Retraction of “Two mixed-ligand coordination polymers based on 2,5-thiophenedicarboxylic acid and flexible N-donor ligands: The protective effect on periodontitis via reducing the release of IL-1 β and TNF- α ”

<https://doi.org/10.1515/chem-2023-0099>

received December 19, 2023; accepted December 19, 2023

Retraction of: Shao-Hsuan Wu and Jun-Hui Huang. Two mixed-ligand coordination polymers based on 2,5-thiophenedicarboxylic acid and flexible N-donor ligands: the protective effect on periodontitis via reducing the release of IL-1 β and TNF- α . Open Chemistry. Volume 18, Issue 1, doi: 10.1515/chem-2020-0081.

The article “Two mixed-ligand coordination polymers based on 2,5-thiophenedicarboxylic acid and flexible N-donor ligands: the protective effect on periodontitis via reducing the release of IL-1 β and TNF- α ” (<https://doi.org/10.1515/chem-2020-0081>) has been retracted at the request of the authors. The article has been retracted because the underlying data have been lost and the authors are unable to reproduce the results of the experiment.
