

Acknowledgments

This book analyzes China's integration into the capitalist world-system in the long nineteenth century. It is a revised version of my doctoral dissertation, "China's Incorporation Process into the Capitalist World-Economy, 1780s–1890s." While turning my PhD dissertation into a publishable book, I owe a debt to those who have studied incorporation along with world-systems analysis including Terence K. Hopkins, Immanuel Wallerstein, Peter D. Philips, William G. Martin, Reşat Kasaba, and Wilma A. Dunaway. Just as Isaac Newton (1675) stated that "If I have seen further it is by standing on the shoulders of Giants" (*nanos gigantum humeris insidentes*), I was able to conduct China's incorporation study by following previous incorporation research.

Most of all, I am indebted to Professor Ravi Palat who set the path for my book project and generously provided a meticulous review and productive and valuable comments and resources to improve my book. Thanks to him, I was able to complete the book project journey. Professor William G. Martin and Professor Frederic Deyo (Department of Sociology, SUNY Binghamton) gave me good advice on the incorporation study for world-systems analysis and East Asian studies, respectively. Their comments inspired me with confidence. Professor Ana Maria Candela (Department of Sociology, SUNY Binghamton) guided me to a deeper understanding of Chinese history, in particular the overseas Chinese experience. Thanks to her kind guidance, I found my own way in the convoluted Ming and Qing history. I also thank Professor Fa-ti Fan (Department of History, SUNY Binghamton) for his productive comments on the dynamic of Inner Asia and the importance of the new Qing historical approach.

Professor P. McMichael of the Department of Development Sociology at Cornell University reviewed an earlier version of my article, "The Critical Appraisal of Existing Comparison Methods: Bringing the Connected Histories into Chinese Stagnation Studies." His kind and generous guidance enabled me to invent and develop the idea of "incorporating dynamics." Professor Robert Gardella (Department of Humanities, US Merchant Marine Academy) provided productive comments on tea cultivation in nineteenth-century China, enabling me to talk about the roles of Chinese tea in the

world-economy. Productive communication with Professor Dennis O. Flynn (Professor of Economics, University of the Pacific) provided in-depth knowledge of the global silver trade. Lee Chang Wook (Researcher at the Northeast Asian History Foundation) has been a kind guide to me through readings on the socioeconomic history of the Qing Empire. I am deeply grateful for their historical insight and support.

I am also thankful to Professor Chung Il-Joon (Department of Sociology, Korea University) and Professor Baek Seung-wook (Department of Sociology, Chung-Ang University). Their unstinting support helped me to finish this book project. Professor Kim Hyung Jong (Department of History, Seoul National University) and Yoo Ha Young (Researcher at the Northeast Asian History Foundation) provided me with valuable archival data on the formation of the borders of nineteenth-century China. My gratitude also goes to my colleagues, Huahsuan Chu, Kai Wen Yang, Changling Cai, Jung Sungshin, Jung Chungse, Lee Yeon-Hwa, and Kevin D. Revier, who encouraged me whenever I doubted I was up to the challenge of completing this project.

The staff at the Center for East Asian Studies at Stanford University, Seoul National University Libraries, Kyujanggak Institute for Korean Studies, and Korea University Library gave me a warm welcome whenever I needed to work in the Korean and Chinese archives. The library staff at Stanford University, Seoul National University, and Korea University were very helpful in providing advice and explaining how to access the materials. My research work would be fundamentally rudderless without their unsparing help.

Finally, this book could not have been finished without the support of my family, first and foremost my mother, Hong Jung Sun. It was her dedication to supporting me and her endless love that helped me to finish this book project. Without her support and determination, I could not have started or completed this research.

Part of chapter 1 is based on “The Critical Appraisal of Existing Comparison Methods: Bringing the Connected Histories into Chinese Stagnation Studies,” *Journal of Asian Sociology* 48, no. 2 (2019): 231–61. Another part of chapter 1 is based on “A Comparison of Weber’s and Wallerstein’s Historical Methods: The Contribution of Weber’s Methods in Developing Existing World-Systems Methods,” *Journal of Asian Sociology* 52, no. 1 (2023): 33–64. Parts of chapter 3 are based on “Conceptualizing China’s Tea History in the 19th Century: Incorporation into the Capitalist World-Economy,” *Journal of Agrarian Change* 22, no. 4 (2022): 812–30. Another part of chapter 3 appeared in “Mapping Transformation of Nineteenth-Century Chinese Cities Within China’s Incorporation Process,” *Comparative Sociology* 18 (2019): 822–48. Parts of chapter 5 appeared in “The State Formation of Late Qing China Within Global Geopolitical Dynamics,” *Sungkyun Journal of East Asian Studies* 22, no. 1 (2022): 87–111. Another part of chapter 5 appeared in “The Rise of Pacific Powers in the 19th Century Capitalist World-System and China’s Incorporation Process,” *Korean Journal of Sociology* 56, no. 2 (2022): 119–61. In all cases, I have revised the original articles or papers for this book. I thank the *Journal of Asian Sociology*, *Journal of Agrarian Change*, *Comparative*

Sociology, *Sungkyun Journal of East Asian Studies*, and the *Korean Journal of Sociology* for permission to reprint here.

I have received permission to reprint figure 3.12, “Waterfront of Central District in Hong Kong,” 1867, and figure 3.13, “The Canton Bund, 1915,” from the University of Hong Kong and the Presbyterian Research Centre, respectively. I express my deepest gratitude to Chen Weixin for his support and consideration.
