Julian KLUKOWSKI: On Boolean orthomodular posets	5—14
Marian MALEC, Czesław MACZKA, Anna RYCERZ: Sur la méthode des différences finies pour les équations paraboliques non linéaires sans dérivées mixtes et avec des conditions aux limites du type de Neumann	15—26
Tadeusz MARCHLIK: Pseudoelliptische Funktionen	27—32
Sylwin CAKAŁA: Solution fondamentale modifiée de l'équation de la chaleur et son application à la construction de la solution fondamentale modifiée d'un système parabolique	33—47
Anna WŁODARSKA-DYMITRUK: Polynomial-periodic solutions of differential-difference equations	49—65
Wanda SZNITKO: Investigation of regular continuity for some singular surface integral	67—76
Wawrzyniec SADKOWSKI: Boundedness and asymptotic convergence of solutions of some mixed boundary-value problem	77—88
Stanisław WAJLER: Sur certaines sous-classes de la classe des fonctions quasi-étoilées	89—97
Janina ŚLADKOWSKA: Les polynômes de Faber dans la théorie des fonctions univalentes bornées	99—112
Тереза МИХНИКОВСКАЯ-ПЛЮЦИНСКАЯ: Свойство операции дифференцирования выполненной на модифицированном обобщенном квази-потенциала пространственного заряда	113—121
Jacek WOJTOWICZ: On the estimation of the error of solving the system of ordinary differential equations with initial conditions and on the estimation of the error of derivatives	123—131

Directions for Authors

Papers may be submitted to the Editor in English, French, German or Russian, exceptionally in Polish, and should be typed with double spacing on a good quality paper. Manuscripts in small type cannot be accepted. They should not exceed twenty typed pages. Preferably two copies (original and a ribbon or Xerox copy) should be submitted. Formulas and indices should be written with generous spacing and typed if possible; symbols which are not on the typewriter should be inserted by hand in Indian ink. Oblique dash / should not be used in place of parentheses (). Special attention should be paid to distinguishing 1 (number) from l (letter). Formulas should be numbered on the left-hand side of the line. The heading of the paper should consist of the author's name followed by surname, in the next line the title of the paper in capitals. Section titles should be written without indentation and underlined. Words such as theorem, lemma, proof, corollary, remark, example should be typed in normal text with a space between letters but without underlining. Footnotes should appear at the bottom of the relevant page separated by a line from the main text. Pages should be numbered in the right upper corner. References to the literature in the text should be numbers enclosed in square brackets and should be listed in alphabetical order at the end of the paper.

The bibliography should be cited as follows:

Books: initials and names of all authors (typed with a space between letters), title, place and year of publication.

Articles: initials and names of all authors (typed with a space between letters), full title, the journal as abbreviated in Mathematical Reviews, volume number (in arabic), year in parentheses, first and last page numbers.

The paper should conclude with indication of the author's place of employment and his address.
