Vorbemerkung zu Band b des Berichtes

Seite

Address of Welcome by K. MOTHES

I. Passive permeability and water, models

D. WOERMANN

Transport of matter across synthetic membranes. a 1*

Discussion b 1

J. D. KHOLODOVA and Z. A. SOROKINA

Ion binding by polyelectrolytes as a possible source of accumulation of ions in cells. a 15

Discussion b 5

W. URL

Unity and diversity in permeability a 17

Discussion b 7

W. P. ANDERSON

The water permeability of the cells of Zea mays roots a 29

Discussion with a contribution of

G. HÜBNER

Water permeability of plant cells b 13

II. Different aspects of transport

E. SCHNEFF

Transport by compartments. a 39

Discussion b 19

R. K. SALYAEV

Especially features of uptake of substances by plant cells a 51

Discussion b 21

R. K. SALYAEV and M. P. SALYAEVA

The structure and functions of thick-wall granules or "transosomes". a 59

Discussion b 23

M. GIBBARDT

Morphologische Korrelate von Transportvorgängen in Zellen und Organellen (mit Film) . . . b 25

Discussion b 36

A. L. KURSANOV

Free space and transport of metabolites in parenchymal tissues (paper read by title) a 63

J. WILLENBRINK

Relations between metabolism of the phloem and longdistance translocation of assimilates . . b 39

K. MOTHES

Plant hormones and transport b 43

* Contributions labelled with "a" are published in Proceedings Volume a:

Internationales Symposium „Stofftransport und Stoffverteilung in Zellen höherer Pflanzen“. Reinhardtbrunn 1968. Symposiumsbericht Band a (Vorabdruck wissenschaftlicher Beiträge). Herausgegeben von K. MOTHES, E. MÜLLER, A. NELLES und D. NEUMANN, Abhandlungen der Deutschen Akademie der Wissenschaften zu Berlin, Klasse für Medizin (1968) Nr. 4a.

IV

	Seite
E. MÜLLER	
Regulation of transport.	a 81
E. MÜLLER, H. PASCHINGER and H. LUX	
Cellular protein synthesis, active transport and regulation. Experimental contributions to the problem of transport regulation	b 49
Discussion	b 62
U. LÜTTGE	
Betrachtung des Ionentransportes im Zusammenhang mit der Kompartimentierung pflanzlicher Zellen (paper read by title)	a 95
E. BRODA	
The uptake of some heavy trace elements by <i>Chlorella</i> (paper read by title)	a 109
W. J. CRAM	
The control of cytoplasmic and vacuolar ion contents in higher plant cells.	a 117
Discussion	b 65
M. YOUNG, R. L. JEFFERIES and A. P. SIMS	
The regulation of potassium uptake in <i>Lemna minor</i> L.	b 67
Discussion	b 82
H. GÖRING and W. DREIER	
Passive and carrier-mediated uptake of sugars by plant tissues	b 85
Discussion	b 91
F. JACOB	
Transport problems in connection with parasitism and symbiosis.	b 95
Discussion	b 103
G. SCHUSTER	
Distribution and loss of substances in virus-infected plants.	b 105
G. SCHOLZ	
Iron transport in a tomato mutant.	b 113
Discussion	b 116
R. F. DE PANNIER	
Uptake and mobilization of ³ H-coumarin in <i>Phaseolus vulgaris</i> L.	b 117
Discussion	b 123
F. PANNIER	
Transport problems involved in vivipary of <i>Rhizophora mangle</i> L.	b 125
Discussion	b 129
H. KINZEL	
Characteristics of mineral composition of different plants (Extract of a paper, published in: <i>Berichte der Deutschen Botanischen Gesellschaft</i> Vol. 82, p. 143, 1969)	

III. Transport by chloroplasts and mitochondria

W. D. JESCHKE	
On the connexion between electron transport and ion transport	a 127
Discussion	b 131
J. A. RAVEN (did not participate)	
Photosynthesis and light-stimulated ion transport in <i>Hydrodictyon africanum</i>	a 145
Discussion with a contribution of W. SIMONIS	b 133
L. PACKER	
Relation of light-induced electron flow to ion transport, photophosphorylation and ultrastructure of chloroplasts	a 153
Discussion	b 135
J. B. HANSON	
Active transport in plant mitochondria	b 137
Discussion	b 148
U. HEBER	
Flow of metabolites and compartmentation phenomena in chloroplasts	b 151
Discussion	b 180
U. ROTHE and E. MÜLLER	
On the role of chloroplasts in the intracellular distribution of ions and amino acids.	b 185
Discussion	b 186

IV. Cell potential and transport

K. UMRATH	
Electrophysiology of plant cells	a 159
N. HIGINBOTHAM	
Cell electropotentials and ion transport in higher plants.	a 167
Discussion	b 189
E. A. C. MACROBBIE (did not participate)	
Active transport in giant algal cells	a 179
V. K. ANDRIANOV, G. A. KURELLA, F. F. LITVIN	
Influence of light on the electrical activity of Nitella cells (paper read by title).	a 187
L. N. VOROBIEV	
Electrophysiological peculiarities of plant cells (paper read by title)	a 197
V. V. POLEVOY	
Bioelectric oscillations induced by auxin in maize coleoptile sections (paper read by title). . .	a 203

V. Vital dying and secondary plant products

H. KINZEL	
Vital staining of plant cells as a model of biological transport and accumulation phenomena	a 205
Discussion with a contribution of H. DRAWERT	b 193
A. NELLES	
Influence of ions on the uptake of nicotine by Nicotiana leaf disks.	b 199
Discussion	b 201
REGISTER OF PARTICIPANTS	203
