

List of Tables

- Table 1:** A list of features of the candle flame that Faraday seeks to explain, grouped into three categories (Chapter 3)
- Table 2:** A comparison of properties and thing-claims made by the liquid-drop and shell models (Chapter 5)
- Table 3:** A list of formal, material, and productive features of the nucleus to be explained (Chapter 5)
- Table 4:** A collection of the processes that appear in both models. These collections are identical, but are used in different ways to explain different ends. (Chapter 5)
