

CONTENTS

	Page
Part 1. Special Issue on High Energy Heating Sources	
Recent Developments in Plasma Metal Processing K. Mimura and M. Nanjo	1
The Atmospheric Electron Beam as a Surface Treatment Tool B.W. Schumacher	17
Physical and Technological Aspects Concerning the Heat Treatment of Glassy Metals by means of a Laser L. Lanotte and V. Tagliaferri	25
Laser-induced Fluorescence Measurement of Combustion Chemistry Intermediates D.R. Crosley	41
Application of Laser-Pulse Technique in Determining Thermal Conductivity of Molten Oxides at High Temperature Y. Waseda	55
Part 2. High Temperature Materials. Mechanical Behaviour	
Strain Rate and Temperature Dependence of Deformation and Fracture Behaviour of a Nimonic PE 16 Superalloy K. Bhanu Sankara Rao, V. Seetharaman, S.L. Mannan and P. Rodriguez	63
