

Contents

K. H. STEINKRAUS: Solid-State (Solid-Substrate) Food/Beverage Fermentations Involving Fungi	83
F. KUDREWIZKI: Scaling-Up of Aerobic Microbiological Process, Part I. Mass Transfer	89
V. A. SERGEEV, V. M. SOLOŠENKO, M. G. BEZRUKOV, M. B. SAPOROVSKAJA: Comparision Characteristics of Isolates of the Total Proteins of Yeast in Dependence of the Conditions of their Isolation (in German)	105
F. GLOMBITZA, B. HEINRITZ, M. RINGPFEIL: Use of Thermodynamic and Kinetic Laws for an Interpretation of the Term „Physiological State“ of Yeast Populations (in German)	117
S. B. MUTAFOV, I. G. MINKEVICH, V. K. EROSHIN: Study of Energetic Indexes of the Growth Efficiency of the Yeast <i>Hansenula polymorpha</i> on Various Substrates (in Russian)	125
B. VOIGT, H. REUTGEN, M. WORBS, I. SESSER: Investigations of Enrichment of Ubichinon-9 from Lipid-Hydrocarbon-Fractions by Means of Sephadex LH 20 (in German)	137
M. PRAUSE, H. J. SCHULZ, D. WAGLER: Computer Aided Fermentation Processes (in German)	143
N. KOSARIC, S. L. ONG, Z. DUVNJAK, A. MOSER: Fuel Alcohol Production by <i>Zymomonas Anaerobia</i> : Kinetics	153
D. K. SANDHU, D. MONDAL, M. S. SIDHU: Utilization of Cellobiose and Production of β -Glukosidase by Nine Yeast Species	163
Z. ZAKOWSKA, A. JALOCZA: Separation of Some Fractions of Sugar Beet Molasse which are Toxic in Production of Citric Acid (in German)	171
P. ALEKSIEVA, I. GRIGOROV, A. DJEROVA, P. SHEREMETSKA, B. TCHORBANOV: Submerged Cultivation of a Fungal Mutant Strain <i>Humicola lutea</i> 120-5 Producing Acid Proteinases	179
Short Communication	
D. BECKMANN, I. METZE, H. RHEINLÄNDER: A New CO ₂ -Incubator for Biological Research (in German)	187
Report	191
Book Reviews	116, 142, 152, 186
