Acknowledgements —— V

List of figures —— XIII

List of tables —— XXIII

List of symbols and abbreviations —— XXVII

Huari Quechua morphological glosses —— XXIX

Glosses from other languages cited in this work —— XXXIII

1 Introduction —— 1

2 Data & general methods —— 4
2.1 Data collection —— **4**
2.2 Brief description of Huari and its linguistic situation —— **5**
2.3 Short sociolinguistic profile of the speakers —— **10**
2.4 Description of the experimental tasks —— **11**
2.5 Partial availability of the speech data used in the analysis —— **17**
2.6 General method —— **17**
2.7 Acoustical analysis, visualization and statistics —— **18**
2.8 A short note on examples —— **18**

3 Theoretical background and literature review —— 19
3.1 Introduction —— **19**
3.2 Prosodic units and their hierarchy —— **21**
3.2.1 Different kinds of evidence for the existence of prosodic units in languages —— **22**
3.2.2 Universal aspects of the prosodic hierarchy —— **24**
3.3 Intonation in the autosegmental-metrical model —— **25**
3.3.1 Stress and metrical structure —— **27**
3.3.2 Word stress crosslinguistically —— **28**
3.3.3 What is (not) known about stress in Quechua —— **32**
3.3.4 Pitch accents and arriving at phonological tones from pitch contours —— **38**
3.4 Intonation systems typologically —— **41**
3.4.1 Domains of tone assignment —— **41**

3.4.2 Tonal scaling and other gradual cues for prosodic constituency —— **42**
3.4.3 Tonal inventories —— **43**
3.4.4 Delayed peaks in Spanish and the notion of the nuclear accent —— **45**
3.4.5 Differing degrees of combinatorial freedom in the tonal make-up of prosodic constituents —— **47**
3.4.6 "Phrasing" and "Accenting" languages: An appropriate typology? —— **48**
3.4.7 Restrictions on combinatorial freedom —— **54**
3.5 Relation between tones and the segmental string: association and alignment —— **59**
3.5.1 Segmental anchoring in pitch accents —— **61**
3.5.2 Secondary association and tonal spreading —— **63**
3.5.3 Representational possibilities for the association and alignment of tones in languages without word stress —— **67**
3.5.3.1 French —— **67**
3.5.3.2 Tashlhiyt Berber —— **70**
3.5.3.3 Ambonese Malay —— **73**
3.6 Recursive prosodic structure —— **76**
3.6.1 The Strict Layer Hypothesis and prosody-syntax mapping —— **76**
3.6.2 Empirical evidence for recursive prosodic structure from systematic pitch scaling —— **80**
3.6.2.1 Stockholm Swedish —— **81**
3.6.2.2 British English —— **82**
3.6.2.3 Northern German —— **83**
3.6.2.4 European Portuguese —— **86**
3.6.2.5 (Tokyo) Japanese —— **90**
3.6.3 Separating arguments for prosodic recursion from assumptions of universality and a close prosody-syntax mapping —— **92**
3.6.4 What is (not) known about prosodic recursion in Spanish and Quechua —— **94**
3.7 Information structure and prosody —— **96**
3.7.1 Context and the question under discussion —— **97**
3.7.2 QUD-based annotation of information structure independent of form —— **102**
3.7.3 Prosodic cues and information structure —— **110**
3.7.3.1 Spanish —— **111**
3.7.3.2 (Cuzco) Quechua —— **120**

4 Refined research questions —— 128

5 Huari Spanish — 131
5.1 Simple utterances — **131**
5.1.1 "Main variant" neutral declaratives — **132**
5.1.1.1 Introductory description — **132**
5.1.1.2 Quantitative results on accentuation in data from Conc — **136**
5.1.2 Interrogatives — **147**
5.1.2.1 (Neutral) polar questions — **147**
5.1.2.2 Polar questions biased towards confirmation (in the maptasks) — **154**
5.1.2.3 Alternative questions — **162**
5.1.2.4 Wh-questions — **165**
5.1.2.5 Summary — **169**
5.1.3 Patterns of (information structurally-conditioned) variation in declaratives — **170**
5.1.3.1 Phrase accentuation — **170**
5.1.3.1.1 Broad or final narrow focus on an utterance — **175**
5.1.3.1.2 Coherent phrasing: Complements to relative clauses and others — **181**
5.1.3.1.3 Phrase accentuation as (individual) default? — **186**
5.1.3.2 Deaccentuation in declaratives — **189**
5.1.3.2.1 Deaccentuation in reversals vs. on given material — **193**
5.1.3.2.2 Deaccentuation on "parentheticals" and evaluative additions — **198**
5.1.3.3 Tonal target placement and epistemic biases — **202**
5.1.4 Interim summary — **211**
5.2 Complex utterances: "Double topic"-constructions and hierarchical tonal scaling structure — **212**
5.2.1 Data — **212**
5.2.2 Analysis of individual examples / "main" variant — **218**
5.2.3 Quantified analysis of hierarchical scaling structure via relational measurements — **225**
5.2.3.1 ELQUD-item 14 — **227**
5.2.3.2 ELQUD-item 26 — **229**
5.2.3.3 ELQUD-items 43 and 44 — **230**
5.2.3.4 ELQUD-item 52 — **234**
5.2.3.5 ELQUD-items 59 and 65 — **235**
5.2.3.6 Inferential statistical results — **238**
5.2.3.7 Discussion — **241**
5.2.4 Variant double-topic utterances with phrase accentuation — **247**
5.2.4.1 ZE55's 59 and 65 — **247**

5.2.4.2 NQ01's 59 and 65 —— **253**
5.2.4.3 XJ45's 59 and 65 —— **257**
5.2.5 Comparison between the variants —— **261**
5.3 OT-Analysis of the "main" and "phrase" accentuations and their relation to Quechua —— **271**
5.3.1 Variation in tone distribution for the phonological phrase and the intonational phrase —— **273**
5.3.2 Variation in association and alignment —— **281**
5.3.2.1 Main variant Spanish —— **284**
5.3.2.2 Phrase accentuation Spanish variant 1 (exemplified by speaker ZE55) —— **287**
5.3.2.3 Phrase accentuation Spanish variant 2 (exemplified by speakers XJ45 and NQ01) —— **289**
5.3.3 IP-final behaviour —— **291**

6 Huari Quechua —— 299
6.1 Description of Huari Quechua tonal contours —— **299**
6.1.1 Introduction to the rising and falling contours —— **300**
6.1.2 Alignment of the tonal transition with the word boundary —— **311**
6.1.3 Alignment with the phrase boundary and phrase-final devoicing —— **314**
6.1.4 Alignment with the word penult —— **323**
6.1.5 Contours on single-word phrases —— **326**
6.1.6 Peak alignment in rise-falling contours in Huari Quechua and Spanish —— **335**
6.1.7 Extent of the phonological phrase and mapping to other categories —— **348**
6.1.8 Marked tonal alignment on Spanish loanwords —— **353**
6.1.8.1 Description of the patterns —— **353**
6.1.8.2 A typological comparison —— **361**
6.1.8.3 Distribution of the loanword patterns across speakers and lexical items —— **372**
6.2 Phrasing and relation to meaning-based categories —— **382**
6.2.1 Brief excursion: The question of (polar) questions —— **384**
6.2.2 Moves with rising and falling contours in Conc —— **391**
6.2.3 Distribution of contours in nominal sequences —— **399**
6.2.3.1 Noun phrases and other nominal sequences —— **399**
6.2.3.2 Distribution of tonal patterns and alignment variant preferences —— **403**
6.2.3.3 Phrasal prominence and relation to information structure and information status —— **412**

6.3 OT-Analysis — **424**
6.3.1 Rise-falling contours — **428**
6.3.1.1 Word boundary-variant — **428**
6.3.1.2 Word penult-variant — **438**
6.3.2 Rising contours — **442**
6.3.2.1 Word boundary-variant — **443**
6.3.2.2 Word penult-variant — **449**
6.3.3 Only-falling contours — **449**
6.3.4 The marked loanword patterns and moving towards Spanish — **454**
6.4 Context-based analysis of prosodic and other cues to information structure — **456**
6.4.1 "Broad focus" in Cuento — **457**
6.4.1.1 First Cuento sequence: Establishing a default for broad focus — **458**
6.4.1.2 Second Cuento sequence: Syntactic and prosodic subordination — **463**
6.4.2 Complex contexts and marked prosody in Maptask — **468**
6.4.2.1 First sequence: Initial and final backgrounded constituents — **468**
6.4.2.2 Second sequence: Differential interpretations for initial elements — **472**
6.4.2.3 A positional template for information structural roles? — **477**
6.4.2.4 Third sequence: Cueing against context — **481**
6.4.3 Variability and conflicting cues in Conc — **485**
6.4.3.1 Cues to information structure in five examples from ZR29 & HA30's Conc — **486**
6.4.3.2 Comparison with further examples — **497**
6.4.4 Conclusions — **501**

7 Synthesis — 504
7.1 Huari Quechua result summary — **504**
7.1.1 Word prosodic profile of Huari Quechua — **504**
7.1.2 Observed patterns of intonational variation — **505**
7.1.2.1 Three tonal patterns — **505**
7.1.2.2 Alignment variants — **506**
7.1.3 The role of prominence and information structure — **510**
7.2 Huari Spanish result summary — **512**
7.2.1 Tonal inventory and encoding of pragmatic meaning via paradigmatic contrasts in Huari Spanish — **512**
7.2.2 Syntagmatic intonational contrasts: Deaccentuation and phrase accentuation — **514**
7.2.3 Hierarchical scaling contrasts and recursive prosodic structure — **515**
7.2.4 Relation between the observed variants — **516**

7.3 Conclusions and outlook —— **517**
7.4 Bringing Spanish and Quechua together —— **518**
7.4.1 Degrees of caring for stress in both languages and typological considerations —— **522**
7.4.2 Outlook —— **525**

Appendix A – Weblinks to the audio files —— 529

Appendix B – Maptask maps —— 535

Appendix C – Praat scripts —— 539
