

CONTENTS

	Page
Activities in Liquid Na-K and Al-Mg Alloys Estimated Using the Pseudopotential Theory of Metals S. Ueno, Y. Waseda and K.T. Jacob	89
Statistical Thermodynamics of Order-Disorder in Interstitial Alloys N.A. Gokcen	95
Phase Relationships of the System $\text{ZrO}_2 + \text{CaO} + \text{P}_2\text{O}_5$ at 1673K and the Electrical Conductivity of Calcia-Stabilized Zirconia Containing Phosphorus Pentoxide. M. Iwase and H. Kitoguchi	107
Theoretical Studies on the Concentration Fluctuation in Liquid Alloys: A Liquid Li-Na Alloy As an Example K. Hoshino	113
The Long Wavelength Limit of The Structure Factor of Liquid 3d Transition Metals Using One-Component Plasma Model S. Naito, T. Arai, I. Yokoyama and Y. Waseda	125
Effect of Radioactive Heat Transfer on Thermal Conductivity Measurements for Inorganic Semitransparent Materials at High Temperature In-Kook Suh, H. Shibata and H. Ohta	135
