

High Temperature Materials and Processes

Volume 13, No. 1

1994

CONTENTS

	Page
Some Properties of New Composite Powders Containing Boride and Aluminide Phases for Thermal Spraying Processes B. Formanek, B. Binczyk and L. Swadzba	1
The Effect of Process Annealing on the Recrystallization of Lamp Grade Tungsten G. Nagy and L. Uray	17
Influence of Processing Parameters on the Substructure of Ods Alloys J. Zbiral, G. Jangg, H.J. Ullrich, G. Korb and H. Oettel	27
Void Growth Mechanism in Bubble Strengthened Tungsten O. Horacsek, Cs.L. Toth and K. Horacsek	49
Cyclic Stress Strain Behaviour of High-Melting Point Metals S. Kong, B. Weiss, R. Stickler, M. Witwer and H. Hodl	61
Fracture Toughness of High Melting Point Materials D.L. Chen, B. Weiss, R. Stickler, M. Witwer and H. Hodl	75
Formation of Microcracks in Heavily Drawn and Annealed Tungsten L. Uray and I. Gaal	87
Dependence of Material Properties on Processing History during Wire Drawing of Commercially Doped Tungsten Lamp Wire P.F. Browning, C.L. Briant and B.A. Knudsen	97
