

Contents

J. GROCHULSKI, T. KONIK, M. TKACZ: On some relations of tangency of arcs in metric spaces	567—582
Barbara CIECHANOWICZ-HALKA: Ein nicht-lineares Randproblem der flachen Elastizitätstheorie	583—590
Lucyna REMPULSKA: On some means of double Fourier series of continuous functions	591—601
Irena MAKOWIECKA: Investigations the boundedness of the solutions for the equation of the longitudinal vibrations of the bar	603—611
Grzegorz DECEWICZ: Non-continuous and non-linear Hilbert-Haseman problem for a system of arbitrary power	613—633
Krzysztof TATARKIEWICZ: Sur les équations qui ne devraient pas osciller	635—648
Andrzej BORZYMOWSKI: On certain iterated singular integrals	649—662
Andrzej SIEROCIŃSKI: On the optimal choice from a sample drawn from a known distribution	663—674
Zbigniew LESZCZYŃSKI: Remarks on functor categories	675—684
M. BARROS, A. RAMÍREZ: Decomposition of quasi-Kähler manifolds which satisfy the first curvature condition	685—694
Zbigniew OLSZAK: Remarks on manifolds admitting totally umbilical hypersurfaces	695—702
Zofia WALCZAK: Uniform convergence of sequences of functions with values in a topological space	703—706
Stanisław KUŚ: On the completeness of certain systems of functions in the spaces $L^2(0, \infty)$ and $L^2(-i\infty, i\infty)$	707—720
L. v. WOLFERSDORF, J. WOLSKA-BOCHENEK: A conjugacy problem of potential theory arising in calculus of variations	721—733
Ryszard MAZUR, Anna TRESKA: On some classes of β -starlike and of quasi- β -starlike meromorphic k -symmetric functions	735—750
Zdzisław PUZIO: Sur un problème généralisé de Fourier pour un système d'équations intégral-différentielles	751—766
Kazimierz CEGIELKA: Some note on changes of Riemannian metric in geometry of submanifolds	767—774
Wawrzyniec SADKOWSKI: Boundedness and stability of solutions of some hyperbolic equations	775—787
Benjamin GOLDYS: The secretary problem — The case with memory for one step	789—799
Włodzimierz SMOLEŃSKI: On quasi-invariance of product measures	801—805
Jerzy TROJAN: How to decrease the combinatory complexity	807—811
Andrzej JURA: Determining ideals of a given finite index in a finitely presented semigroup	813—827
Edmund PLUCIŃSKI: Piecewise monotonic transformations of the discrete stochastic processes	829—838
Romuald STAŃCZAK: A contact problem in the theory of elasticity . . .	839—849
Edward OTTO: Pappus'sche Eigenschaft des Linienraumes	851—852
