ACKNOWLEDGEMENTS	VII
INTRODUCTION	IX
CHAPTER 1: THE SYNTAX OF COORDINATION	1
1. Phrasal conjunction: initial vs. non-initial coordination	1
1.1. VP structures and underlying SOV	7
1.2. S structures	13
2. Coordination of nonconstituents	16
2.1. Gapping	18
2.1.1. Major Constituency	19
2.1.2. Variables as targets for deletion or interpretation	19
2.1.3. Multiple target deletion	22
2.1.4. Island sensitivity	23
2.1.5. The domains of Gapping	24
2.1.6. The Coordinate Structure Constraint and across-the-board applications	30
2.1.7. Conclusion: the formulation of Gapping	37
2.2. Backward Conjunction Reduction	39
2.2.1. Major Constituency	40
2.2.2. The target of Backward Conjunction Reduction	41
2.2.3. One target deletion	42
2.2.4. Island sensitivity	43
2.2.5. The domains of Backward Conjunction Reduction	45

3. Limitations in descriptive devices	47
3.1. Phrasal conjunction vs. restructuring/ relabeling	47
3.2. Forward Conjunction Reduction	50
3.3. Left Peripheral Deletion	57
3.4. Conjunct Movement	62
Footnotes to chapter 1	66
 CHAPTER 2: THE RULE OF GAPPING	 73
1. Earlier rules of Gapping	73
1.1. Hankamer's Unacceptability	73
1.2. Stillings 1975	76
1.3. Langendoen 1975	81
1.4. Kuno 1976	82
2. Descriptive adequacy	85
2.1. The domain of the rule	87
2.2. The remnants	89
2.3. The gaps	93
2.4. Consequences for the formulation of Gapping	95
3. Recoverability	97
Footnotes to chapter 2	107
 CHAPTER 3: CONSTRAINTS	 109
1. Constraining the remnants	110
1.1. Major Constituency	110
1.2. Fiengo's Head Condition reformulated as a Maximization Principle	113
1.3. Variations on A-over-A	116
1.4. Sag versus Hankamer	122
1.5. Conclusion	128
2. Constraints on the gaps	129
2.1. Observations	129
2.1.1. Similarities between movement and deletion	129
2.1.2. The (Complex) NP Constraint	133

2.1.3. The WH-island Constraint	137
2.1.4. The Sentential Subject Constraint	139
2.1.5. The Tensed S Condition	141
2.2. Effects on the theory	149
2.2.1. Subjacency	149
2.2.2. Binding Conditions	154
2.2.3. The Bounding Condition (Koster 1978b)	162
2.2.4. A proposal by Zwarts (1978)	167
2.2.5. Subjacency reformulated	174
2.2.5.1. Parameters of Subjacency	175
The choice of cyclic nodes	175
The number of cyclic nodes	177
The position of the cyclic boundaries	178
2.2.5.2. Strict Subjacency	180
2.2.5.3. The interaction of Gapping and WH-movement	185
3. Conclusions	188
Footnotes to chapter 3	191
