

Acknowledgements

This book is a slightly revised version of my doctoral thesis that I defended in 2022 at the Free University of Berlin. It arose from a research project on bilingual prosody between Spanish and Quechua that my supervisor Uli Reich invited me to think about with him in 2014. Its eventual funding by the DFG allowed Raúl Bendezu Araujo, him, and me to undertake field trips to Peru and to devote several years to studying the speech of the amazing people we met in Huari.

Those people, whose speech provides the database for this book, generously gave us their time, humour, and friendship. My first thanks go to them.

Besides giving me the opportunity to participate in this adventure, I want to thank Uli for his support, for always encouraging me to question established wisdoms and for providing me with a strong idea of what qualities I would like to pursue as a researcher myself.

Raúl and I became friends on this journey together, solved Quechua puzzles together, and got called gringos together by our Huari friends.

Jan Fließbach discussed nearly every page that made it into this thesis and many more that didn't, and he has always been there for me.

Judith Meinschaefer always asked the best and trickiest questions that made me think about my ideas and linguistics in general in a new way.

I would also like to thank Maria del Mar Vanrell for teaching me practical things about prosody, and everyone at the colloquium for Romance linguistics as well as many others for countless enjoyable discussions that helped me develop and shape my ideas.

Gabriel Barreto and Leonel Menacho shared their expertise on Quechua with us, provided us with invaluable insights into local society and were very patient with us.

This book and the thesis it is based on has been years in the making and in this process I have benefitted from discussions, advice and support by more people than I could possibly list here by name. My thanks go to all of you. My parents and my friends bore with me throughout this time and picked me up when it was all becoming too much. To the extent that this work has been a successful endeavour, you all contributed immeasurably to it. However, I firmly claim sole ownership of all remaining shortcomings.
