

SCIENCE AND ENGINEERING OF COMPOSITE MATERIALS

VOLUME 4, NO. 1

1995

TABLE OF CONTENTS

	Page
Modelling of Non-Isothermal Crystallization of Polypropylene/Glass Fiber Composites by J.H. Kim, A. Douillard, A. Vautrin and B. Chabert	3
Optimization of Composites Based on PET Fiber-Reinforced Thermoplastics by M. Arroyo and J.P. Vigo	11
The Effect of Loading Parameters on Fatigue Behaviour of Injection Moulded Composite by J. Zhou, A. D'Amore and L. Nicolais	17
A Property Degradation Model for Fibre Microbuckling Failure in Composite Laminates by C. Soutis and R. Tenchev	27
Reinforcement of Polymer Alloys. Model Representation by Y.S. Lipatov	35
Influence of a Small Additive of Oligomers on the Mechanical Properties of Carbon Fiber Composites by Y.S. Lipatov, V.G. Matyushova and V.F. Rosovitsky	43
Conductivity and Dielectric Breakdown of Heterogeneous Materials. Application of the Renormalization Group Approach by V.V. Novikov and O.P. Poznansky	49
Applicability of Different Laws of Mixture for Polystyrene Alumina Composites as Heterogeneous Dielectrics by D. Khastgir	55
