

About the author

Dr. Guillem Gilabert-Oriol holds a Master's Degree in Chemical Engineering and Processes from Rovira i Virgili University, earned in 2008. He began his career as a Research and Development Scientist at The Dow Chemical Company in 2010, working at the Global Water Technology Center in Tarragona, Catalonia, Spain. He completed his PhD in Ultrafiltration and took on leadership of the Reverse Osmosis Antifouling team in 2013.

Currently, Dr. Gilabert-Oriol serves as the Global Desalination Research & Development Leader at DuPont Water Solutions, a position he has held since 2019. In 2023, he became the head of the Tarragona Research & Development team. In addition to his role at DuPont, he is an Assistant Professor at Rovira i Virgili University in Tarragona, where he shares his expertise in water treatment technologies.

A passionate advocate for water management, Dr. Gilabert-Oriol is dedicated to the crucial role water plays in sustaining human life, improving quality of life, and fostering sustainable economic development.
