

Contents

Krzysztof DWORAKOWSKI, Jerzy KACZMARSKI: On some properties of flat graphs	5—12
Helena JAKUSZENKOW: On properties of the generalized gamma distribution	13—22
Romuald STAŃCZAK: An approximate method of solving a mixed boundary value problem in the theory of elasticity for piecewise non-homogeneous anisotropic bodies	23—31
Irena MUSIAŁ: Some problems on the existence and behaviour of solutions of homogeneous linear differential equations in Hilbert space . . .	33—42
Irena MUSIAŁ: Some problems on the existence and behaviour of solutions of non-homogeneous linear differential equations in Hilbert space .	43—50
Krzysztof WITCZYŃSKI: On some properties of periodic projective transformations on the line	51—58
Michał KISIELEWICZ: Some applications of the approximation theorem of Alexiewicz-Orlicz	59—71
М. А. БЕЛИЕВ, Я. Д. МАМЕДОВ: Устойчивость решений абстрактных дифференциальных уравнений в гильбертовом пространстве, II. . . .	73—84
K.D. SINGH, R.K. VOHRA: Integrability conditions of (1,1) tensor field f satisfying $f^3 - f = 0$	85—92
Krystyna DOBROWOLSKA: The generalized Löwner equation in the class of quasi- α -starlike meromorphic k -symmetric functions	93—107
Ирена МАКОВЕЦКАЯ, Ежи МУШИНСКИЙ: О асимптотическом поведении решений некоторой гиперболической задачи, II.	109—112
Henryk UGOWSKI: On differential inequalities of parabolic type with multidimensional time	113—123
