

Contents

R.E. Nather – the founder of the WET. <i>J.-E. Solheim</i>	363
Musings on the Whole Earth Telescope. <i>R.E. Nather</i>	371
The WET from outside Texas. <i>J.-E. Solheim</i>	382
A third world view of, and approach to, some WET problems. <i>D. O'Donoghue</i>	389
A brief report on WET observations from India. <i>T.M.K. Marar, S. Seetha, B.N. Ashoka</i>	396
Review of the 1991 WET Workshop. <i>J.C. Clemens</i>	403
The pulsation properties of the DA white dwarf variables. <i>J.C. Clemens</i>	407
Progress report on the analysis of the WET campaign on RXJ 2117+3412. <i>G. Vauclair</i>	435
Inside GD 358. <i>R.E. Nather</i>	436
Whole Earth Telescope data on G 117-B15A and G 226-29. <i>S.O. Kepler</i>	444
Problems in the analysis of the XCOV4 data for AM CVn (HZ 29). <i>J.-E. Solheim</i>	445
AM CVn – finally solved? Results of XCOV4, March 1990. <i>J.-E. Solheim</i>	459
Extending the WET technique to lower frequencies. <i>M. Breger and G. Handler</i>	468
Some Central Asian Observatories for the WET. <i>E. Meiřtas</i>	479
Reduction of simultaneous photometric data or how to make a bigger telescope. <i>P. Moskalik</i>	485
Microsatellites for communication with remote places. <i>A. Bruvold</i>	492
Autoguider at Mt. Suhora Observatory. <i>J. Krzesinski</i>	497
Improvements of the Pancake travelling photometer. <i>E. Meiřtas</i>	498

Update on extensions to the Texas interface. <i>J.C. Clemens</i>	501
Some components of photometric equipment for the WET project. <i>R. Kalytis, R. Skipitis, A. Karaliūnas</i> <i>and B. Dzindzelėta</i>	504
The QED data reduction program. <i>J.C. Clemens</i>	511
Whole Earth Telescope data analysis. <i>S.O. Kepler</i>	515
A comparison of the <i>prewhite</i> and <i>clean</i> procedures to find the real frequencies. <i>A. Bruvold</i>	530
The several peaks deconvolution method. <i>B. Pfeiffer</i>	538
Methods of asteroseismology for white dwarf stars. <i>P.A. Bradley</i>	545
Appendix 1: Variable white dwarf data tables (September 23, 1993 Version). <i>P.A. Bradley</i>	559
Appendix 2: WET Business Meeting.....	568
