

Contents

1 Introduction — 1

- 1.1 Objectives and benefits of the book — 1
- 1.2 UML/SysML as a means of description – a brief overview — 1
- 1.3 Possible applications of the book in industry, training and teaching in higher education — 5
- 1.4 Tools considered for modelling — 7
 - 1.4.1 Using Visio — 8
 - 1.4.2 Using PowerPoint — 8
 - 1.4.3 Benefits of Enterprise Architect for high-level language software — 8
 - 1.4.4 Use of UML for automation and control software — 9

2 Top-down-modeling of a packstation with UML — 13

3 Modeling of an evolving automated production system with UML — 27

- 3.1 Variant modeling of the PPU or xPPU from the manufacturer's perspective — 32
 - 3.1.1 Object Diagram versus Class Diagram for variants — 39
- 3.2 Second extension of the xPPU – changing the workpiece sequence during transport — 42
- 3.3 Sequence Diagram for test case description — 46
- 3.4 Relationship between test case and requirements modeling — 51

4 Interdisciplinary modeling – systems engineering with the Systems Modeling Language (SysML) — 55

- 4.1 Advantages of the Internal Block Diagram compared to the Class Diagram or Block Definition Diagram — 55
- 4.2 SysML-Profiles for special application areas — 68
- 4.3 SysML and/or Matlab/Simulink — 68
- 4.4 Profiles for automation — 69

5 Exercises — 73

- 5.1 Cable car system: Use Case and Sequence Diagram — 73
 - 5.1.1 Use Case Diagram — 73
 - 5.1.2 Sequence Diagram — 73
- 5.2 Baking plant: Behavioral modeling — 74
 - 5.2.1 Use Case Diagram — 74
 - 5.2.2 Sequence Diagram for “Refill Ingredients” — 75
 - 5.2.3 Activity Diagram — 75
- 5.3 Shopping assistant: Activity Diagram — 76
- 5.4 Filling plant: Activity Diagram — 76

5.5	Cable car system: Class Diagram —	77
5.6	Baking plant: Class and State Diagram of the mixer —	78
5.6.1	Relationships in the Class Diagram —	78
5.6.2	State Diagram —	79
5.7	Sorting workpieces: State Diagram —	79
5.8	Conveyor belt: State Diagram —	80
5.9	Ticket purchase: State Diagram —	81
5.10	Shopping assistant: State Diagram —	81
5.11	Liquid storage: SysML BDD and IBD —	82
5.11.1	Block Definition Diagram (BDD) —	82
5.11.2	Internal Block Diagram (IBD) —	83
5.12	Stamping system: IBD —	83
5.13	Overall Task SysML: Intralogistics System —	83
5.13.1	Requirements Diagram —	85
5.13.2	Sequence Diagram —	86
5.13.3	Block Definition Diagram —	87
5.13.4	Parametric Diagram —	88
5.13.5	State Diagram —	89

6 Solutions to the practice exercises from Chapter 5 — 91

6.1	Cable car system: Use Case and Sequence Diagram —	91
6.1.1	Use Case Diagram —	91
6.1.2	Sequence Diagram —	92
6.2	Baking plant: Behavioral modeling —	93
6.2.1	Use Case Diagram —	93
6.2.2	Sequence Diagram for “Refill ingredients” —	94
6.2.3	Activity Diagram —	95
6.3	Shopping assistant: Activity Diagram —	96
6.4	Filling station: Activity Diagram —	97
6.5	Cable car system: Class Diagram —	98
6.6	Baking plant: Class and State Diagram of the mixer —	99
6.6.1	Relationships in a Class Diagram —	99
6.6.2	State Diagram —	100
6.7	Sorting workpieces: State Diagram —	101
6.8	Conveyor belt: State Diagram —	102
6.9	Ticket purchase: State Diagram —	103
6.10	Shopping assistant: State Diagram —	104
6.11	Liquid storage: SysML BDD and IBD —	105
6.11.1	Block Definition Diagram (BDD) —	105
6.11.2	Internal Block Diagram (IBD) —	106
6.12	Stamping system: IBD —	107
6.13	Overall task SysML: Intralogistics System —	108

- 6.13.1 Requirements Diagram — 108
- 6.13.2 Sequence Diagram — 109
- 6.13.3 Block Definition Diagram — 110
- 6.13.4 Parametric Diagram — 111
- 6.13.5 State Diagram — 113

A Notation overview of UML- and SysML-diagrams — 115

- A.1 UML-Diagrams — 115
 - A.1.1 UML Use Case Diagram — 115
 - A.1.2 UML Sequence Diagram — 116
 - A.1.3 UML Activity Diagram — 117
 - A.1.4 UML Class Diagram — 118
 - A.1.5 UML Object Diagram — 119
 - A.1.6 UML State Diagram — 119
- A.2 SysML Diagrams — 120
 - A.2.1 Requirements Diagram — 120
 - A.2.2 Block Definition Diagram (BDD) — 121
 - A.2.3 Internal Block Diagram (IBD) — 122
 - A.2.4 Parametric Diagram (PAR) — 123
