Introduction	XV
Acknowledgements	1
I. Temporality in Language: From Lexical Meaning to Text Interpretation	
1. The Association and Dissociation of Semantic Meaning and (Con)Textual Interpretation	1
2. The Ambiguity of Temporal Information in Texts	6
II. Time and Temporal Structure: a Conceptual Analysis	
1. The Origins of Temporal Structure	19
1.1 General Remarks on Time and Temporal Structure	19
1.2 Natural Situations	22
1.2.1 The Ontological Basis of Natural Situations	24
1.2.2 Unity and Identity	24
1.2.3 Dimensionality, Uniqueness, and Types of Situations	26
1.3 The Pragmatic View: Natural Situations as Ontological Commitments	28
2. Temporal Interpretation in Interval Semantics	30
2.1 Evaluation Relative to Intervals of Time	30
2.2 Some Conclusions from Interval Semantics, Concerning Temporal Interpretation and the Sequencing of Situations	33

3.	Objections to Interval-Based Theories	34
3.1	Natural Situations as Contexts: From Natural Situations to Possible Propositions	35
3.1.1	The Grammatical Manifestation of Aspectuality	35
3.1.2	The Ontological Counterparts of Aspectual Classes	38
3.1.3	The Interaction of Actual Structure and Conceptual Perspective: the Ontological and Epistemological Origins of Aspectuality	42
3.2	Natural Situations as Truth-makers: From Propositions to Possible Referents	47
3.2.1	The Global Ambiguity of Duration: Do Duratives Endure?	50
3.2.2	Walking the Path of Truth: The Double Asymmetry of Accomplishments	53
3.2.3	Relating Situations: Temporal Comparison	60
4.	Establishing Times	63
4.1	Indeterminate Structures in the Domain of Physical Objects: a Parallelism	64
4.1.1	The Data	64
4.1.2	Talmy's Theory of the Windowing of Attention	67
4.2	Consequences for the Informativeness of Sortal Concepts	71
4.2.1	Establishing Times: Language-Generated Windowing Effects on Natural Situations	74
4.2.2	Entities by Accident: the Ontological Status of e-Times	78
4.2.3	Are e-Times Truth-Makers and/or Referents?	80
4.3	Establishing Features	81
4.3.1	Essential Characteristics of Establishing Times	81
4.3.2	Stretches and Bits: Morphological Properties of Partial Structures	84
4.4	The Underspecification of Verbal Semantics	86
4.4.1	Markedness and Precisification	88
4.4.2	Establishing Features in the Light of Markedness and Precisification	92
5.	Summary and Conclusions: Establishing Features, Temporal Relations, and Temporal Sequencing	94

III.	A Methodological Framework Combining Formal Semantics and Formal Knowledge Representation	
1.	Introduction	97
2.	Two-Level Semantics	99
3.	Knowledge Representation and Natural Language Semantics	101
4.	The Five-Level Approach: a Unified Framework for the Representation of Linguistic and Non-Linguistic Knowledge	104
4.1	The Five-Level Approach to Knowledge Representation	104
4.2	A Five-Level Representation of Temporal Interpretation	106
4.2.1	The Logical Level	107
4.2.2	The Ontological Level	107
4.2.3	The Conceptual Level	108
4.2.4	The Epistemological Level	108
4.2.5	The Linguistic Level	109
5.	Externalism – Internalism, Pragmatism – Realism: Some Remarks On the Role of Ontology	109
IV.	Ontological and Epistemological Conditions on Temporal Reference	
1.	Epistemological Presumptions	115
1.1	Epistemology vs. Ontology	115
1.2	Partiality	116
1.3	Heuristics	119
2.	A Formal Ontology of Time and Temporal Structure	123
2.1	The Ontologically Basic Assumptions of GOL	124
2.1.1	Types of Entities in GOL	125

2.1.2	Basic Relations	126
2.2	Mereology	128
2.3	Chronology	129
3.	Ontological and Epistemological Extensions	134
3.1	Partial Structures, Representative Partial Structures, and Establishing Parts and Times	134
3.1.1	Partial Structures	134
3.1.2	Representative Partial Structures	140
3.1.3	Establishing Parts and Times	141
3.2	Chronological Relations Applying to Partial Structures and Their Elements	142
3.2.1	Sequence	142
3.2.2	Boundedness	143
3.2.2.1	Objections Against the Notion of Atoms and the Open-Closed Distinction	143
3.2.2.2	A Definition of Boundedness Based On Mereochronology	146
3.2.2.3	What It Means To Not Be Bounded	147
4.	Partial Temporal Relations: Reasoning with Partial Structures	149
4.1	Approaches to Temporal Reasoning With Incomplete Knowledge	149
4.1.1	Convex Relations	149
4.1.2	Conceptual Neighborhood	150
4.2	Translating Boundedness and Sequence of Partial Structures into Partial Interval Relations	152
4.3	Definitions and Relation Hierarchies for Partial Temporal Relations	156
5.	Conclusions	160

V.	Information about Establishing Times in Grammar: a Fragment of German Verbal Semantics	161
1.	Establishing Features in Grammar: Formal Prerequisites	163
1.1	Syntax, Scope, and Semantic Composition of Aspectuality	163
1.2	Structured Eventive Predications: Which Part of a Sentence Meaning Encodes Establishing Features?	165
1.3	Decomposition	168
1.4	Two Alternative Strategies	169
2.	Aspectual Composition (I): Direct Predicate Modifications ('Attributive Strategy')	172
2.1	The Systematic Problem to Access Predicative Information Compositionally	172
2.2	The Aspectual Quality Predicate <i>Q</i>	173
2.2.1	Sentence Mood and Aspects of Object Topicalization	176
2.2.2	The Constants become, happen, unmark, and the Parameter <i>direct</i>	179
2.2.3	Conceptual Interpretations for the Aspectual Triggers	183
3.	Aspectual Composition (II): Multiple Layers of Eventive Predications ('Predicative Strategy')	185
3.1	The Problem With Multiple Modifications	185
3.2	Multiple Layers of Eventive Predications	189
3.3	Unique Eventives, Sentence Mood, and Some Aspects of Object Topicalization	192
3.4	An Interpretation of Partial Superposition	194
3.5	Semantic Economy Contra Conceptual Adequacy: Weighing Up Both Strategies	196
3.5.1	Pros and Cons of the 'Mapping Strategy'	196
3.5.2	Pros and Cons of the 'Predicative Strategy'	199
4.	Domains of Aspectual Composition	201
4.1	Aspectual Composition above VP (I): Temporal Modification	202
4.1.1	Do Modifiers Carry Aspectual Information in their Own Right?	202

4.1.2	Structural Aspects of Temporal Modifications: Syntactic and Semantic Presumptions	206
4.1.3	Composing Simple and Multiple Temporal Modifications	207
4.1.4	Restrictions on Aspectual Selection	211
4.2	Aspectual Composition above VP (II): Sentence Negation	215
4.2.1	Sentence Negation as an Aspectual Marker	216
4.2.2	The Structural Characteristics of Sentence Negation	222
4.2.3	Sentence Negation and Temporal Modification	227
4.3	Aspectual Composition below VP: Inner Aspectuality and the Telicity/Atelicity Dichotomy	230
4.3.1	Krifka's Notion of Incrementality	232
4.3.2	Transferring the Modes of Reference	235
4.3.3	ma/ag and grain: A Fragment of German DP Semantics	237
4.3.4	The Transfer of e-Features	247
4.4	Aspectual Composition below V ^o : Productive Derivations of Lexical Adjustments	250
4.4.1	Detransitivation	251
4.4.2	Particle Verbs	253
4.4.3	Secondary Predications	254
4.4.3.1	Proc-acco Verbs	254
4.4.3.2	Small Clauses	258
5.	Preliminary Conclusions	263
VI.	Tense, Discourse Structure, and the Sequencing of Eventives	
1.	A Dynamic Interpretation of Tense	265
1.1	The Anaphoric Character of Tense	265
1.2	Reference Times and Chains of Reference Times	267
1.3	Some Conclusions from Partee's Account	269

2.	A Dynamic-Semantic Account of the German Tense System	270
2.1	The Dynamic and Compositional Approach of Dynamic Montague Grammar	270
2.2	Time and Sequence: The Two-Part Anaphora of Tense	276
2.2.1	The Positional and the Sequential Part of the Temporal Information of Tense	276
2.2.2	Conclusions and Further Assumptions on the German Tense System	282
2.2.2.1	Telic Verbs and the German Perfect	283
2.2.2.2	e-Times and the Extended Now	288
2.2.3	The Representation of the German Perfect, and Its Applications	290
3.	Further Anaphoric Temporal Expressions: Adverbs and Conjunctions	293
4.	Discourse Relations, the Parameter \mathcal{S} , and the Reconstruction of Temporal Sequences	296
5.	A Sample Text	300
VII.	Conclusion	
	Appendix to chapter VI: Step-by-Step Composition of the <i>Bäuerlein</i> Text	315
	References	343
	Text Sources	356
	Index of Figures	357
	Index of Symbols and Abbreviations	361
	Word Index	365
