

CONTENTS

SECTION I. GENERAL

Thermodynamics of Protein-Ligand Interactions <i>by F.M. Pohl</i>	3
Discussion.....	14
Classification of Transport Mechanisms by Non-Equilibrium	
Thermodynamics <i>by O. Kedem</i>	15
Discussion	25
Chemical Relaxation Spectrometry: Investigation of Mechanisms	
Involved in Membrane Processes <i>by H. Ruf, I. Oberbäumer and</i>	
<i>E. Grell</i>	27
Discussion	45
¹³ C NMR Studies of Glycolysis in Suspensions of <i>Escherichia Coli</i>	
Cells <i>by R.G. Shulman, T.R. Brown, J.A. den Hollander and</i>	
<i>K. Ugurbil</i>	47
Discussion	52

SECTION II. SELECTED TRANSPORT PROTEINS

Serum Albumin as a Transport Protein <i>by T. Peters, Jr. and</i>	
<i>R.G. Reed</i>	57
Discussion	74
Ligandin and Protein A: Intracellular Binding Proteins <i>by</i>	
<i>B. Ketterer, T. Carne and E. Tipping</i>	79
Discussion	92
The Absence of Heme-Heme Interaction at the Iron Atoms of	
Hemoglobin <i>by R.G. Shulman</i>	95
Discussion	100
Multienzyme Complexes. Molecular Organization and Functional	
Interaction of Active Sites within the Fatty Acid Synthetase	
Multienzyme Complex of Yeast <i>by E. Schweizer and F. Lynen</i>	103
Discussion	118
Modes of Redox-Transport by Proteins: "Hydride" and "Carbanion"	
<i>versus</i> Electron Transport <i>by P. Hemmerich</i>	123
Discussion	146

The Mechanism of Energy Transduction in Photophosphorylation by <i>M. Avron</i>	151
Discussion	167
SECTION III. MEMBRANES AND TRANSPORT BY PROTEINS	
Proteins in Mitochondrial Calcium Transport by <i>E. Carafoli, K. Schwerzmann, I. Roos and M. Crompton</i>	171
Discussion	185
Conformational Changes and Cooperativity in the Mechanism of Proton Transfer in Bacteriorhodopsin by <i>B. Hess, R. Korenstein and D. Kuschmitz</i>	187
Discussion	198
Proteins of Bacterial Active Transport Systems by <i>W. Boos</i>	199
Discussion	212
The Dependence of Mediated Transport Systems on the Cholesterol Content of the Membrane by <i>W. Wilbrandt and C. Becker</i>	215
Discussion	220
Ion Channels in Excitable Membranes by <i>F. Hucho</i>	221
Discussion	236
SECTION IV. METAL TRANSPORT BY PROTEINS	
Ferritin Iron Deposition and Mobilisation: Molecular Mechanisms and Cellular Consequences by <i>R.R. Crichton</i>	243
Discussion	255
The Ferritin Molecule: A Sink and a Source by <i>P.M. Harrison, S.H. Banyard, G.A. Clegg, D.K. Stammers and A. Treffry</i>	259
Discussion	272
Thermodynamic and Accessibility Factors in the Specific Binding of Iron to Human Transferrin by <i>P. Aisen and A. Leibman</i>	277
Discussion	291
Heme Transport and Properties of Hemopexin by <i>U. Muller-Eberhard</i> ...	295
Discussion	309
A Genetic Defect in the Transport of Ceruloplasmin Copper from Blood to Bile as the Possible Pathogenesis of Wilson's Disease by <i>I.H. Scheinberg</i>	311
Discussion	320

SECTION V. MOLECULAR ASPECTS OF TRANSPORT BY PROTEINS IN
PHYSIOLOGY AND PHARMACOLOGY

Pharmacological Consequences of Plasma Protein and Tissue	
Binding of Drugs <i>by M.H. Bickel</i>	325
Discussion	336
The Effects of Tryptophan and Tyrosine Modification on the Drug-	
Binding Properties of Human Serum Albumin <i>by W.E. Müller,</i>	
<i>K.J. Fehske and U. Wollert</i>	341
Discussion	352
Transfer of Ferriprotoporphyrin IX from Human Serum Albumin to	
Apomyoglobin in Aqueous Solution <i>by G. Blauer and J. Silfen</i>	355
Discussion	366
The Role of Intracellular Proteins in the Transport and	
Metabolism of Lipophilic Compounds <i>by E. Tipping and</i>	
<i>B. Ketterer</i>	369
Discussion	383
Binding Proteins in Plasma and Liver Cytosol, and Transport	
of Bilirubin <i>by J.A.T.P. Meuwissen and K.P.M. Heirwegh</i>	387
Discussion	401
Concluding Remarks <i>by P. Aisen</i>	405
Index of Contributors	409
Subject Index	411
