I Introduction	13
Fishing in the North Atlantic Scandinavian World: A Human-Environment Approach to the Role and Place of Iceland and the Faeroes	15
II Reviewing Viking Studies and North Atlantic Realm	
Archaeological Research	19
Iceland	22
Archaeological Research and Environmental Sciences Studies Related to Fish in Viking Age and Medieval Iceland	32
The Faeroes	34
The Faeroes and Environmental Sciences Research	36
Archaeo-ichthyological Research	38
Fishing and Fishing Communities: Anthropological, Archaeological and Historical Approaches	42
III Interdisciplinarity and Environmental History: Setting the Methodology	49
Primary Sources	50
Environmental History and Theories	53
Consilience	54
Historicism, Materialism, Functionalism and Behaviourism	55
Economics and Anthropology	57
Environmental Archives	59
Geoarchaeology and Micromorphology	59
Zooarchaeology	62
A Holistic Approach	64
IV Sagas and Archives	65
Part 1: Icelandic and Faeroese primary sources and the writing of history	66
Sagas	67
<i>Íslendinga sögur</i> , The Sagas of the Icelanders	70
<i>Landnámabók</i> or Book of Settlement	72
<i>Grágás</i> and <i>Íslendingabók</i>	74
Church & Public Records: <i>Diplomatarium Islandicum</i>	77

Part 2: Reading the sources thematically	79
Exploiting Sea and Rivers	79
Fishermen and Those involved in Fishing	84
Traders and Commercial Partnerships	86
Ship and Cargo	91
Icelanders and Norwegian kings	96
 V Modelling the Exploitation of Aquatic Resources and the	
 Emergence of Commercial Fishing in Iceland and the Faeroes	103
The Climate and Geography of Iceland	104
The Climate and Geography of the Faeroes	107
Marginality and Rationality as a Conceptual Framework	110
Marginality: Adaptation and Resilience	111
Behaviour and Rationality	112
Environmental Factors and the Norse Pioneers of Iceland and the Faeroes	115
Environmental Determinism and the Settlement of Iceland and the Faeroes	116
Resource Possibilism and the Settlement of Iceland and the Faeroes	119
Exploitation of Aquatic Systems	126
Icelandic and Faeroes Waters	126
Off shore, Inshore and Riverine Fish Resources	127
Marine Species	128
Riverine Species	131
Economic Commonwealth: Core and Periphery within the North Atlantic Realm	133
Economic Patterns from the Later Iron Age to the Medieval Period	134
Emergence of an Original Icelandic Economy or Scandinavian Continuity?	135
An Atlantic Economic Commonwealth	136
Emergence of Specialised Workers	137
Exploiting Renewable Resources for Commercial Purposes	138
Icelandic and Faeroese Merchants?	140
Regulating the Trade and Fishing Rights: Sea and Riverine Rights	142
Trading Network	143
National-Regional Trade, Markets and Fair: Alþíng og Þíng	143
Fishing and Settlement Patterns	145

High Status Farm – Coastal and Inland	147
Mid-Rank Farm	148
Fishing Stations	149
Gender Exploitation of Ecosystems	151
Church and Fish	152
Icelandic Seafaring	157
Navigation Skills	157
Ship and Seafaring Regulations	159
Iceland and the European Fish Markets	160
VI Geoarchaeology of the Emergence of Commercial Fishing:	
Testing Historical and Environmental Reconstructions of	
the Emergence of Commercial Fishing	167
Geo-archaeology: Understanding Human Economic History	
through the Use of Landscape	167
Identifying Settlement Patterns	167
The Soils of Iceland	169
Micromorphology: Investigating Human Economic Patterns	
through Soil Analysis	170
Methodology	173
Zooarchaeology: Understanding Human Economic Behaviour	
through Bone Finds	173
Bone Recovery: Archaeological Contexts	174
Methodology	175
The Norse Fish Horizon	176
Reconstructing Commercial Fishing: Case Studies	178
Árneshreppur, Strandasýsla, North West Iceland	180
Gjögur	181
Akurvík	189
The Westfjords: Vatnsfjörður	195
Mývatnssveit: Skútustaðir	198
The Faeroes	204
Undir Junkarinsfløtti	205
Á Sondum	209
Environmental Archives and Human behaviour: modelling fish	
based paleo-economies in Iceland and the Faeroes	214
VII Conclusion	219
Bibliography	231
Index	251

List of Figures, Maps, Photos, Plates and Tables

Figures

Figure 1	Relation of strategic choices and resources possibilism in organisational adaptation	122
Figure 2	Availabilty of renewable resource and possibilism concept	123
Figure 3	Fish-based economic development within a resource possibilism framework	124
Figure 4	Cyclical activities related to commercial exploitation of fish	137
Figure 5	Schema of economic exploitation of aquatic ecosystems by high status farm	148
Figure 6	Schema of economic exploitation of aquatic ecosystems by mid-rank status farm	148
Figure 7	Schema of economic exploitation of aquatic ecosystems by permanent fishing station	150
Figure 8	Economic exploitation of ecosystems by gender	151
Figure 9	Frequency of fish and mammal bones identified in thin sections	185
Figure 10	Total number of bones per species for Gjögur	188
Figure 11	Organic materials in thin sections	189
Figure 12	Bone assemblage per species	193
Figure 13	Vatnsfjörður dietary habit	198
Figure 14a	Means frequency of of fish bones to animal bones as observed in cultural sediments for the fifteenth century	201
Figure 14b	Means frequency of fish bones to animal bones as observed in cultural sediments for the seventeenth century	201
Figure 15	Display the total number of fragments by major taxonomic categories	202
Figure 16	Fish bone abundance	202
Figure 17	Display of archaeofauna from the ninth-tenth century	204
Figure 18	Frequency of fish and animal bones as observed in cultural sediments	207
Figure 19	Fish bones and birds bones in assemblage	208
Figure 20	Junkarinsflótti archaeofauna	208
Figure 21	Total of bones collected	211

Figure 22a	Compared birds and fish NISP between Undir Junkarinsflótti and Á Sondum	213
Figure 22b	Birds, fish and domestic mammals NISP at Undir Junkarinsflótti and Á Sondum	213
Figure 23	Bone assemblages for the case studies presented	216

Maps

Map 1	The Westfjords peninsula and Mývatnssveit	106
Map 2	North Atlantic and East Icelandic currents	109
Map 3	Icelandic sites location	179
Map 4	Reykjarnes Bay, Gjögur and Akurvík (hver on the map)	194
Map 5	Map showing the location of Finnbogastaðir in relation to Gjögur and Akurvík	195

Photos

Photo 1	Band of grey tephra (T)	170
Photo 2	Yellowish-orangey infills features with well-developed radial crystallisation. Similar features have been identified as Ca-Fe-phosphate by Adderley et al.	171
Photo 3	Aerial view of Gjögur	183
Photo 4	Still inhabited, the houses are closer to the beach than the early medieval settlement as shown by the farm mound in the fore ground. Structures were surveyed on the left of the mound	184
Photo 5	Mammal bone	186
Photo 6	Fragments of fish bones	187
Photo 7	Akurvík beach and reefs	190
Photo 8	Akurvík eroded profile	191

Plates

Plate 1	Successive phases of processing fish as stockfish product	177
Plate 2	Gjögur stratigraphy, east facing section	182
Plate 3	Akurvík stratigraphy	192
Plate 4	Skútustaðir stratigraphy	199
Plate 5	Area A East Section facing West (Scale: 1:10 (cm))	206
Plate 6	West profile	210

Tables

Table 1	Summary of collection methods with indication of information from each category	176
Table 2	Summary table of expected data	180
