

Acknowledgements

After a very interesting and fruitful conference in May 2022 on the subject of ‘Translatio – translation and transfer of language, culture, literature’ we decided that this topic yields so many interesting aspects that we wanted to invite not only our participants but also other scholars to contribute with their expertise to an interdisciplinary volume. The editors want to thank Svenska Riksbanken Jubileumsfond for funding this volume within the series published at De Gruyter. Particular thanks to Karl Gunnar Johansson and our colleagues at the Modes of Modification project who helped to plan the conference and the volume from the very beginning. A big thank you is due to Robert Forke and Laura Burlon whom, with a lot of diligence and their vast editorial knowledge, helped to finalise this volume. Last but not least we want to thank our contributors for their patience and for writing their chapters in as timely a manner as possible.
