

List of tables

Table 1.1:	The catalogue's metal, bone and glass jewellery and clothing accessories, divided as to time frame — 37
Table 1.2:	Comparison between the coinage periods according to the Ravetz-Lallemand method and Reece — 41
Table 1.3:	Breakdown of the total number of coins from Tongeren based on the metal used, classified according to the Reece method — 43
Table 1.4:	Typologies of coins, divided according to the Ravetz-Lallemand method — 44
Table 1.5:	Number of coins per mint, divided according to the Reece method — 48
Table 1.6:	Percentage share of coins per mint, divided according to the Reece method — 49
Table 1.7:	Overview of absolute numbers and imitations' percentages, divided into eight periods following the Reece coin periods — 50
Table 2.1:	Summary of the assessment of older collections from Tongeren — 99
Table 3.1:	Mean of the burial depths in three periods, number of burials and the standard deviation — 184
Table 3.2:	Mean of the burial depths in the late Roman period, divided into the three burial grounds, number of burials and the standard deviation — 185
Table 3.3:	Distribution of the number and percentages of graves, divided into two periods ("Frankish" considered the third "period") over the three burial fields — 189
Table 3.4:	Distribution of the number and percentages of grave gifts, divided into five categories and two totals over the three burial fields and other locations — 190
Table 3.5:	Type of burials (numbers and percentages) in the southwestern burial field, divided into periods, using data set 3 — 202
Table 3.6:	Number and percentages of grave gifts in the southwestern burial field, divided into periods and types of burials, using data set 3 — 203
Table 3.7:	Type of burials (numbers and percentages) in the northern burial field, divided into periods, using dataset 3 — 210
Table 3.8:	Type of burials (numbers and percentages) in the eastern burial field, divided into periods, using dataset 3 — 217
Table 3.9:	Overview of the number and percentages of grave gifts in the eastern burial field, divided into periods and types of burials, using dataset 3 — 217
Table 3.10:	The late Roman and early medieval solitary and/or burials with mention of the finding location, find date, dating of the burial and period and description — 225
Table 3.11:	Contemporary streets divided into a zone inside the fourth-century city wall, and one outside that wall (E, S and SW) — 227
Table 3.12:	Preliminary overview by Willy Vanvinckenroye on late Roman coins found in Tongeren (1985) — 248
Table 3.13:	Number of coins from Tongeren, sorted by emperor, with an indication of the percentage of this group and the average number of coins per regnal year known of the emperor in question — 253
Table 3.14:	Number of coins, divided per data set and Reece period — 258
Table 3.15:	Percentages of coins, divided per data set and Reece period — 258
Table 3.16:	Overview of the coins found in Tongeren, dated between 408 and circa 500 — 268
Table 3.17:	Overview of the redefining of the dating of the eight Hübener groups — 270
Table 3.18:	Count of the late-Roman pottery (375–475/500 CE), based on a number of 2,618 fragments of pottery, making it 8,29% of the total number — 274
Table 3.19:	Overview of the numbers and percentages of pottery with roulette decoration, divided per site — 276

Table 3.20:	Overview of the numbers and percentages of pottery with roulette decoration, divided per site. Taking also the undetermined roulette decorations into account — 276
Table 3.21:	Overview of the numbers and percentages of pottery with roulette decoration divided in Hübener groups and per site — 277
Table 3.22:	Overview of the means and standard deviation of numbers of pottery with roulette decoration, divided per site — 277
Table 3.23:	Overview of the numbers and percentages of pottery, divided per site and according to the mention of their appearance (“rough” or “smooth” walled) and the presence of bowls and mortaria and indented beakers and in-motto beakers — 278
Table 3.24:	Overview of the types and forms of pottery (numbers and percentages), divided into site groups — 279
Table 3.25:	Report showing the mean number of weapons per grave, divided per period with the standard deviation — 295
Table 3.26:	Overview of the number of grave gifts in the weapon graves — 297
Table 3.27:	Weapon graves and non-weapon graves, subdivided according to the number of knives, coins, jewels and glass items that each type contains (in absolute numbers and percentages) and absolute and average numbers of grave gifts per grave — 298
Table 3.28:	Overview of weapon graves (inhumation and cremation) with weapons and accompanying jewellery — 298
Table 3.29:	Overview of the average number of pottery, glass, jewellery and coins given as gifts to weapon graves (inhumation and cremation), cremation and inhumation graves that are not weapon graves, and cremation graves with glass as gifts — 299
Table 3.30:	Overview of the number and percentages of terra sigillata mentioned as grave gifts of cremation and inhumation graves (non-weapon graves) and weapon graves (cremation and inhumation) — 300
Table 4.1:	Comparison of the bishop’s lists by several authors — 421
Table 4.2:	Radiocarbon dates of human remains found during the excavations in the church of Our Lady of 1997–2013 — 491
Table 4.3:	Overview of different ways of dating and classification of early medieval (groups of) objects — 519
