Footnotes

Birthday Greetings from Å

Scientists know Å as the unit ångström, equal to one tenth of a nanometre. It is named after Anders Jonas Ångström (1814-1874), a Swedish physicist and astronomer, who was professor at The University of Uppsala from 1858. Ångström is regarded as one of the founders of spectroscopy, and a small lunar impact crater is also named after him.

Å is also a small fishing village located towards the southern end of the Lofoten archipelago in Norway. From there, two former IUPAC officers, Christoph Buxtorf—Treasurer 2000-2007, from Switzerland, (right), and Leiv K. Sydnes—President 2004-2005 from Norway, sent their greetings for IUPAC's 99th birthday on 28 July.
