

CONTENTS

List of participants and picture.	194
Introduction. <i>The Editors</i>	195
UBVR and UPXYZVS sequences of standard stars for the MEGA program fields along the main meridian of the Galaxy. <i>V. Andruk, S. Bartašiūtė, N. Kharchenko</i>	197
Program MEGA: transformation of instrumental magnitudes and color indices to the UBVR system. <i>V. Andruk, N. Kharchenko</i>	207
A new version of the catalog of CH and related stars. (CH95 Catalog) <i>A. Bartkevičius</i>	217
CCD observations in the Vilnius photometric system. <i>R. P. Boyle, F. J. Vrba, F. Smriglio, A. K. Dasgupta</i> <i>V. Straizys</i>	231
Theoretical isochrones in the observational plane of the Vilnius photometric system. <i>A. Bressan, G. Tautvaišienė</i>	239
Philosophy of standard stars as tools in astronomical photometry. <i>D. L. Crawford</i>	247
A global network of small telescopes as a resource for photometry. <i>D. L. Crawford, E. Craine</i>	255
Light pollution: the problem and the potential solutions. <i>D. L. Crawford</i>	263
A southern hemisphere network of the secondary standard stars in the Vilnius photometric system. <i>R. J. Dodd, M. C. Forbes, D. J. Sullivan, K. Zdanavičius</i>	271

Vilnius CCD photometry of NGC 4755 and 47 Tuc. <i>R. J. Dodd, T. Banks, K. Zdanavičius, A. K. Dasgupta, F. Smriglio</i>	277
A detailed investigation of atmospheric extinction via Vilnius photometry. <i>M. C. Forbes, R. J. Dodd, D. J. Sullivan</i>	281
Synthetic color indices of spectrophotometric standards. <i>I. N. Glushneva</i>	297
Photometric calibrations of the effective temperature. <i>B. Hauck, M. Künzli</i>	303
A new photometer for the 1.65 m telescope. <i>R. Janulis, R. Skipitis</i>	313
Interstellar extinction in the dark cloud Khavtassi 217 in Cassiopeia. <i>A. Kazlauskas</i>	319
Program MEGA: stellar counts and galactic models. <i>N. Kharchenko, E. Schilbach</i>	337
Intrinsic energy distribution in stellar spectra in the wavelength interval 320–760 nm. <i>L. N. Knyazeva, A. V. Kharitonov</i>	357
The photometric part of the space project “Struve”. <i>I. M. Kopylov, D. L. Gorshanov</i>	363
On possible extension of the Vilnius photometric system into the ultraviolet and the near infrared. <i>I. M. Kopylov, D. L. Gorshanov</i>	371
The WBVR photometry of bright northern stars. <i>V. Kornilov, A. Mironov, A. Zakharov</i>	379
Determination of atmospheric extinction using a supplementary filter. <i>V. Kornilov</i>	391
Properties and calibrations of the Washington photometric system from synthetic photometry. <i>T. Lejeune, R. Buser</i>	399
The Lausanne photometry server on the World Wide Web. <i>J.-C. Mermilliod, N. Weidmann, B. Hauck</i>	413
Geneva photometric passbands from the natural system. <i>B. Nicolet</i>	417

CCD photometry of globular clusters in the four-color system. <i>A. G. Davis Philip</i>	425
Observations of clusters using the Strömvil system.	
I. Standard areas.	
<i>A. G. Davis Philip, R. P. Boyle, V. Straižys</i>	445
A study of dust cloud parameters by Vilnius photometry.	
<i>F. Smriglio, A. K. Dasgupta, R. P. Boyle</i>	451
The method of synthetic photometry. <i>V. Straižys</i>	459
Photometric systems for future survey satellites.	
<i>V. Straižys, E. Høg</i>	477
The role of the interstellar extinction law and bandwidth effects in multicolor photometry.	
<i>J. Sūdžius, V. Bobinas, S. Raudeliūnas</i>	485
Photometric identification of the red horizontal-branch stars in the galactic field.	
<i>G. Tautvaišienė</i>	503
A homogeneous system of the secondary spectrophotometric standards of intermediate brightness.	
<i>V. M. Tereshchenko</i>	517
Application of Strömgren photometry to the study of very young Herbig Ae/Be stars. <i>P. S. The</i>	519
A comparison of the observed and theoretical spectral energy distributions.	
<i>G. Valiauga, V. Vansevičius, V. Straižys</i>	523
BVRI CCD photometry of the open cluster IC 4996.	
<i>V. Vansevičius, A. Bridžius, A. Pučinskas, T. Sasaki</i>	539
Atmospheric extinction and its removal in the Vilnius photometric system. <i>K. Zdanavičius</i>	549
Interstellar extinction in the Camelopardalis dark clouds.	
<i>K. Zdanavičius, J. Zdanavičius, A. Kazlauskas</i>	563
Components of the photometric instrumentation.	
<i>R. Kalytis, R. Skipitis, V. Luja et al.</i>	579
On the accuracy of quantitative spectral classification of stars. <i>V. Malyuto, Th. Schmidt-Kaler</i>	589
Summary of the Meeting.	591
