

Contents

Krzysztof TATARKIEWICZ: L'application d'une méthode géométrique à l'étude des équations différentielles ordinaires du second ordre	853—873
Adam KOWALCZYK, Jan KUBARSKI: A local property of the subspaces of Euclidean differential spaces	875—885
K. K. DUBE, Ram NIWAS: Almost r-contact hyperbolic structure in a product manifold	887—897
Józef KALINOWSKI: A theorem supplementing a result of James A. Yorke	899—900
Anna POL-SWIRSZCZ: Certain reflexive lattices of subspaces of a Hilbert space	901—905
G. S. LINGAPPAIAH: Bayesian approach to the prediction problem in gamma population	907—920
Mieczysław GUTOWSKI: Über die Menge von Punkten, in denen die Ableitung der Sprungfunktion unendlich ist	921—928
Juhani NIEMINEN: Application of lattice theory and ideals to graph theory	929—935
Zbigniew GRANDE: Sur la r-continuité des fonctions de deux variables	937—945
Jadwiga LUBOWICZ: A construction of the basic solution of the equation $\Delta u - \delta_t u - vu = 0$	947—957
Marek RUTKOWSKI: The optimal stopping problem with incomplete information	959—973
И. И. МИХАЙЛОВ: Некоторые замечания к диофантову уравнению $x^{4k} + y^{2k} + z^{2k} = 2t^{2k}$ ($k = 1, 2$)	975—981
Mieczysław KUCHARZEWSKI: Orientability of n-dimensional projective geometry	983—995
Jan CHABROWSKI: Asymptotic estimates for solutions of the second boundary value problem for parabolic equations	997—1013
Julian KLUKOWSKI, Cecylia ŁAPIŃSKA: Post posets as a generalization of Post algebras	1015—1028
A. O. UZIEMBŁO, L. ŻURAWSKA: Definability of functions on a finite set by means of compositions of addition and multiplication modulo some prime numbers	1029—1032
Marian JASZCZAK: On harmonic and Killing symmetric tensors in V_n	1033—1051
Wiesław SOBIESZEK, Paweł KOWALSKI: On the different definitions of the lower semicontinuity, upper semicontinuity, upper semicompatibility, closity and continuity of the point-to-set maps	1053—1063
Grzegorz DECEWICZ, Waław LEKSINSKI: On some class preserved by a singular integral with a deviated argument	1065—1070
Teresa MARKIEWICZ: Approximation des fonctions de deux variables par les moyennes de Nörlund des séries doubles de Fourier	1071—1081
D. BECCHIO, L. ITURRIOZ: Sur une définition des algèbres de Łukasiewicz et de Post d'ordre n	1083—1094
Zenon MOSZNER: Sur l'inégalité de translation	1095—1100
Jan MUSIAŁEK: On the Cauchy problem for the n-caloric equation and for the time-plane	1101—1114
Zbigniew DUDEK: Some properties of Wronskian in D—R spaces of the type $Q—L, I$	1115—1130
Anna ROMANOWSKA: On free algebras in some equational classes defined by regular equations	1131—1137
Elżbieta FERENSTEIN: The modified least — squares method of the infinite dimensional parameter estimation	1139—1153
