

C o n t e n t s

Janina KOTUS: Vector fields on R^2 without oscillations are generic . . .	285—295
Lucjan MERES: On the singular points of Pringsheim — Du Bois Reymond of a function of two variables	297—310
G. D. AWASTHI, A. K. SHUKLA: On some curve in a subspace of a Finsler space	311—318
Józef CZUGAŁA: On the continuous solutions of a functional equation containing iterations of the unknown function	319—331
V. C. GUPTA, Renu DUBEY: Invariant submanifolds of f_2 -manifold . .	333—342
Wiesław GRYCAK: Some remarks on null geodesic collineations in 2-recurrent Riemannian manifolds	343—348
Kazimierz WŁODARCZYK: Applications of inequalities of Garabedian-Schiffer type for pairs and bounded functions not assuming certain values	349—373
M. S. KHAN: Remarks on some fixed point theorems	375—379
Alicja ZIELIŃSKA: On some extremal problem in classes of bounded univalent functions	381—396
Janusz ZYSKOWSKI: A convex hull and extreme points of some family of holomorphic functions	397—404
Jerzy SKUCHA: Topological properties of C-nets	405—419
Romuald STAŃCZAK: On an inverse problem in elasticity	421—426
Cz. BURNIAK, J. STANKIEWICZ, Z. STANKIEWICZ: The estimations of coefficients for some subclasses of spirallike functions	427—441
Erwin TURDZA: Set stability for a functional equation of iterative type	443—448
Shyam K. BAJPAI: On the coefficients of functions whose real part is bounded	449—456
Ivan GUINTCHEV: Stability of a linear retarded equation	457—464
Józef DUDEK: On bisemilattices, II	465—475
Roman TABERSKI: One-sided approximation by entire functions . .	477—505
Edward Z. ANDALAFTE: An intrinsic isosceles four point property which characterizes hyperbolic and euclidean spaces	507—514
Jerzy MUSZYŃSKI: Исследования некоторого „однородного” интегрального уравнения в банаховом пространстве	515—538
Magdalena TRYJARSKA: Sur l'intégrale de Fourier-Poisson relatif à l'opérateur différentiel d'ordre pair	539—547
Wojciech ŻAKOWSKI: On some class of systems of nonlinear processes with a memory	549—561
