

Acknowledgments

Writing this book has been an incredible journey, and we would not have been able to complete it without the support, guidance, and encouragement of many individuals.

First and foremost, we would like to thank God for providing the opportunity, believe in passion, hard work, and pursue dreams. In the process of putting this book together, it was realized how true this gift of writing is for anyone. This could never have been done without power provided by you and, of course, the faith in You, the Almighty.

We thank our families for having the patience with us for taking yet another challenge that decreases the amount of time we could spend with them. They were our inspiration and motivation, and their constant encouragement and late-night brainstorming sessions were invaluable. The unwavering support and insightful feedback helped to shape the direction of this book, and to say least, their belief in our vision made all the difference.

We would like to thank our parents and grandparents for allowing us to follow our ambitions.

We would like to thank all of our colleagues and friends in different parts of the world for sharing ideas in shaping our thoughts.

We would also like to thank the reviewers, the editorial board members, project development editor, and the complete team of De Gruyter for their constant and consistent guidance, support, and cooperation at all stages of this project. Their effort in every phase, from inception to execution, cannot be expressed in words. Your keen eye and thoughtful suggestions helped in bringing clarity and polish to this manuscript. We deeply appreciate your hard work and dedication, support, and cooperation rendered to the project.

A special thank you to our colleagues and mentors who provided guidance, inspiration, and the occasional push when it was most needed.

Finally, we are grateful to our readers, whose curiosity and passion are the real motivation behind this work. It is our hope that this book inspires, educates, or simply entertains in the way we intended. Our efforts will come to a level of satisfaction if the students, researchers, and professionals concerned with all the fields related to new and smart materials, in particular, and product development, in general, gets benefitted.

Thank you all for being a part of this journey.

Kaushik Kumar
