

CONTENTS

JOSEPHSON JUNCTION PHYSICS

Progress in physics of Josephson junctions. H. Lübbig.....	1
Non-equilibrium phenomena in Josephson junctions. J. Bindslev Hansen, P.E. Lindelof.....	29
Study of a spin-glass phase transition by the dc Josephson effect. C. Van Haesendonck, L. Van den dries, Y. Bruynseraede, A. Gilabert..	71
Characterization of non equilibrium superconductivity via the Josephson effect. A. Gilabert, C. Vanneste, P. Sibillot, D. Ostrowsky.....	81
Locally lowered tunneling barriers in light-sensitive Josephson junctions. M. Russo	87
Preparation parameters and characterization of vanadium based Josephson junctions. A. Barone, M. Russo, A. Di Chiara, G. Peluso	95
Measurement of the $\cos\varphi$ -amplitude of niobium point contacts con- tained in a rf-SQUID. S.N. Ern�, H. Luther, H.J. Scheer	109
An electronic analogue of a high frequency theory of the Josephson effect. D.G. Jablonski, J.R. Waldram	115
Supercurrent interference patterns and quasiparticle excess currents in Josephson tunnel junctions. P.W. Epperlein	131
Magnetic field behavior of current steps in long Josephson junctions G. Costabile, A.M. Cucolo, S. Pace, R.D. Parmentier, B. Savo, R. Vaglio	147
Properties of coherent vortex motion in Pb-Nb-Pb ion implant variable thickness bridges. P. Crozat, G. Vernet, R. Adde	157

VIII

The effect of magnetic field on the height of microwave-induced step. Wei Chong-de, Li Jia-zhang	165
The current-phase relation of superconducting bridges. Yao Xi-Xian	171
Sub-harmonic steps of superconducting bridges. Yao Xi-Xian	173
Effects of microwave radiation on granular Al microbridges. B. Dwir , G. Deutscher	177

JUNCTION AND CIRCUIT NOISE

Fluctuations analysis. J. Clarke	187
Quantum limited ac-biased SQUID magnetometer. A.P. Long, R.J. Prance, T.D. Clark, J.E. Mutton, M.W. Potts, A. Widom, F. Goodall	207
On the $\varnothing_{dc}$ -dependence of rf-SQUID noise. R. Cristiano, S.N. Ern�, H. Luther	211
The plasma resonance in the rf impedance and the wide-band response of a capacitively shunted Josephson junction. T. Poorter, H. Tolner	219
Low frequency noise in small-area tunnel junction dc SQUIDs. M.B. Ketchen, C.C. Tsuei	227
Thermodynamic equilibrium fluctuations generated by a Josephson tunnel junction described by the Werthamer theory. G. Brunk	237
Quantum versus thermally excited fluxoid transitions in a SQUID ring. J. Kurkij�rvi	247

JUNCTION AND CIRCUIT FABRICATION

Junction and circuit fabrication. L.D. Jackel	257
High reliability Pb-alloy Josephson junctions for integrated circuits. H.-C. W. Huang, S. Basavaiah, C.J. Kircher, E.P. Harris, M. Murakami, S. Klepner, J.H. Greiner	297

Superconductive tunneling through edge-grown barriers. G. Dousselin, J. Rosenblatt	329
Refractory weak link Josephson devices. J.H. Claassen, E.J. Cukauskas, M. Nisenoff	333
Fabrication and characterization of the film parameters in ion- implant Nb bridges with thick Pb banks. P. Crozat, R. Adde	345
Nb weak links for SQUID applications. R.B. Laibowitz, A.N. Broers, R.F. Voss, S.I. Raider, J.M. Viggiano	353
Ultra low noise dc SQUIDS. R.F. Voss, R.B. Laibowitz, M.B. Ketchen, A.N. Broers	365
Some properties of Nb ₂ O ₅ thermally grown tunnel barriers in Nb-Nb ₂ O ₅ -Pb(In) Josephson junctions. J.C. Villegier, G. Matheron ..	381
Dc SQUIDS fabricated with niobium-niobium tunnel junctions. V.J. de Waal, P. van den Hamer, J.E. Mooij	391
Fabrication and characterization of thermally recyclable submicron niobium-niobium Josephson junctions. G.M. Daalmans	399
Simple fabrication and characterization of thin-film niobium SQUID's working at 4.2 K. D. Pascal	417
CRYOGENIC TECHNIQUES	
Cryogenics for SQUIDS. J.E. Zimmerman	423
FUNDAMENTALS FOR SQUID APPLICATIONS	
Fundamentals for SQUID applications. R.P. Giffard	445
Signal and noise parameters of SQUID's. V.V. Danilov, K.K. Likharev, O.V. Snigirev	473
SQUID APPLICATIONS IN LOW FREQUENCY DEVICES	
Applications of SQUID's to nuclear gyros and magnetometers. R. Adams, S.P. Potts, J.C. Gallop, W.J. Radcliffe	509

X

Application of the SQUID magnetometer for optomagnetic investigation. H. Heidrich, P. Mateew	519
Optimising the design of thin-film dc SQUID gradiometers. C.M. Pegrum, G.B. Donaldson	535
The temperature, pressure, and power dependence of stable cryo-resistors. J.C. Macfarlane, H.C. Collins	549
Measurement of order-parameter variations in a superconducting aluminium film. J.A. Pals, J. Dobben	553
Toroidal SQUID with a normal metal filter. T. Fujita	561
Behavior of the dc impedance of an rf-biased resistive SQUID. D. Van Vechten, R.J. Soulen, Jr., R.L. Peterson,	569
Input inductance of the rf SQUID in hysteretic mode. S. S. Tinchev	585
Analysis of the reversible magnetization of a rf SQUID containing a weak link with a non-sinusoidal current phase relationship. H. Lübbig	591
Experimental evidence for quantum electrodynamic flux tunneling in SQUID magnetometer. A.P. Long, R.J. Prance, T.D. Clark, A. Widom, J.E. Mutton, J. Sacco, M.W. Potts, G. Megaloudis	599
SQUID APPLICATIONS IN GEOPHYSICS	
Geophysical applications of SQUIDs. W.M. Goubau	603
Use of superconductive magnetic gradiometers for measuring magnetic effects of geophysical origin. W. Podney	615
The design of dewar systems for geophysical SQUID magnetometers. B.R. Barnard	633
JUNCTION AND SQUID APPLICATIONS IN COMPUTERS AND CRYOELECTRONICS	
Computers and cryoelectronics. T. Van Duzer	651

Turn-on delays in single Josephson junction devices. R.L. Peterson	685
Effects of magnetic fields and quasi-particle conductance on transition dynamics in dc SQUIDS. E. Ben Jacob, Y. Imry	703
Direct-coupled four Josephson junctions logic gate. S. Takada, S. Kosaka, H. Hayakawa	713
Tolerances and gain of asymmetric Josephson junction interferometer for AND gates. H. Beha	725
Josephson field effect transistors - JOFET's. R.J. Prance, T.D. Clark	735
 JUNCTION AND SQUID APPLICATIONS IN MICROWAVE DEVICES	
RF applications of superconducting tunneling devices. N.F. Pedersen.....	739
Experimental results of the magnetic coupling. Cui Guang-Ji, Meng Xiao-Fan, Guo Wei-Xin, Li Jia-Zhang, Dai Yuan-Dong	763
Microwave properties of long Josephson junctions. K. Yoshida, K. Hamasaki, F. Irie, M. Inoue	769
Microwave induced harmonic and subharmonic steps in the I-V characteristics of current fed Josephson junctions. Y. Braiman, E. Ben-Jacob, Y. Imry	783
The singly quasi-degenerate Josephson junction parametric amplifier. Design guide lines. O.H. Soerensen	797
Josephson parametric amplifier as a part of a gravity wave detec- tion scheme. J. Kadlec, W.O. Hamilton	813
Josephson junction applications in plasma physics. B.T. Ulrich, M. Tutter	831
Video-detection of mm-wave radiation using SIS Josephson junction. H.J. Hartfuß, K.H. Gundlach, J. Kadlec	841

XII

MM-wave detection using quasiparticle tunneling. H.J. Hartfuß, K.H. Gundlach	851
Fabrication of small Josephson tunnel junction. K.H. Gundlach, M. Zahn, K. Okuyama, H.J. Hartfuß	857
Detection of mm-radiation with high current density submicron niobium-niobium Josephson junctions. G.M. Daalmans, Th. de Graauw, S. Lidholm, Fr. v. Vliet.....	863
Theory of Josephson junction mixers. G.J. Ehnholm	875
Characteristics of Josephson junction harmonic mixers with even and odd harmonic numbers. K. Fujisawa, S. Kita, Y. Ohmae, T. Hirosaki, K. Fujiie	889
SIS quasiparticle mixing with long antenna-coupled arrays. S. Rudner, N.J. Feldman, E. Kollberg, T. Claeson	901
Josephson radiation emitted from a microbridge at 9, 35 and 69 GHz. J. Mygind, N.F. Pedersen, O.H. Soerensen, B. Dueholm, T.F. Finnegan, J. Bindslev Hansen, M.T. Levinsen, P.E. Lindelof	907
Coherent radiation of Josepshon junction arrays. Yuan-Dong Dai, Y.H. Kao	921
Microwave generation using coherent arrays of Josephson junctions. A.K. Jain, A.M. Kadin, J.E. Lukens, P. Mankiewicz, R.H. Ono, D.B. Schwartz	939
A new integrated microwave SQUID circuit design. S.N. Ern�, T.F. Finnegan	955
SUMMARY AND CONCLUSIONS	
Summary and conclusions. J. Clarke	961
Subject Index	971
Author Index	988
