Foreword — V

Acknowledgments — VII

Introduction — 1

Part 1: **Issues Concerning the Transition from Artificial Narrow Intelligence to Artificial General Intelligence**

Part 1.1: **Origin, Self-Emergence, Future Trajectories from ANI to AGI**

Chapter 1

How Might Artificial General Intelligence Emerge? — 11

Chapter 2

Trajectories for AGI, if not Governed or Governed Badly. What Might
Happen? — 20

Chapter 3

What Initial Conditions, Rules, Regulations, and Guardrails for AGI should we
Pursue now? — 28

Part 1.2: **Value Alignment, Morality, and Values**

Chapter 4

Drawing on the Work of the Global Partnership on AI, UNESCO, and Others
that have Already Identified Norms, Principles, and Values, what Additional
or Unique Values should be Considered for AGI? — 35

Chapter 5

How can Alignment be Achieved? If it is not Possible, then what is the Best
Way to Manage this Situation? — 39

Part 1.3: Governance and Regulations

Chapter 6

How to Manage the International Cooperation Necessary to Build a Global Governance System, While Nations and Corporations are in an Intellectual “arms race” for Global AGI Leadership? — 47

Chapter 7

What are the Options for Successful Governance of the Emergence of AGI? — 53

Chapter 8

What Risks Arise from Attempts to Govern the Emergence of AGI? Might Some Measures be Counterproductive? — 58

Chapter 9

Should Future AGI Varieties be Given Rights? — 61

Chapter 10

How can a Governance System be Flexible Enough to Respond to New Issues Previously Unknown at the Time of Creating that Governance System? — 64

Chapter 11

What International Governance Trials, Tests, or Experiments can be Constructed to Inform the Text of an International AGI Agreement? — 66

Chapter 12

How can International Treaties and a Governance System Prevent Increased Centralization of Power Crowding Out Others? — 69

Chapter 13

Where is the Most Important or Insightful Work Today being Conducted on Global Governance of AGI? — 72

Chapter 14

What Enforcement Powers will be Needed to Make a United Nations Convention on AGI Effective? — 74

Part 1.4: Control

Chapter 15

How can the Use of AGI by Organized Crime and Terrorism be Reduced or Prevented? — 79

Chapter 16

Assuming AGI Audits would have to be Continuous Rather than One-time Certifications, How would Audit Values be Addressed? — 82

Chapter 17

What Disruptions could Complicate the Task of Enforcing AGI Governance? — 84

Chapter 18

How can a Governance Model Correct Undesirable Action Unanticipated in Utility Functions? — 86

Chapter 19

How will Quantum Computing Affect AGI Control? — 89

Chapter 20

How can International Agreements and a Governance System Prevent an AGI “arms race” and Escalation from Going Faster than Expected, Getting Out of Control and Leading to War, be it Kinetic, Algorithmic, Cyber, or Information Warfare? — 91

Chapter 21

What Additional Issues and/or Questions Need to be Addressed to have a Positive AGI Outcome? — 95

Part 2: Potential Regulations and Global Governance Models

Part 2.1: Executive Summary of Recommendations from this Research

Part 2.2: Real-Time Delphi Results

Question 1: What Design Concepts should be Included for a UN AGI Agency to Certify National Licensing of Nonmilitary AGI Systems? — **113**

Question 2: What should be Part of the UN Agency's Certification of National Licensing Procedures for AGI Nonmilitary AGI Systems? — **116**

Question 3: What Rules should be Part of a Nonmilitary AGI Governance System? — **119**

Question 4: What Additional Design Concepts should be Included for a United Nations AGI Agency to Certify National Licensing of Nonmilitary AGI Systems? — **122**

Question 5: What Else Should be Part of the UN Agency's Certification of National Licensing Procedures for AGI Nonmilitary AGI Systems? — **124**

Question 6: What Additional Rules should be Part of a Nonmilitary AGI Governance System? — **126**

Question 7: How Effective Would a Multiagency Model with a UN AGI Agency as the Main Organization But with Some Governance Functions Managed by the ITU, WTO, and UNDP? — **128**

Question 8: How Effective Would it be to Put all the Most Powerful AI Training Chips and AI Inference Chips into a Limited Number of Computing Centers Under International Supervision, with a Treaty Granting Symmetric Access Rights to all Countries Party to That Treaty? — **131**

Question 9: How Effective Would a Multistakeholder Body (TransInstitution) in Partnership with a System of Artificial Narrow Intelligences, Each ANI to Implement Functions, Requirements (listed above) Continually Feeding Back to the Humans in the Multistakeholder Body and National AGI Governance Agencies be? — **133**

Question 10: How Effective Would it be to Create Two Divisions in a UN AI Agency: One for ANI Including Frontier Models and a Second Division Just for AGI? — **136**

Question 11: How Effective Would a Decentralized Emergence of AGI That no one owns (like no one owns the Internet) be Through the Interactions of Many AI Organizations and Developers Like SingularityNet? — **138**

Question 12: Describe the Global Governance Model you Think will Work to Manage the Development and Use of AGI — **141**

Part 3: If Humans were Free—The Self-Actualization Economy a 2050 Scenario Made Possible by AGI

Introduction — **149**

And Now the Scenario — **150**

Factors Reducing the Cost of Living — **152**

New Income Sources for the Self-Actualization Economy — **153**

Some Technological Factors —	156
Changing Nature of Work and Economic Culture —	159
Some New Institutions for Old Problems —	161
Ending Comments. . . —	163

Part 4: Conclusions, Recommendations, and Remaining Issues

Next Steps on Governance of the Transition to AGI —	167
The Structure and Management of a Potential UN AGI Agency —	169
Actions to Make Future of Work More Successful in the AGI Future —	172
Government and Governance Actions —	172
Business and Labor Actions —	174
Science and Technology Community Actions —	175
Education and Learning Actions —	176
Culture, Arts, and Media Action —	177
AGI Leading to the Self-Actualization Economy —	178
Some Pending Key AGI Issues —	180
Energy —	180
Only One Shot to Get it Right —	181
Increasing Centralization of Power —	181
Alignment Reliability —	182
A Parting Note —	183

Appendices

Appendix A: The Millennium Project Nodes —	187
Appendix B: The Millennium Project AGI Team —	197
Appendix C: AGI Experts and Thought Leaders Featured in Part 1 —	199
Appendix D: List of Questions for the Governance of AGI in Part 1 —	201
Appendix E: Regional Demographics/Region Percentage —	203
Appendix F: Real-Time Delphi Participants Featured in Part 2 —	205
List of Abbreviations —	213
List of Figures —	215
Index —	217
