and Enforceability — 136
Benefits and Evolution of Blockchain-Based Smart Contracts — 137

Applications of Smart Contracts — 137
Capital Markets and Investment Banking — 138
Commercial and Retail Banking — 138
Takaful — 138
Islamic Trade Financing — 139
Blockchain-Based Trade Finance — 140
Enablers to Blockchain-Based Trade Financing — 141
Blockchain-Based Smart Contracts — 141
Instant Payment Structures — 142
Current Challenges — 142
Takaful (Islamic Insurance) on the Blocks — 143
A Model for a Blockchain-Based Takaful — 145
Fraud Detection and Risk Mitigation — 145
Blockchain-Based Islamic Capital Markets — 148
Payments and Settlements — 150
Sukuk on the Blockchain — 151
Distributed Ledger Technology and the Over-the-Counter Market — 152
Media Rights, Intellectual Property, and Trademark Protection — 153
Generating Advertising Revenues — 154
Collections and Copyright Tracking — 155
LegalTech and the Evolution of Legal Services — 156
Legal Research — 157
Contract Management — 157
Intellectual Property Management — 158
Automation and Analytics — 158
eDiscovery — 158
References — 159

Chapter 7

Data Risk Management For Advanced Islamic Financial Institutions — 161

Introduction — 161
Consumer-Related Risks — 162
Drivers for AI-Driven Risk Management — 163
Risks in Data Sources and Big Data Processes — 165
Risk Management in Various Financial Processes — 167
Conclusion — 177
References — 178

Chapter 8

Evolution of Blockchain — 180

Introduction — 180
Transnational Justice Applications for the Economy — 181

Coordination and Efficiency in Markets Through Consensus-Building — 182
Pragmatic Approach to Technology Implementation — 183
Get it Going First — 184
Overcoming Limitations of Technology — 186
Technical Challenges — 187
Business Challenges — 187
Government Regulatory Challenges — 188
Privacy Challenges — 189
References — 190

Chapter 9

Response of Islamic Financial Institutions — 191
Introduction — 191
Important Success Factors in this Era of Digitization — 191
Better Customer Experience with Customer Centricity — 191
Agility and Scalability — 192
Cybersecurity Management — 193
Challenges for Islamic Financial institutions — 195
Regulatory Issues — 195
Comfort Zones and Stagnation in Management — 196
Lack of Talent — 197
Role of Academia and Islamic Fintech Education — 198
Collaboration Models for Islamic Financial Institutions — 200
Islamic Fintech Is Opportunity for Islamic Financial Institutions — 202
Collaboration Is Better than Competition — 203
Open Platforms — 204
Open Banking or Financial Platforms — 204
The Financial Institution Owns the Platform — 205
Other Ownership of the Platform — 205
Conclusion — 206
References — 207

Chapter 10

Cash Waqf (Endowments) Management Through the Blockchain — 211
Introduction — 211
The Different Use Cases for Blockchain to Enhance Governance — 212
The Essentials to Understanding Waqf — 213
Historical Examples of Waqf Institutions and Their Contributions — 215
Waqf Institutions and Modernization — 216
The Distinction of Cash Waqf from Other Waqf Models — 217
The Blockchain Cash Waqf Model Development — 218

What the Cash Waqf System Seeks to Solve —	221
Benefits of a Blockchainized Waqf System —	221
Conclusion —	222
References —	222

Chapter 11

A Unified Islamic Digital Currency – The Digital Dinar —	224
---	------------

Introduction —	224
Why a Unified Currency is Important for the Muslim World —	224
Considerations for a Unified Currency for Islamic Countries —	226
Evolution of Digital Currencies —	228
The Central Bank-issued Digital Currency (CBDC) —	230
Proposed Constructs For The Unified Islamic Digital Currency (DIGITAL DINAR) —	233
The Aggregated Sovereign Currencies Construct —	234
The Islamic Central Bank (ICB) —	235
The Basket of Commodities Construct —	237
Commodity Reserve Division (CRD) —	238
The Fixed Price Schedule —	239
Parameters of the Price Schedule —	239
Benefits to the Digital Dinar Implementation —	240
Conclusion —	240
References —	241

Index —	243
