Preface — V

Acknowledgments — IX

1 Introduction and historical perspective — 1

- 1.1 Introduction — **1**
- 1.2 Classes of materials and their uses — **1**
- 1.3 Intelligent/smart materials — **3**
- 1.4 Evaluation of materials science — **3**
- 1.5 Structural materials — **5**
 - 1.5.1 Types of structural materials — **5**
 - 1.5.1.1 Metals — **5**
 - 1.5.1.2 Concrete — **7**
 - 1.5.1.3 Wood — **9**
 - 1.5.1.4 Polymers — **11**
 - 1.5.1.5 Ceramics — **13**
- 1.6 Functional materials — **15**
- 1.7 Polyfunctional materials — **22**
- 1.8 Generation of smart materials — **24**
- 1.9 Diverse areas of intelligent materials — **27**
- 1.10 Primitive functions of intelligent materials — **31**
- 1.11 Intelligent inherent in materials — **33**
- 1.12 Examples of materials — **36**
 - 1.12.1 Intelligent materials — **36**
- 1.13 Structural materials — **39**
 - 1.13.1 Electrical materials — **41**
 - 1.13.2 Biocompatible materials — **44**
- 1.14 Intelligent biological material — **47**
- 1.15 Biomimetic materials — **50**
- 1.16 Technological applications of intelligent materials — **52**
- 1.17 Summary — **54**
 - Review questions — **54**

2 Smart materials and structural systems — 56

- 2.1 Introduction — **56**
- 2.2 The principal ingredients of smart materials — **56**
- 2.3 Thermal materials — **57**
 - 2.3.1 Types of thermal materials — **57**

2.3.1.1	Conductive materials —	57
2.3.1.2	Insulating materials —	59
2.3.1.3	Phase change materials (PCMs) —	61
2.4	Sensing technologies —	62
2.5	Microsensors —	64
2.6	Hybrid smart materials —	65
2.7	Algorithm for synthesizing smart material —	66
2.8	Passive sensory smart structure —	68
2.9	Reactive actuator-based smart structures —	69
2.10	Active sensing and reactive smart structures —	70
2.11	Smart skins: aeroelastic tailoring of airfoils —	71
2.12	Synthesis of future smart systems —	72
2.13	Summary —	74
	Review questions —	74
3	Electrorheological (fluids) smart materials —	77
3.1	Introduction —	77
3.2	Suspensions and electrorheological fluids —	77
3.3	Bingham body model —	78
3.4	Newtonian viscosity and non-Newtonian viscosity —	80
3.4.1	Newtonian viscosity —	80
3.4.2	Non-Newtonian viscosity —	80
3.5	Principal characteristics of electrorheological fluids —	81
3.6	The electrorheological phenomenon —	84
3.7	Charge migration mechanism for the dispersed phase —	84
3.8	Electrorheological fluid domain —	84
3.9	Electrorheological fluid actuators —	85
3.9.1	ER fluid dampers —	86
3.9.2	ER fluid clutches —	87
3.9.3	ER fluid brakes —	88
3.9.4	ER fluid valves —	89
3.9.5	ER fluid actuators for precision control —	90
3.10	Electrorheological fluid design parameter —	91
3.11	Applications of electrorheological fluids —	92
3.12	Summary —	93
	Review questions —	93

4 Piezoelectric smart materials — 96

- 4.1 Introduction — 96
- 4.2 Background — 96
- 4.3 Electrostriction — 97
- 4.4 Pyroelectricity — 97
- 4.5 Piezoelectricity — 98
- 4.6 Industrial piezoelectric materials — 98
- 4.7 PZT film — 100
- 4.8 PVDF film — 102
- 4.9 Properties of commercial piezoelectric materials — 105
- 4.10 Properties of piezoelectric film — 106
- 4.11 Smart materials featuring piezoelectric elements — 108
- 4.12 Smart composite laminate with embedded piezoelectric actuators — 112
- 4.13 SAW filters — 115
- 4.14 Summary — 118
- Review questions — 119

5 Shape-memory (alloys) smart materials — 121

- 5.1 Introduction — 121
- 5.2 Background on shape-memory alloys (SMA) — 121
- 5.3 Nickel alloys — 122
- 5.4 Titanium alloy (nitinol) — 124
- 5.5 Material characteristics of nitinol — 125
- 5.6 Martensitic transformations — 126
- 5.7 Austenitic formations — 128
- 5.8 Thermoelastic martensitic transformations — 129
- 5.9 Cu-based SMA — 130
- 5.10 Chiral materials — 131
- 5.11 Applications of SMA — 132
- 5.12 Continuum applications of SMA fasteners — 132
- 5.13 SMA fibers — 134
- 5.13.1 Reaction vessels — 135
- 5.13.2 Nuclear reactors — 137
- 5.13.3 Chemical plants — 138
- 5.14 Microrobot actuated by SMA — 139
- 5.15 SMA memorization process — 140
- 5.16 SMA blood clot filter — 141
- 5.17 Impediments to applications of SMA — 142

5.18	SMA plastics —	143
5.19	Potential applications of SMA plastics —	145
5.20	Summary —	146
	Review questions —	147

Authors' bibliography — 149

Bibliography — 151

Index — 155
