Krzysztof TATARKIEWICZ: Les propriétés asymptotiques des solutions de certains systèmes d'équations différentielles	295—315
Tadeusz PRUSZKO: Operational equations in space B_0^* and boundary value problems	317—329
K. D. SINGH, Rakeshwar SINGH: On almost para-contact manifolds with semi-symmetric metric connections	331—341
Joanna PAWELSKA: On some example of a non-measurable set	343—350
K. D. SINBH, Amod KUMAR: On paracontact manifolds	351—357
Aleksander HAC, Roman SŁYSZ: A non-linear Hilbert-Riemann problem with boundary conditions of the class L_p^α	359—372
Stanisław WRÓŃSKI: On fields of sets with a nowhere dense boundary	373—377
V. C. GUPTA, C. P. AWASTHI: Complete lift of Φ_μ -structure in tangent bundle	379—388
Tadeusz GERSTENKORN: Moment recurrence relations for the inflated negative binomial, Poisson and geometric distributions	389—410
T. JANIĄK, E. ŁUCZAK-KUMOREK, M. KISIELEWICZ: Existence theorem for functional-differential relations	411—420
Vadim KOMKOV: A note on a formal manipulation of divergent series and integrals	421—428
Marian HOTŁOŚ: On null geodesic collineation in conformally 2-recurrent Riemannian manifolds	429—443
Włodzimierz ŁENSKI: Strong approximation of functions by the triangular partial sums of double Fourier series	445—456
Jürgen NAGEL: Über äquivalente Normen in Räumen mit Gewicht	457—461
Stanisław KUŚ: On the connection between approximation in the space $L^2(-i\infty, i\infty)$ and interpolation	463—468
Henryk UGOWSKI: On a random linear parabolic equation of any even order	469—500
Anna DYMITRUK, Jerzy MUSZYŃSKI: Damped vibrations of strings connected in a node	501—508
Agnieszka PLUCIŃSKA: A property of series of quasi-diffusion processes	509—519
Grzegorz DECEWICZ, Wacław LEKSIŃSKI: On some system of integral equations with deviated argument	521—527
Magdalena SZYMAŃSKA-BARTMAN: Orthogonality and orthocomplementation in partially ordered sets	529—542
