

Supplementary material

Figure S1: The HPLC chromatograms of three active ingredients in *A. lancea*. (a) The chromatograms of standards of three active ingredients. (b) The representative chromatograms of three active ingredients of *A. lancea* from the Mao sample. 1: atractylodin, 2: atractylon, 3: β -eudesmol.

Figure S2: The HPLC standard curves of three active ingredients in roots of *A. lancea* were calculated using linear regression. (a) atractylodin, (b) atractylon, (c) β -eudesmol.
