Jacek WOJTOWICZ: Stability of the four-point finite difference scheme for linear parabolic equations with first derivatives and with variable coefficients	153—158
J. CHABROWSKI, G. REYNAUD: Principe de maximum de certaines solutions d'inegalite aux derivees partielles de type parabolique dans un cylindre $\Omega \times]-\infty, T)$	159—180
Wanda SZNITKO: Properties of a certain singular integral and their applications to solution of Hilbert problem in the space	181—190
Sabina KWIECIEŃ: Reduction of the equation $F(x_1, x_2, x_3, x_4) = 0$ to the form $f_1(x_1)f_2(x_2) + g_1(x_1)f_3(x_3) + h_1(x_1) + f_4(x_4) = 0$	191—201
R. BITTNER, E. SADOWSKA: Elements of finite variation	203—216
Jan CHMIELOWSKI: Note sur un travail de H. Hornich	217—219
D. BRYDAK, B. CHOCZEWSKI: Continuous solutions of a functional inequality of second order	221—228
M. KISIELEWICZ, B. SERAFIN, W. SOSULSKI: Existence theorem for functional-differential equation with compact convex valued solutions	229—237
Juhani NIEMINEN: Remarks on distinguishing subsets of join-semilattices	239—242
Roman TABERSKI: Two indirect approximation theorems	243—255
Zbigniew Jerzy JAKUBOWSKI, Józef KAMIŃSKI: On some properties of multivalent alpha-starlike functions	257—265
P. K. DAS, S. K. BOSE: Ideals and multipliers of a class of integral functions	267—270
Katarzyna LITEWSKA: Обобщенные решения первой задачи Фурье для параболической системы	271—279
Stefan CZERWIK: Generalization of Edelstein's fixed point theorem . .	281—285
Agnieszka PLUCIŃSKA: Some transformations of quasi-diffusion processes	287—300
Ireneusz KUBIACZYK: Common fixed point theorems in metric spaces . .	301—306

Directions for Authors

Papers may be submitted to the Editor in English, French, German or Russian, exceptionally in Polish, and should be typed with double spacing on a good quality paper. Manuscripts in small type cannot be accepted. They should not exceed twenty typed pages. Preferably two copies (original and a ribbon or Xerox copy) should be submitted. Formulas and indices should be written generous spacing and typed if possible; symbols which are not on the typewriter should be inserted by hand in Indian ink. Oblique dash / should not be used in place of parentheses (). Special attention should be paid to distinguishing 1 (number) from 1 (letter). Formulas should be numbered on the left-hand side of the line. The heading of the paper should consist of the author's name followed by surname, in the next line the title of the paper in capitals. Section titles should be written without indentation and underlined. Words such as *theorem*, *lemma*, *proof*, *corollary*, *remark*, *example* should be typed in normal text with a space between letters but without underlining. Footnotes should appear at the bottom of the relevant page separated by a line from the main text. Pages should be numbered in the right upper corner. References to the literature in the text should be numbers enclosed in square brackets and should be listed in alphabetical order at the end of the paper.

The bibliography should be cited as follows:

Books: initials and names of all authors (typed with a space between letters), title, place and year of publication.

Articles: initials and names of all authors (typed with a space between letters), full title, the journal as abbreviated in Mathematical Reviews, volume number (in arabic), year in parentheses,, first and last page numbers.

The paper should conclude with indication of the author's place of employment and his address.
