Laura Giacomini, Valentina Piuanno

Patterns of meaning in lexicography and lexicology — 1

Section 1: **Lexicographical issues: The phraseological dimension of language in learner's lexicography and the PhraseBase project**

Laura Giacomini

Introduction to the PhraseBase project — 15

Paolo V. DiMuccio-Failla

A theory for a usage-based cognitive lexicography — 19

Fritz Kliche, Laura Giacomini

Exploring BERT's contextualized word embeddings: A suitable method for a lexicography-oriented analysis of argument structures? — 91

Rufus H. Gouws

Towards a phrase-based active dictionary — 111

Section 2: **Theoretical issues**

Elisabetta Ježek, Costanza Marini, Emma Romani

Verb senses and argument semantics: From linguistic theory to lexicographic practice — 119

Marco Fasciolo

Valency vs. Patterns: What do corpora tell us about argument structure? — 139

Elmar Schafroth

***Layer upon layer, mistake after mistake* – a case for learner's dictionaries? — 159**

Valentina Piuanno

Patterns of meanings between syntax and lexicon. A lexicological and lexicographic overview of Italian partially lexically specified constructions — 181

Thomas Herbst, Peter Uhrig

***A carry-coals-to-Newcastle* exercise: The nature of phraseological units and their place in a construction of English — 207**

Section 3: **Methodological issues**

Martina Nied Curcio

Language Awareness as a prerequisite for a successful use of lexicographic resources — 239

Irene Renau

Regular polysemy in Spanish nouns: Corpus analysis and some implications for lexicography — 257

Luisa Giacoma

No word is an Island: The phraseological nature of lemma in interlingual comparison — 277

María José Domínguez Vázquez

Analysing, compiling, and representing argument pattern structures: From form to meaning and back — 297
