|-----------------------------------------------------------------------|------|
| Preface                                                               | v    |
| List of Figures                                                       | xv   |
| List of Maps                                                          | xvii |
| List of Tables                                                        | xix  |
| Abbreviations and Conventions                                         | xxi  |
| <br>                                                                  |      |
| 1. Introduction                                                       | 1    |
| 1.1. What is verb classification?                                     | 1    |
| 1.2. Towards a typology of classification                             | 4    |
| 1.2.1. Superclassification and subclassification                      | 4    |
| 1.2.2. Classes and categories                                         | 5    |
| 1.2.3. Classifiers and classifying constructions                      | 7    |
| 1.2.4. Concluding remarks                                             | 8    |
| 1.3. Understanding grammatical superclassification                    | 10   |
| 1.3.1. A conceptual model                                             | 10   |
| 1.3.2. Distributional criteria for grammatical<br>superclassification | 16   |
| 1.3.3. An example: the Kija noun class system                         | 22   |
| 1.4. Verb superclassification Australian style                        | 25   |
| 1.5. Semantic basis of verb superclassification                       | 29   |
| 1.5.1. Fundamental parameters                                         | 29   |
| 1.5.2. On class, category, and classification meaning                 | 34   |
| 1.5.3. Prediction and explanation                                     | 35   |
| 1.6. Aims and organisation                                            | 38   |
| <br>                                                                  |      |
| 2. The Gooniyandi verb classifier system                              | 41   |
| 2.1. Structure of the verbal complex                                  | 41   |
| 2.2. The X morphemes as category markers                              | 44   |
| 2.3. The semantics of Gooniyandi verb classifiers                     | 54   |
| 2.3.1. Extendible classifiers                                         | 60   |
| 2.3.2. Accomplishment classifiers                                     | 64   |
| 2.3.2.1. Monovalent classifiers                                       | 64   |

|                                                                        |     |
|------------------------------------------------------------------------|-----|
| 2.3.2.2. Avalent classifiers                                           | 66  |
| 2.3.2.2.1. The reasonably well populated categories                    | 66  |
| 2.3.2.2.2. The minor categories                                        | 76  |
| 2.3.2.3. The bivalent classifier                                       | 78  |
| 2.3.3. Parallelisms between extendible and accomplishment classifiers? | 80  |
| 2.3.4. Exceptions                                                      | 83  |
| 2.3.5. Concluding remarks                                              | 85  |
| 2.4. Two special cases                                                 | 87  |
| 2.4.1. Classification of the most frequent verb roots                  | 87  |
| 2.4.2. Classification of English borrowings                            | 94  |
| 2.5. Remarks on verb classification in Bunuba                          | 96  |
| 3. CVC-based verb category systems                                     | 101 |
| 3.1. Formal properties of CVCs                                         | 101 |
| 3.2. Nyulnyulan languages                                              | 107 |
| 3.3. Worrorran (Northern Kimberley) languages                          | 117 |
| 3.4. Jarakan languages                                                 | 120 |
| 3.5. Jaminjungan languages                                             | 122 |
| 3.6. Wagiman                                                           | 125 |
| 3.7. Daly River languages                                              | 128 |
| 3.8. Maran languages                                                   | 137 |
| 3.9. Mangarrayi                                                        | 138 |
| 3.10. Pama-Nyungan languages                                           | 139 |
| 3.11. Concluding remarks                                               | 145 |
| 4. Comparison of verb category systems                                 | 149 |
| 4.1. Degrees of grammaticisation                                       | 149 |
| 4.2. IVs recurrent in CVC-based category systems                       | 152 |
| 4.2.1. Speech; avalent                                                 | 160 |
| 4.2.2. Stance; monovalent                                              | 161 |
| 4.2.2.1. 'Sit, be'                                                     | 161 |
| 4.2.2.2. 'Stand'                                                       | 162 |
| 4.2.3. Motion; monovalent                                              | 162 |
| 4.2.3.1. 'Go'                                                          | 162 |

|                                                               |     |
|---------------------------------------------------------------|-----|
| 4.2.3.2. 'Fall'                                               | 163 |
| 4.2.3.3. 'Become'                                             | 164 |
| 4.2.4. Induced motion; bivalent                               | 164 |
| 4.2.4.1. 'Carry'                                              | 164 |
| 4.2.4.2. 'Throw'                                              | 165 |
| 4.2.4.3. 'Put'                                                | 166 |
| 4.2.5. Acquisition; bivalent                                  | 167 |
| 4.2.5.1. 'Catch, get'                                         | 167 |
| 4.2.5.2. 'Give'                                               | 167 |
| 4.2.6. Violence; bivalent                                     | 168 |
| 4.2.6.1. 'Hit'                                                | 168 |
| 4.2.6.2. 'Poke'                                               | 168 |
| 4.2.7. Perception; bivalent                                   | 169 |
| 4.2.8. Concluding remarks                                     | 169 |
| 4.3. Gooniyandi and Nyulnyul systems in contrast              | 171 |
| 4.3.1. Formal characteristics                                 | 171 |
| 4.3.2. System level comparison                                | 174 |
| 4.3.3. Individual categories compared and contrasted          | 176 |
| 4.3.3.1. Atelic categories                                    | 180 |
| 4.3.3.2. The unmarked Nyulnyul category -J<br>'say, do'       | 182 |
| 4.3.3.3. Telic categories                                     | 182 |
| 4.3.4. Categorisation of vocalisation/communication<br>events | 186 |
| 4.3.5. Categorisation of motion events                        | 192 |
